Indonesia Investment Authority

TOMORROW IS BUILT ON TODAY'S TRUST

Annual Report 2025

INDONESIA INVESTMENT AUTHORITY

TOMORROW IS BUILT ON TODAY'S TRUST

Indonesia Investment Authority

Annual Report **2025**

TOMORROW
IS BUILT ON
TODAY'S TRUST

Over its first five years, Indonesia Investment Authority (INA) has evolved from a newly established institution into a trusted investment partner with growing capability and institutional credibility, shaped by its dual mandate to deliver risk-adjusted commercial returns while supporting Indonesia's long-term development priorities. This evolution reflects INA's journey into a sovereign wealth fund (SWF), grounded in professionalism and a long-term orientation, defined not only by what has been achieved, but by how it has been achieved. Through disciplined processes, consistent execution, and a strong commitment to governance, trust earned from global investors reflects confidence in INA and equally in Indonesia as a credible and investable destination.

Looking ahead, the trust built today becomes the foundation for what INA is ready to deliver tomorrow. Strong partnerships, well-structured and investable deals, and a clear focus on long-term value creation position INA to scale its impact responsibly. Guided by sound governance, anchored in professionalism and its dual mandate, and supported by dedicated people, INA remains committed to translating trust into tangible outcomes that support Indonesia's sustainable growth and long-term development.

Five-Year Reflection of INA's Journey

Five-Year Reflection of INA's Journey

1

A LOOK BACK

2021

Building The Foundation

Each step this year has shaped our growth today...

Year One for Indonesia Investment Authority was not merely a phase of establishment, but a phase of foundation-building. It was about constructing structure before pursuing scale, embedding values before seeking returns, and instilling discipline before expanding mandate. Every decision, policy, and partnership became a cornerstone for an institution designed to serve both present and future generations.

Capital Commitment

Full capital injection of Rp75 trillion, completed on 23 December 2021.

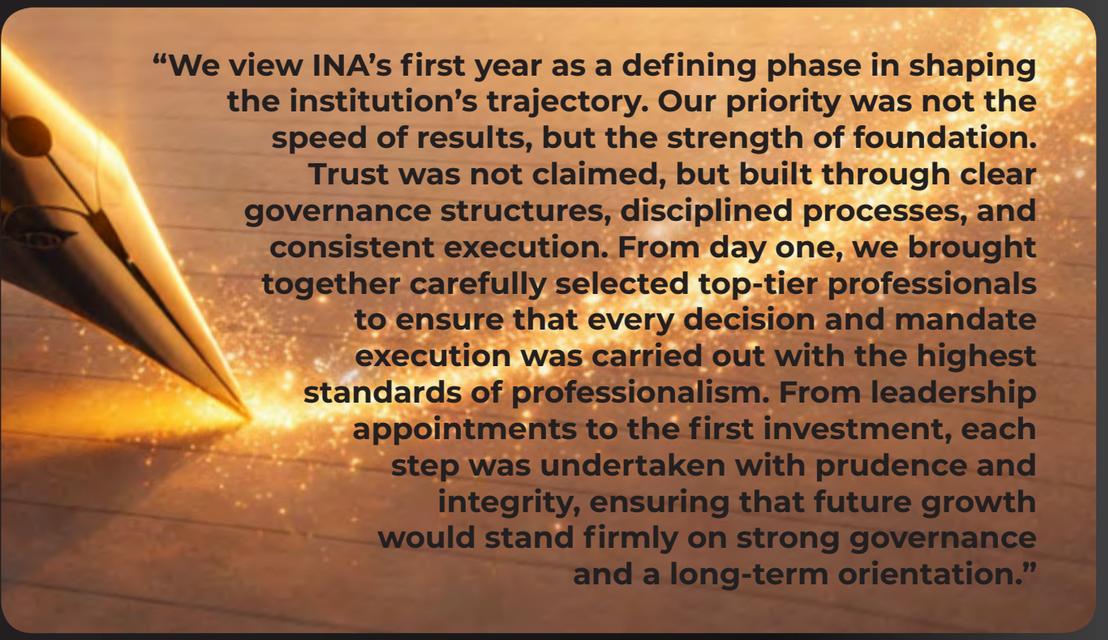

Capital was not merely financial capacity, but a mandate to be managed prudently and responsibly.

Leadership Foundation

Appointment of the first 5 (five) Supervisory Board Members pursuant to Presidential Decree No. 6/P of 2021 dated 22 January 2021.

Appointment of the first 5 (five) Board of Directors Members pursuant to INA Decree No. 01 of 2021 dated 15 February 2021.

Year One began with legitimacy and leadership. Governance was not an afterthought, but the starting point.

"We view INA's first year as a defining phase in shaping the institution's trajectory. Our priority was not the speed of results, but the strength of foundation. Trust was not claimed, but built through clear governance structures, disciplined processes, and consistent execution. From day one, we brought together carefully selected top-tier professionals to ensure that every decision and mandate execution was carried out with the highest standards of professionalism. From leadership appointments to the first investment, each step was undertaken with prudence and integrity, ensuring that future growth would stand firmly on strong governance and a long-term orientation."

Vision & Identity

Establishment of Vision, Mission, Core Values, and INA logo.

Identity was established to guide direction, not merely to represent it.

Governance Architecture

- ✓ **Issuance of Supervisory Board Regulations.**
- ✓ **Issuance of 12 Board of Directors Regulations comprising 36 provisions.**
- ✓ **Establishment of 3 (three) Supervisory Board Committees: Audit Committee, Ethics Committee, and Remuneration & HR Committee.**
- ✓ **Establishment of 2 (two)Board of Directors Committees: Investment Committee and Risk Management Committee.**
- ✓ **Establishment of Whistleblowing System – INA Integrity Line.**

Process discipline became the guardian of trust. Structure preceded transactions.

Talent Foundation

Organizational structure development and recruitment of 26 top talents.

Institutions are shaped by people who share long-term purpose and values.

Global Alignment

Became an Associate Member of International Forum of Sovereign Wealth Fund (IFSWF) and committed to implementing the Santiago Principles dated 24 May 2021.

INA aligned itself with global standards, recognizing that trust is universal.

First Strategic Investment

First investment in PT Daya Mitra Telekomunikasi (Mitratel), in partnership with global investors from Singapore and Abu Dhabi. **INA investment value of Rp4.0 trillion (~USD282 million).**

The first investment was not merely a transaction, but a declaration of intent.

Five-Year Reflection of INA's Journey

A LOOK BACK

2022 Closing Deals

2

Each investment has laid the groundwork for our growth ahead...

Year Two marked a shift from building foundations to demonstrating capacity. If Year One was about establishing structure and embedding discipline, Year Two was about executing the mandate. Momentum was measured not merely by the number of transactions, but by the quality of decisions and the consistency of governance in every capital deployment.

Defining Strategic Sector Focus

Defined four priority investment sectors:
- ✓ **Transportation & Logistics**
- ✓ **Green and Renewable Energy**
- ✓ **Digital Ecosystem & Infrastructure**
- ✓ **Healthcare Services**

Strategy clarified direction, ensuring capital deployment aligned with national development priorities.

Investment Process Refinement

Refining policies, frameworks, and operational guidelines to improve investment effectiveness.

Process refinement ensured that scale did not compromise rigor.

ESG Integration in Execution
Integrating ESG aspects into every stage of the investment process.

Global Recognition

INA became a Full Member of IFSWF with commitment to implementing the Santiago Principles across investment and risk management dated 20 September 2022.

Full membership signified institutional maturity and alignment with global sovereign wealth governance standards.

Global Sustainability Ranking
INA is ranked 4th among sovereign wealth funds in improving the **GSR scoreboard, achieving a score of 32%.**

Investment Commitments Secured

- ✓ **Established partnerships** with more than **900 prospective leading global investment partners,** including sovereign wealth funds, pension funds, institutional investors, and private equity firms, to invest through private debt, foreign direct investment, and other investment schemes.

  Trust was cultivated through dialogue, transparency, and disciplined opportunity assessment.

- ✓ Secured investment commitments of **~Rp400 trillion (USD 27 billion).**

  This commitment reflected confidence in INA's governance framework and Indonesia's long-term prospects.

Investment Deployment Growth

Total cumulative investment deployment by INA and its co-investors in the second year **reached Rp23.8 trillion (~USD1.7 billion),** deployed in toll road infrastructure, digital travel ecosystem, and expansion funding for a state-owned healthcare enterprise.

Growth in deployment reflected disciplined scaling, not accelerated risk-taking.

"We view the Second Year as a moment of proving the values we embedded from the beginning. Governance foundations, disciplined processes, and organizational readiness were no longer conceptual frameworks; they were tested through real decisions and transactions. Each investment commitment and strategic partnership reflected our commitment to integrity and professionalism in deploying capital. The momentum achieved was not an end in itself, but a natural outcome of consistency and prudence. For us, closing deals was not merely about completing transactions, but about reinforcing trust that INA stands as a credible investment partner, faithful to its dual mandate and steadfast in its long-term orientation."

Five-Year Reflection of INA's Journey

A LOOK BACK

2023 Portfolio Building

Building our portfolio strengthened our path forward...

Year Three marked a phase of deepening. After establishing foundations and closing deals, the focus shifted toward portfolio quality and long-term resilience. INA did not merely expand asset exposure, but ensured that each investment carried strategic direction, robust oversight, and sustainable value creation potential.

Portfolio Growth

- **Total cumulative investment deployment by INA** and its co-investors in 2023 **reached Rp49.6 trillion (~USD3.2 billion), rose by 108%** year-on-year.

Scale reflected confidence, while discipline safeguarded sustainability.

Indirect Investment Scheme Development

Refinement of partner selection strategy through direct investments and indirect (platform) structures to optimize value creation.

Partnerships were structured not only for capital deployment, but for shared long-term value creation.

Asset Class Diversification

Development of investment strategies across new asset classes, including private debt, fund of funds, real estate, and public markets.

Diversification strengthened resilience by balancing growth with prudent risk allocation.

Strengthening the Value Creation Function

Establishment of Strategic Operation function to actively and passively drive value creation.

Value creation became an institutional mandate, not incidental outcome.

Main roles of Strategic Operation Division:

- Value creation
- Portfolio monitoring
- Governance of investee companies and
- Asset divestment.

Oversight ensured that growth remained disciplined and aligned with governance principles.

Strengthening Risk Management and Governance

Launched a risk dashboard to support risk oversight and the monitoring of governance, violations, and consultations.

Transparency strengthened institutional accountability.

Enhancing ESG Awareness

- **Enhanced ESG framework** in portfolio monitoring, by integrating new climate-related metrics.

  Climate awareness was embedded as part of fiduciary duty.

- **Energy Transition Engagement**
  Active participation in the development of Guidelines on Financing the Managed Phaseout of Coal-Fired Power Plants by GFANZ.

  INA contributed to shaping responsible transition finance principles for future energy transformation projects.

Five-Year Reflection of INA's Journey

A LOOK BACK

2024 Sustainable Growth

Sustainable growth guided our journey toward long-term value...

Year Four marked a phase of institutional maturity. The Fourth Year centered on balancing growth with resilience. Growth was no longer defined merely by expansion, but by the ability to actively manage the portfolio, preserve yield quality, and sustain long-term value creation.

Portfolio Rebalancing

Implementation of portfolio rebalancing toward asset classes with higher and immediate yield characteristics, alongside risk diversification through indirect investments via LP and/or Co-GP schemes. Indirect investment strategies expand access to networks, learning, reputation, capital efficiency, and the strengthening of a long-term track record.

Portfolio Rebalancing strategy ensured disciplined growth while preserving capital resilience.

Strengthening of Portfolio Oversight

Establishment of Portfolio Operational Committee to enhance value creation governance and oversight.

Active oversight strengthened accountability in portfolio value enhancement.

"Entering the Fourth Year, we stood at a phase of maturity and balance. Having built, validated, and strengthened the institution, we recognized that true growth is not about scale alone, but about preserving direction. Growing with awareness means understanding that every opportunity carries responsibility, and every expansion requires equal discipline. In an evolving economic landscape, we chose measured growth, strengthening governance, maintaining risk discipline, and ensuring that every investment decision aligns with our long-term vision. External validation and active portfolio management reflected that institutional maturity is not defined by time, but by the ability to endure, adapt, and remain anchored to our core principles."

Investment Grade Validation

Fitch Ratings assigned INA a BBB rating on the international scale and AAA(idn) on the national scale, both with a Stable Outlook. The BBB rating is aligned with Indonesia's sovereign rating at the investment grade level.

External validation reflected confidence in INA's governance, capital management, and institutional discipline.

Cumulative Investment Growth

Total cumulative **investment deployment by INA** and co-investors reached **Rp60.9 trillion (~USD3.8 billion)**.

Scale reflected responsible expansion anchored in governance.

First Divestment and Return Realization

Loan repayment on digital sector investment **generating 17.1% USD return.**

Divestment in **a Trans-Sumatra toll road project.**

Disciplined exit strategies demonstrated lifecycle portfolio management capability.

Refining of Governance

Developing Risk-Based Compliance Architecture

Developing risk-based compliance framework, including new policies, establishment of Conflict of Interest Committee, and technology-based tools to enhance compliance risk controls.

Integrating ESG at the asset/ subsidiary level

Strengthened ESG integration in investment and operations, with development of ESG roadmap at asset and subsidiary levels.

A LOOK BACK

2025

Dynamic and Resilient Growth

Five-Year Reflection of INA's Journey

Dynamic and resilient growth shaped our strength in navigating change...

Year Five marked a phase of consolidated trust and resilience. INA entered a stage of greater institutional readiness to navigate both global and domestic market dynamics. Growth was not merely pursued, but consciously managed to remain resilient across economic cycles.

Strategic Sector Expansion

Expansion of strategic focus sectors to:

- **Infrastructure, Transportation and Logistics**
- **Green Energy and Energy Transition**
- **Digital and Digital Infrastructure**
- **Healthcare Services**
- **Advanced materials**

Strategic expansion reflected adaptive alignment with evolving national and global priorities.

Strategic Asset Allocation Discipline Enhancement

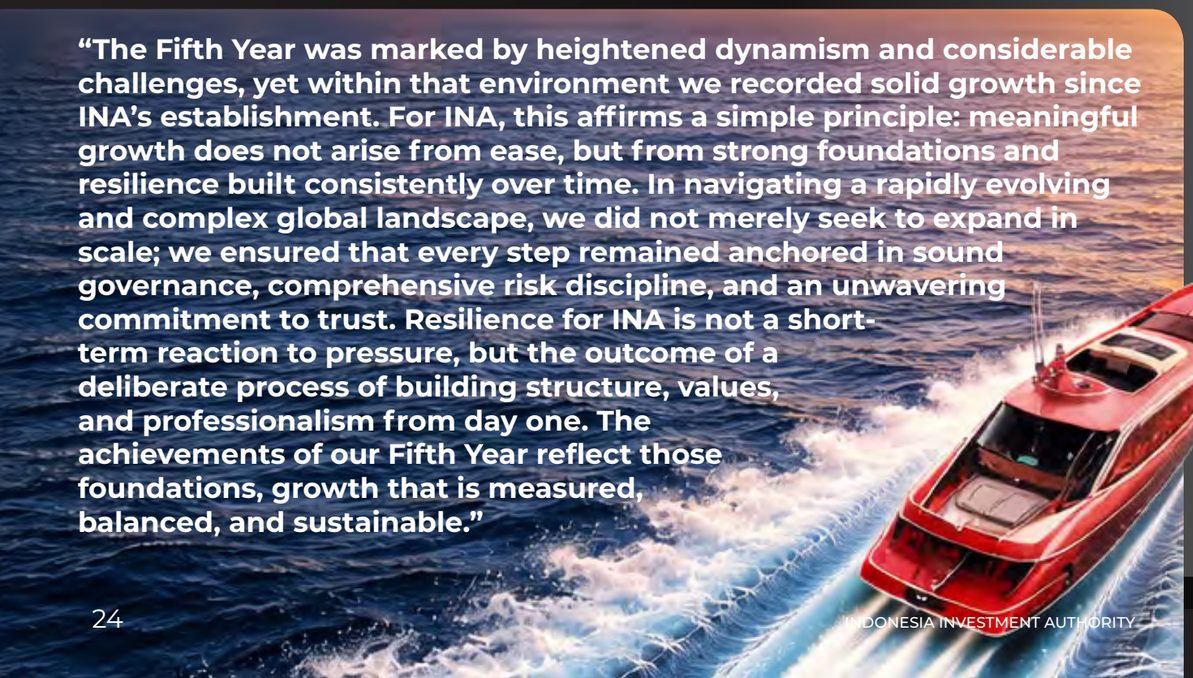

Continuous management of Strategic Asset Allocation (SAA) to achieve improved internal rate of return (IRR) with optimized risk mix.

Portfolio discipline ensured returns were pursued with prudence and balance.

Sustained Investment Grade

Maintained Fitch Ratings of BBB on the international scale and AAA(idn) on the national scale, with a Stable outlook. International rating remained aligned with Indonesia's sovereign rating.

Consistency in rating reflected strong creditworthiness and sustained stakeholder confidence.

"The Fifth Year was marked by heightened dynamism and considerable challenges, yet within that environment we recorded solid growth since INA's establishment. For INA, this affirms a simple principle: meaningful growth does not arise from ease, but from strong foundations and resilience built consistently over time. In navigating a rapidly evolving and complex global landscape, we did not merely seek to expand in scale; we ensured that every step remained anchored in sound governance, comprehensive risk discipline, and an unwavering commitment to trust. Resilience for INA is not a short-term reaction to pressure, but the outcome of a deliberate process of building structure, values, and professionalism from day one. The achievements of our Fifth Year reflect those foundations, growth that is measured, balanced, and sustainable."

Strengthening of Risk Management and ESG

- **Strengthening the enterprise risk function**

  Establishment and activation of enterprise risk function covering strategic, financial, compliance and legal, reputational, and operational risks.

  Holistic risk oversight strengthened institutional maturity.

- **Actively engaged in climate-related issues**

  Official observer status in Asia Investor Group on Climate Change (AIGCC).

  Climate alignment reflected forward-looking responsibility in capital stewardship.

Investment Deployment Growth

- Total cumulative investment deployment by INA and its co-investors up to 2025 reached **Rp74.5 trillion (~USD4.7 billion),** deployed across advanced materials, healthcare, logistics, and fund participation as a Limited Partner.

  Measured growth reflected disciplined capital scaling.

Portfolio Exit Strategy

Partial sell-down of loan facilities to a leading hospitality partner and divestment in logistics sector on 2 out of 3 modern warehouse assets.

Active lifecycle management demonstrated capital recycling discipline.

Five-Year Reflection of INA's Journey

"INA's growth began with its mandate and has evolved through disciplined practice. Amid ongoing global dynamics and continuous change, we have learned that resilience is built on strong governance, sound risk management, the support of top talent, and a professional culture upheld consistently.

Today, we stand as an institution oriented toward performance excellence. **Tomorrow**, we remain committed to growing with humility and responsibility. And in every step, we understand that **Trust** is not a claim, but a responsibility to be safeguarded for the nation."

Today. Tomorrow. Trust.

Today. Tomorrow. Trust.

INA today stands as an institution with a strong and credible foundation after five years of operation.

Purbaya Yudhi Sadewa
Chairman of Supervisory Board
Ex-Officio Member of Supervisory Board

Today

Its initial phase was not solely about building an investment portfolio, but firstly about building the institution itself, grounded in governance, professionalism, and integrity. Governance structures, investment processes, risk management, and internal oversight mechanisms have evolved into a more systematic and well-documented framework aligned with international best practices, while organizational discipline has progressed from procedural compliance into an embedded culture.

The Supervisory Board observes that commitment to independence, transparency, and accountability is reflected not only in formal policies but also in the conduct and professionalism of INA's people. Sustained trust from partners and investors serves as a clear indicator of institutional credibility. **INA today is viewed as having entered a more solid phase of maturity, supported by a firm foundation to expand its impact without departing from its mandate as a sovereign wealth fund serving future generations**."

Tomorrow

"As INA enters its next phase, growth is expected to be accompanied by stronger institutional capability and governance discipline.

Within its 2026–2030 strategic horizon, ambitious targets amid evolving global and domestic dynamics require expanded investment activities supported by more resilient execution, enhanced stakeholder management, and adaptive governance. The Supervisory Board monitors alignment between growth strategy and INA's long-term mandate, including contribution to national priority programs, the strengthening of INA's role as a strategic investor with operational excellence and structured knowledge transfer, and reinforced risk management, systems, and infrastructure in line with increasing portfolio complexity.

The Supervisory Board emphasizes that disciplined adherence to risk appetite, comprehensive due diligence, and prudent decision-making are fundamental to long-term portfolio resilience. Institutional maturity is reflected in effective committee oversight, high-quality reporting, transparency in decision-making, and consistent independence. **INA's future is defined by scaling impact responsibly, growing assets, delivering optimal returns, supporting national development, and protecting long-term value while safeguarding institutional reputation**."

Trust

"Trust remains the cornerstone of INA's sustainability as a sovereign investment institution.

Trust is not measured solely by financial performance, but by the integrity, independence, and transparency of the processes that underpin each decision. The Supervisory Board ensures that every strategic and investment decision undergoes rigorous scrutiny, supported by comprehensive due diligence, proper documentation, and independent involvement of risk, compliance, and internal audit functions, with consistent application of the four-eye principle and the three-lines model across both pre- and post-investment stages.

The Supervisory Board also ensures INA's commitment to robust conflict-of-interest management, strong checks and balances, and transparent reporting to safeguard objectivity and professionalism. Recognizing that tone at the top shapes institutional culture, the Board remains committed to upholding integrity, independence, transparency, professionalism, and accountability. **Through this commitment, trust is safeguarded not only through outcomes achieved, but through the quality and discipline of the processes that sustain them, today and for generations to come**."

Today. Tomorrow. Trust.

"Today, when I look at INA, what stands out is not merely the results, but its resilience.

Ridha Wirakusumah
Chairman of Board of Directors
Chief Executive Officer

Today

We navigated a year of profound dynamics, changes that tested institutional endurance amid an increasingly inward-looking global environment. In such conditions, every institution is called to remain steady and focused. **I am grateful that INA maintained its balance. To me, this is not simply about numbers, but about character**. About remaining professional, pragmatic, and action-oriented amid uncertainty. **We chose to focus on disciplined execution, strengthening process, governance, and culture. When those foundations are upheld consistently, performance follows naturally. That is INA today, calm in process, strong in performance**."

Tomorrow

"Looking ahead, the challenge is not only to sustain performance, but to preserve the values and culture that shaped us.

The world is moving within increasingly complex dynamics. In such an environment, consistency and integrity matter even more. I believe INA will continue to be a responsible and trusted institution. We will continue strengthening capabilities, expanding our investment scope in a measured way, and deepening risk management and governance. **Growth must move in parallel with institutional maturity. To me, INA's future is about growing steadily without losing principle**."

Trust

"For INA, trust is not something we claim, it is something we care for. The capital entrusted to us is a responsibility that must be managed with prudence and accountability.

Trust is built through consistency, through decisions that uphold integrity, governance that is applied sincerely, disciplined risk management, and the way we treat every partner with respect. **Partnership for us is a long-term commitment for mutual good. When we safeguard what is entrusted to us wholeheartedly, impact follows. That is what we continue to strive for the nation**."

A strong legal foundation now underpins the continued building of trust...

INA has established a strong institutional foundation to function optimally as a **sovereign wealth fund.**

This foundation is anchored in a clear legal basis, disciplined governance, integrated risk management, and an organisational structure supported by top professionals and designed to ensure long-term sustainability.

The strength of this foundation is reflected, among others, in the attainment of Investment Grade-equivalent ratings from Fitch Ratings: AAA(idn) on the national scale and BBB on the international scale, with a Stable outlook (note: outlook revised to Negative as of 11 March 2026), aligned with the sovereign rating of the Government of Indonesia. These ratings are reviewed annually through comprehensive assessment, analysis, and in-depth discussions with senior management.

Five-Year Reflection of INA's Journey

In 2025, Fitch reaffirmed both INA's domestic and international ratings, underscoring its solid creditworthiness, strong institutional standing, and robust relationship with the Government of Indonesia.

Based on the applicable international rating criteria and methodology, INA is assessed as benefiting from strong support from the Government of the Republic of Indonesia. Consequently, INA's international credit rating is aligned with Indonesia's sovereign rating at BBB.

Today

"Over the past five years, we have not merely spoken about governance and investment discipline, we have built them through real transactions, through the ability to originate, structure, and close investments alongside global partners under market best practices. **That strength is reflected in repeatable, measurable processes: thorough due diligence, disciplined risk management, and governance frameworks that ensure every decision passes through clear and accountable mechanisms. To me, INA today is recognized not simply for its mandate, but for its track record. That track record is our most critical capability as we move into more complex phases**."

Today, what stands out about INA is not only about its mandate, but its ability to translate that mandate into consistent practice.

Eddy Porwanto
Member of Board of Directors
Chief Financial Officer

Tomorrow

"As INA enters its next phase, our responsibility is not merely to increase investment scale, but to ensure that greater complexity does not erode discipline.

INA operates today from a position of strength, a solid and liquid balance sheet, funding support that reflects confidence from domestic and international financial institutions, and growing global partnerships. **Yet to me, the true strength lies not only in financial capacity, but in the architecture of risk management and governance that we have built. The standards we apply, in risk oversight and cross-functional collaboration, serve as our anchor as we move into more sophisticated investment structures. Scale may increase, but discipline must not diminish. That is the principle we must uphold**."

Trust

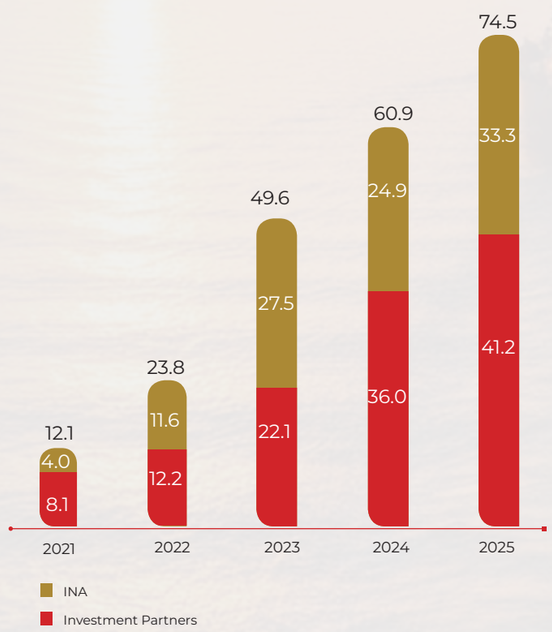

"At INA, trust is not an abstract value, it is the functional output of institutional architecture working every day. The two-tier structure separating oversight and execution ensures healthy balance.

At the management level, we apply the Three Lines Model, investment teams own the risk, Risk, Compliance, and Legal functions provide objective inputs, and Internal Audit safeguards process integrity. Through this structure, accountability becomes daily practice rather than aspiration. **Every decision emerges from cross-functional collaboration with clear responsibility. By maintaining this consistency, trust becomes a permanent feature of INA's institutional design**."

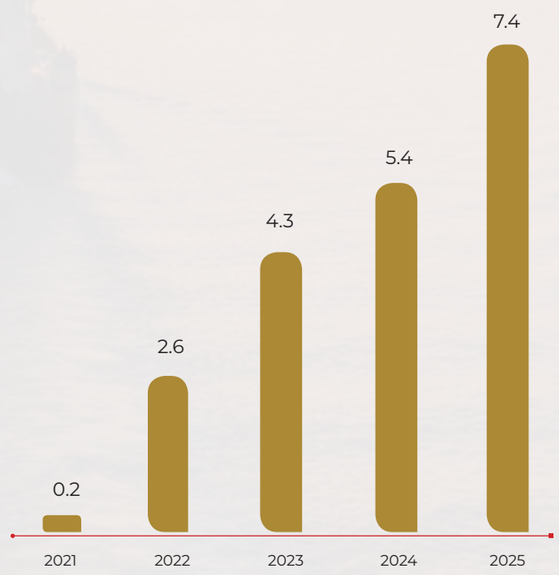

Five-Year Reflection of INA's Journey

Trust earned over time now sustains our performance growth...

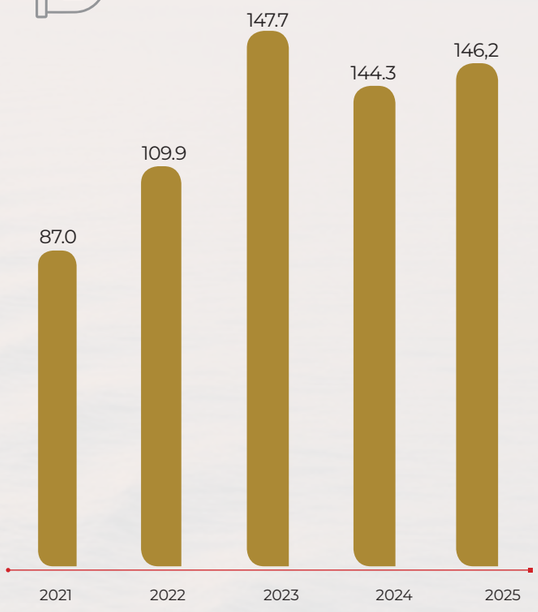

Total Investment
(Rp trillion)

Net Profit
(Rp trillion)

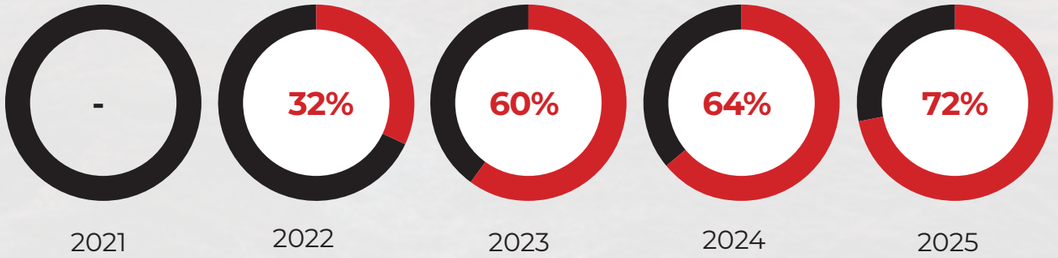

Asset Under Management
INA and Co-Investors (Rp trillion)

Governance, Sustainability, Resilience (GSR) Score

Used to assess the quality of an Institution's governance and sustainability practices across three core pillars: Governance, Sustainability, and Responsibility.

Today, if I were to describe INA in one phrase, I would choose 'intellectual honesty'. It is not merely a value; it is the foundation of how we think, how we debate, and how we make decisions.

Christopher Ganis
Member of Board of Directors
Chief Investment Officer

Today

In both difficult and favorable times, intellectual honesty enables us to stay close to the data, remain open to differing perspectives, and acknowledge reality as it is. From that foundation, transparency, integrity, and accountability emerge naturally. Strategically, we remain strong in direction from the top. But in execution, we are fundamentally bottom-up. **No investment decision is forced without honest intellectual conviction. This approach builds ownership, empowers teams, and fosters a level environment where accountability flows both ways, from junior to senior and from senior to junior**. That is what makes INA today a resilient and adaptive institution in a volatile environment."

Tomorrow

"Looking ahead, maintaining the status quo may seem sufficient. But the reality is that INA will continue to grow, adding new talent, expanding capabilities, and entering new journeys. That is where the real challenge lies.

Intellectual honesty must not become a slogan; it must remain a lived discipline. We need to build and identify cultural carriers, individuals who are not only technically strong but who truly understand the meaning of honest dialogue, of placing institutional interest above personal interest, and of operating as **one INA**. Culture cannot be institutionalised through emails or formal directives. It is shaped by example. **In difficult moments, leaders must step forward. In more stable conditions, leaders must step back and allow others to lead and win. That is how we polish the diamond that represents INA's future**."

Trust

"Trust has two dimensions for INA. First, as a trusted investment partner for Indonesia and for global investors. Second, as a public institution accountable to society.

We do not operate with our own capital; we execute a mandate entrusted through the Constitution. As such, communication is not about seeking recognition; it is a form of accountability. We must communicate our achievements, but we must also acknowledge our setbacks. Maintaining that balance is essential. Trust is built not only through performance, but through consistency between words and actions. **Ultimately, trust is not claimed, it is earned through integrity demonstrated every day**."

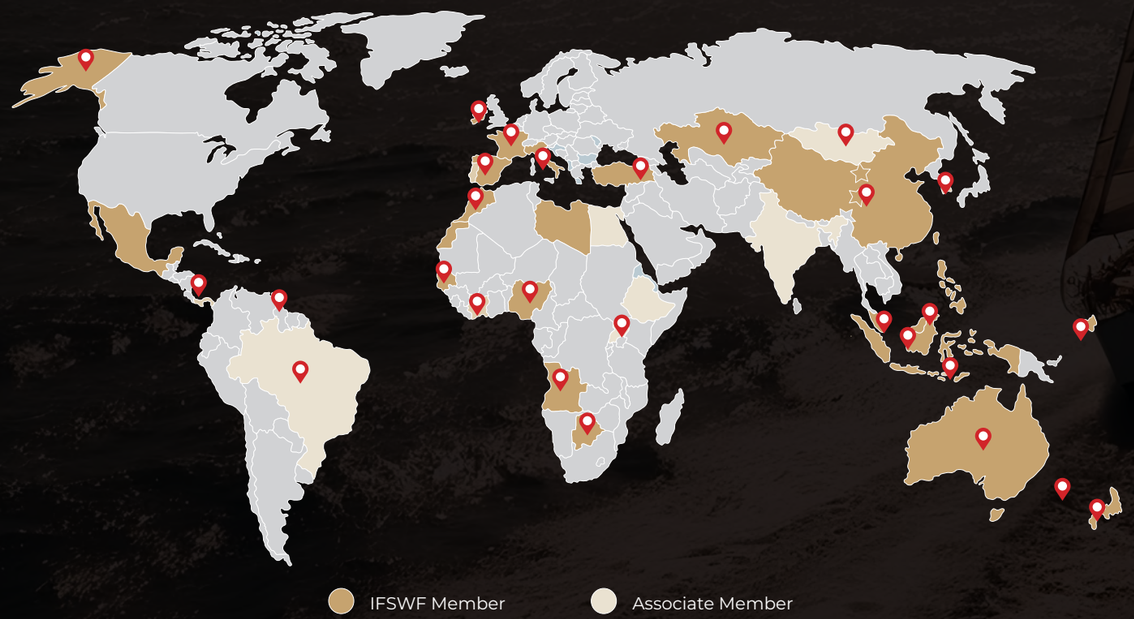

Trust reinforced over time now drives global recognition for our governance and investment...

International Forum of Sovereign Wealth Fund (IFSWF)

INA has been a **Full Member** of the **International Forum of Sovereign Wealth Funds** (IFSWF) since 20 September 2022.

IFSWF is a global voluntary organization of sovereign wealth funds committed to **promoting best practices in governance and investment management through the Santiago Principles.**

IFSWF has **45 members**, including leading global sovereign wealth funds such as **ADIA, CIC, GIC, Mubadala, KIA, Future Fund**, and others.

Five-Year Reflection of INA's Journey

Today, I see INA standing on foundations built with deliberate intent: a clear legal mandate, disciplined governance structures, and processes designed from the outset to international standards.

Andry Setiawan
Member of Board of Directors
Chief Investment Officer

Today

INA was born out of a real need, Indonesia's need for sustainable development and capital that does not merely arrive, but is committed to growing together. Amid fiscal constraints and leverage pressures across state entities, there was a need for an institution capable of credibly bridging national interests and global capital.

Yet even the strongest foundation only becomes meaningful when entrusted to the right people. To me, INA is proof that when professionalism, integrity, and high standards are upheld consistently, an institution born from necessity can grow into one that commands respect."

Tomorrow

"Looking ahead, the challenge is not only to continue what has worked, but to deepen the way we see risk and opportunity.

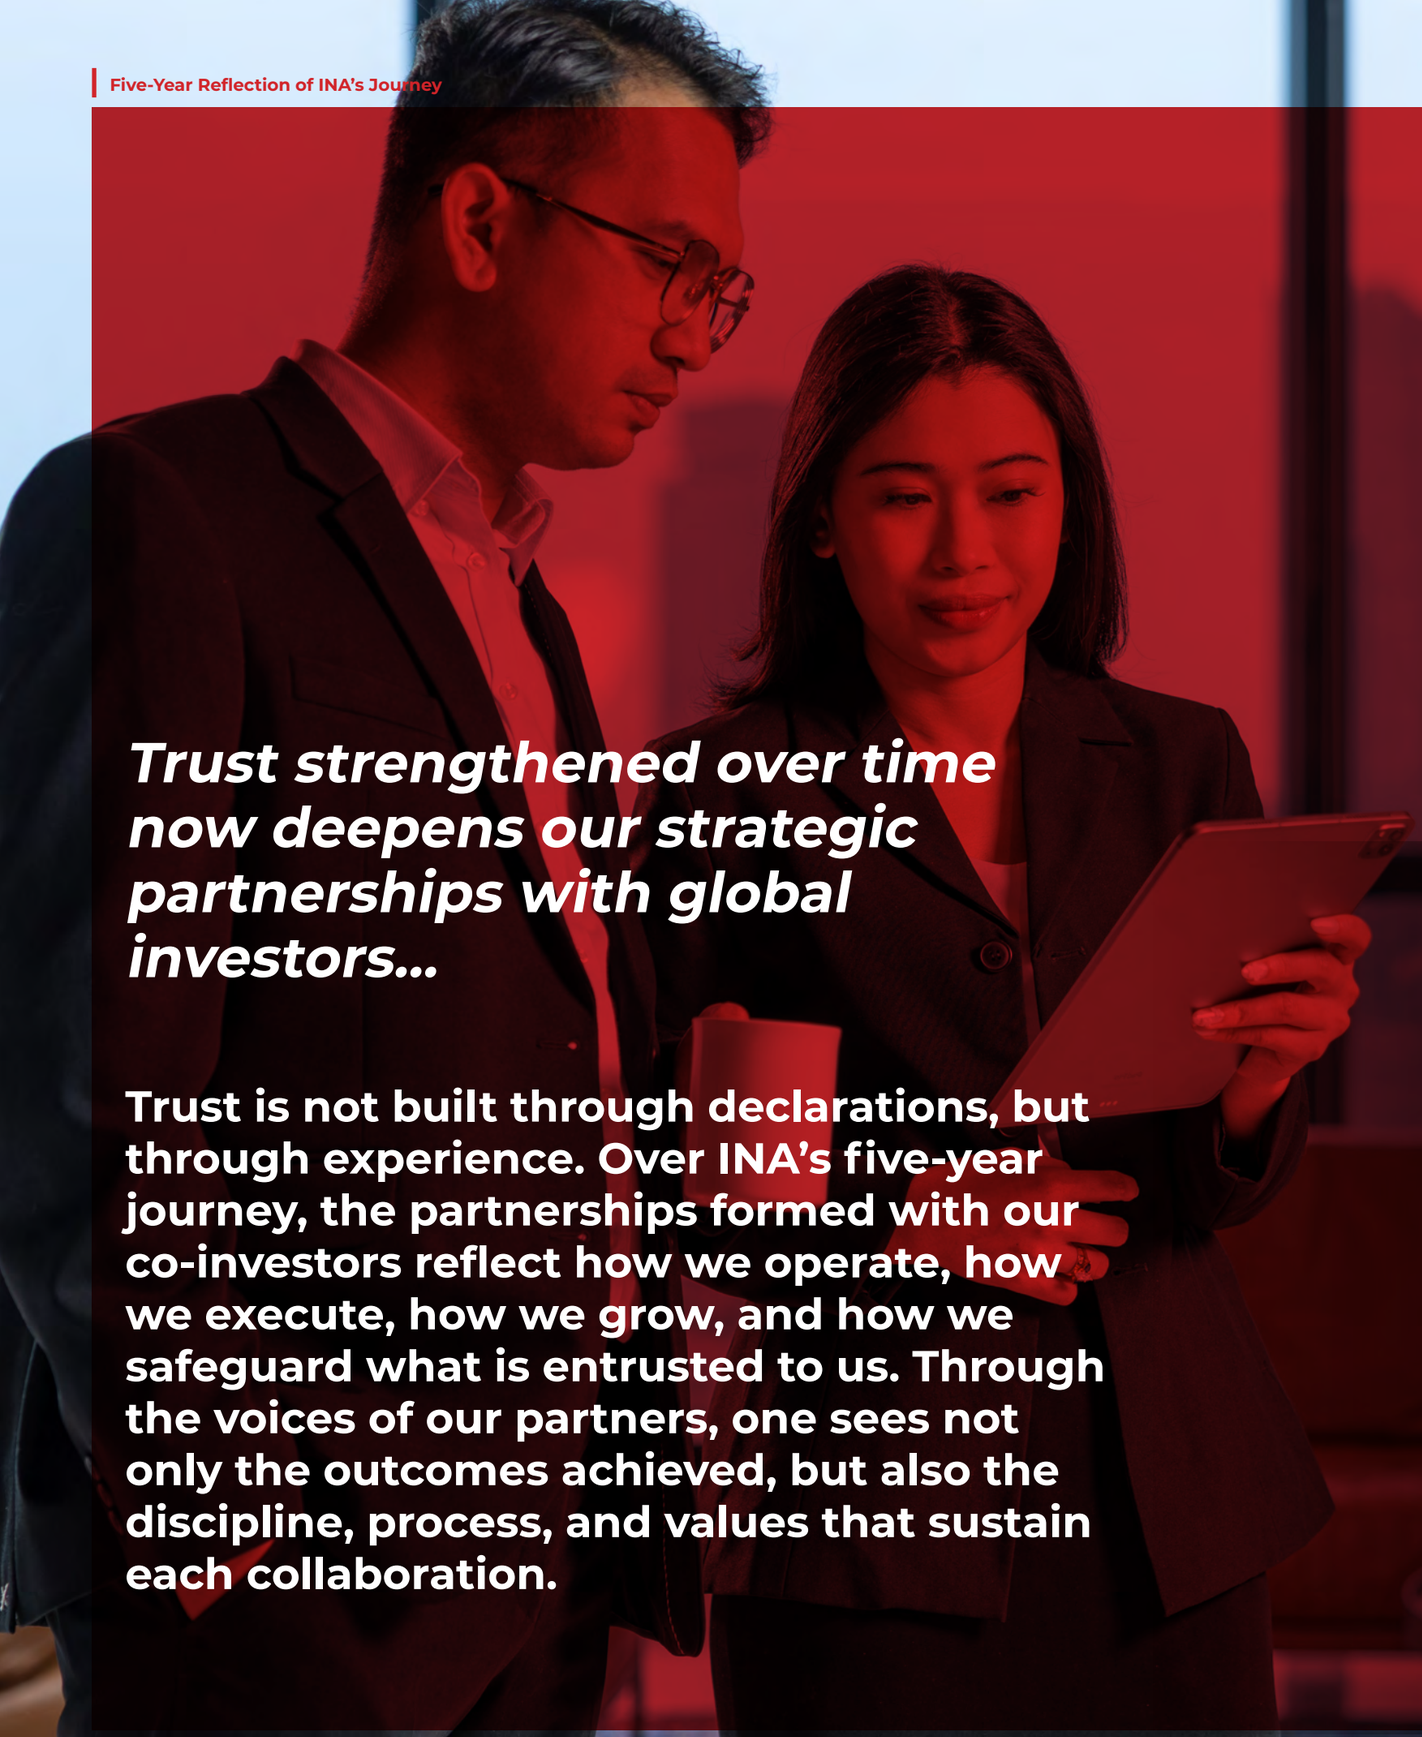

The world is shifting rapidly, geopolitics, policy directions, and market dynamics are moving almost simultaneously. As a relatively young institution, INA has the advantage of adapting without heavy legacy constraints. If the first five years were about building foundations and proving credibility, the next phase is about strengthening resilience. **We must move from being selective to being increasingly strategic. Diversification across asset classes, investment horizons, currencies, and geographies is not merely technical, it is a responsibility to ensure that INA's portfolio can endure across cycles. Resilience does not mean avoiding risk; it means understanding risk more deeply and managing it more deliberately**."

Trust

"At INA, trust is not built through narrative, but through discipline. Deal by deal, we demonstrate that our due diligence is rigorous, our structures are fair, and our decisions are never rushed.

To close one transaction, we may evaluate dozens of opportunities. A low closing rate reflects a high standard. INA often operates in the middle, bridging seller expectations and co-investor requirements under pari passu principles. **That is where creativity and perseverance are tested. Yet that is precisely where trust is formed. We do not pursue short-term victories; we cultivate long-term relationships. Trust is accumulated through consistency, and it only truly reveals itself over time**."

Five-Year Reflection of INA's Journey

Trust strengthened over time now deepens our strategic partnerships with global investors...

Trust is not built through declarations, but through experience. Over INA's five-year journey, the partnerships formed with our co-investors reflect how we operate, how we execute, how we grow, and how we safeguard what is entrusted to us. Through the voices of our partners, one sees not only the outcomes achieved, but also the discipline, process, and values that sustain each collaboration.

ADIA

We have a strong partnership with INA dating back to its very inception.

They are playing **a key role** in acting as a conduit and **trusted partner for international investors** like ourselves in investing in Indonesia.

In particular, their having **a highly qualified and independent team and governance structure** makes them very desirable partners for both us and other institutional investors.

> **"We look forward to continuing to deepen our partnership with them in the coming years and doing many more things together."**

DP WORLD

INA has consistently showcased its ability to achieve optimum outcomes across national interest objectives, while ensuring that relevant investments remain attractive and viable to foreign investors.

Helmed by **a team of intelligent and competent professionals**, INA has played a **critical role in reducing the complexity of investing within Indonesia and in facilitating positive dialogue among SOEs and foreign companies** like ours.

The result is a productive deal environment where deal progression is accelerated amid better stakeholder alignment. Without INA, **we would not have been able to access this deal or build a strategic partnership with Pelindo, which has since opened up further opportunities** for collaboration.

> **"We deeply appreciate our ongoing partnership with INA and look forward to working closely with them to further invest in key infrastructure across Indonesia."**

GRANITE ASIA

For Granite Asia, partnering with INA reflects an institution that operates with professionalism and structure across the investment lifecycle.

From initial engagement through negotiation and implementation, INA demonstrates disciplined governance, rigorous risk assessment, and clarity in aligning long-term interests. Decision-making is conducted systematically and transparently, providing confidence that each transaction is executed with consistency and accountability.

Beyond capital deployment, INA is regarded as a strategic partner focused on sustainable value creation. Strong internal coordination, open communication, and commitment to fair transaction structuring establish a solid foundation for collaboration.

> **For Granite Asia, partnership with INA is not defined by a single deal, but by long-term cooperation built on professionalism and mutual trust."**

LBM AP

For LBM AP, INA demonstrates consistent professionalism across every stage of the investment process, from due diligence and transaction structuring to post-investment oversight.

Thorough industry analysis, adherence to legal and governance standards, and disciplined risk management reflect a commitment to long-term stability. INA does not stop at capital deployment; it remains actively engaged in sustaining execution quality and investment performance.

Confidence in INA also stems from the way it builds collaboration. Open communication, effective multi-party coordination, and a balanced approach to risk management create a partnership environment grounded in mutual respect. As Indonesia's sovereign wealth fund, INA brings institutional legitimacy alongside strategic capability that supports sustainable growth.

> **For LBM AP, partnering with INA means working with an institution committed not only to outcomes, but to responsibility and continuity."**.

SKPLASMA

For SKPlasma, INA has been a professional and reliable partner from the planning stage through the execution of Project Plasma. Its structured governance, systematic approach, and transparent communication have established a solid foundation for collaboration.

INA not only acts as an investor, but remains actively engaged through periodic reviews and close coordination with all stakeholders, strengthening the plasma fractionation ecosystem while supporting national healthcare resilience priorities.

What distinguishes INA is its long-term orientation and balanced commitment to shared responsibility. Through hands-on engagement, disciplined governance, and consistent execution, INA reinforces sustainable trust.

> **For SKPlasma, INA is not only a capital provider, but a strategic partner that combines global standards with a deep understanding of Indonesia's development priorities to support the long-term sustainability of the plasma industry**."

ESR

For ESR, INA has demonstrated reliability and professionalism throughout the investment lifecycle. INA is regarded as a highly sophisticated and disciplined institutional LP, bringing a thoughtful and solution-oriented approach during structuring, particularly in engaging deeply on governance frameworks in joint ventures alongside other top-tier sovereign wealth funds.

INA manages expectations on downside protection and value alignment with clarity and discipline, and consistently addresses evolving circumstances with a fact-driven and pragmatic approach.

Confidence in INA is further grounded in its consistent approach to governance, risk management, and value creation, which aligns closely with ESR's own principles. Clear and well-defined decision-making processes, disciplined adherence to agreed frameworks, and predictability across operational and strategic levels underpin efficient collaboration. **This partnership is built on a track record developed over recent years and strong institutional trust, enabling larger and more strategic investments going forward.**

> **ESR also recognizes INA's distinctiveness in its dual mandate, delivering commercial outcomes while attracting long-term institutional capital into Indonesia, which makes INA a balanced and valuable long-term partner."**

DAYONE

INA's uniqueness lies in its ability to operate both as a commercially disciplined investor and as a strategic national partner.

INA combines long-term developmental objectives with rigorous investment standards, allowing it to mobilize capital in ways that create both commercial value and broader economic impact. **Its strong institutional credibility, access to senior stakeholders, and deep understanding of Indonesia's market dynamics give INA a differentiated ability to unlock opportunities that would otherwise be difficult to access.**

> **This blend of strategic mandate, market insight, and partnership-oriented approach makes INA a uniquely positioned catalyst in Indonesia's investment landscape."**

Reflections from the Management

Message from the Chairman of the Supervisory Board

Through consistent oversight and constructive checks and balances, the Supervisory Board ensures that INA continues to grow in line with its mandate, with institutional credibility built upon integrity, professionalism, and robust systems.

Purbaya Yudhi Sadewa
Chairman of Supervisory Board
Ex-officio Member of Supervisory Board

Dear Esteemed Stakeholders,

With gratitude to Almighty God, the Supervisory Board of Indonesia Investment Authority (INA) hereby presents its annual report on INA's performance achievements and institutional developments throughout 2025. This year marks the fifth year of INA's operational journey since its establishment as Indonesia's sovereign wealth fund under the Job Creation Law. Over this period, INA has continued to strengthen its institutional foundations, governance architecture, and its role as a strategic investment partner in advancing Indonesia's sustainable economic development.

In line with the 2025 theme, "The Year of Dynamic and Resilient Growth," INA responded to evolving dynamics through an adaptive, prudent, and disciplined approach to safeguard performance stability while enhancing the value of its investment portfolio. The year 2025 was marked by a range of developments shaping the global investment landscape, including geopolitical tensions, shifts in global monetary policy direction, and economic transformation that has heightened demand for strategic commodities. At the domestic level, policy developments, including the establishment of the Daya Anagata Nusantara Investment Management Agency (BPI Danantara), have further enriched Indonesia's investment ecosystem.

In navigating these dynamics, INA views change as an opportunity to further strengthen its strategic role in attracting long-term investment, expanding partnerships with global investors, and optimizing the management of its investment portfolio with a sustainability-oriented approach. Through a continued focus on priority sectors and the development of opportunistic sectors, investment diversification across asset classes, and portfolio rebalancing to enhance yield optimization, INA remains committed to sustaining progressive and resilient growth while creating long-term economic value for Indonesia.

Economic and Investment Conditions and Indonesia's Business Outlook in 2025

Amid global macroeconomic dynamics shaped by geopolitical conflicts, shifting capital flows, and volatility in international financial markets, Indonesia's economy throughout 2025 continued to demonstrate solid resilience. Sustained domestic economic stability provided a strong foundation for continued and sustainable growth. Based on data from Statistics Indonesia (BPS), Indonesia's economy grew by 5.39% (yoy) in the fourth quarter of 2025, bringing full-year economic growth to 5.11%. This performance was supported by strong domestic demand, increasing investment, optimal government spending, and stable export performance.

Investment also recorded a positive performance. Gross Fixed Capital Formation (GFCF) grew by 5.09% year-on-year throughout 2025. This growth was primarily driven by increased investment in machinery and equipment, which grew by 17.99%, reflecting strengthening industrial activity and capacity expansion. Investment in vehicles also grew by 5.16%, in line with higher import activity supporting the logistics sector. Macroeconomic stability, coupled with coordinated fiscal and monetary policies, enhanced investor confidence, as reflected in the realization of Foreign Direct Investment (FDI) and Domestic Direct Investment (DDI), which grew by 12.66% in 2025.

In line with these developments, total national investment realization for January–December 2025 reached Rp1,931.2 trillion, equivalent to 101.3% of the Presidential target of Rp1,905.6 trillion, and grew by 12.7% year-on-year. This investment absorbed approximately 2.71 million workers, underscoring the resilience of Indonesia's investment climate amid global uncertainty. DDI accounted for Rp1,030.3 trillion or 53.4% of total investment, while FDI reached Rp900.9 trillion or 46.6%. Investment outside Java amounted to Rp991.2 trillion or 51.3%, meanwhile, investment in Java stood at Rp940 trillion or 48.7%. By sector, the largest investment was recorded in the basic metals and derivatives industry sector at Rp262.0 trillion, followed by transportation, warehousing, and telecommunications at Rp211 trillion, and the mining sector at Rp199.6 trillion. Singapore remained the largest investor with a total investment value of USD17.4 billion, followed by Hong Kong, the People's Republic of China, Malaysia, and Japan.

Investment strengthening was also driven by acceleration of natural resource downstreaming agenda. Throughout 2025, downstream investment realization reached Rp584.1 trillion, grew by 43.3% year-on-year with 30.2% contribution to total national investment realization. This investment was dominated by mineral sector at Rp373.1 trillion, followed by plantations and forestry at Rp144.5 trillion, oil and gas at Rp60 trillion, and the fisheries and marine sector at Rp6.4 trillion.

At the same time, macroeconomic stability remained well maintained, amid uncertainty in global financial markets. To maintain macroeconomic stability and support domestic growth momentum, Bank Indonesia implemented an adaptive monetary policy, including lowering the benchmark interest rate by 100 basis points, from 5.75% at the beginning of the year to 4.75% by year-end.

Investment Strategy Focus

Indonesia's economic resilience, reflected in 5.11% growth in 2025, provided INA with the capacity to continue carrying out its dual mandate, with an increasing emphasis on growth quality, portfolio selectivity, and the strengthening of institutional resilience.

Entering its fifth year of operations, INA continues to strengthen its role as a sovereign wealth fund that bridges domestic financing needs with global capital investment interests. The Supervisory Board observes that over this period, INA has successfully established its reputation as a credible investment institution at both the national and international levels. This is reflected in the consistency of investment realization, the successful development of co-investment partnerships with global investors, the implementation of strong governance practices, and solid financial performance. These achievements provide a strong foundation for INA to sustain its growth trajectory while further enhancing its contribution to Indonesia's national economic development.

In line with this strategic direction, in 2025 INA focused its investment strategy on building a strong, balanced, and sustainable portfolio, while maintaining alignment between its national strategic mandate and long-term economic value creation. The investment strategy is implemented through three key approaches. First, continuing investments in priority sectors, namely infrastructure, transportation and logistics, green energy and energy transition, digital and digital infrastructure, as well as healthcare services, while expanding into the advanced materials sector and exploring opportunities in other opportunistic sectors.

Second, INA undertakes portfolio rebalancing based on its strategic asset allocation to achieve more optimal and accelerated returns. This strategy is realized by increasing the allocation to asset classes with higher and faster yield potential, such as private equity, real estate, and hybrid capital solutions, thereby strengthening the portfolio structure while supporting income sustainability.

Third, INA expands diversification through indirect investments, both as a Limited Partner (LP) and Co-General Partner (Co-GP), to enhance access to global investment pipelines, increase co-investment multiplier opportunities, as well as strengthen transfer of knowledge and expertise from strategic partners.

In its implementation, INA actively develops its investment pipeline, expands global partnerships, and increases exposure to assets with strong commercial characteristics. INA also optimizes pipeline opportunities from previous years while enhancing the value of existing high-performing portfolio investments to strengthen investment scale and maximize value creation.

Asset class diversification continues to be strengthened to build a more resilient portfolio. While INA's portfolio in its early stages was predominantly concentrated in infrastructure assets, it has gradually evolved across a broader range of asset classes. This diversification not only expands investment exposure but is also directed toward generating recurring income with a return profile that is more timely, optimal, and sustainable.

This strategic approach is reflected in sustained investment momentum and strengthened institutional performance throughout 2025. This is evident, among others, from high level of investment deployment realization, increased transaction frequency, and a more diversified portfolio structure. Solid financial performance with continued preservation of INA's reputation and credibility among both domestic and global investors, further reinforces its position as a professional and trusted investment partner.

Supervisory Board's View on the Board of Directors' Performance and INA's 2025 Achievements, as well as Its Tangible Economic Impact

Throughout 2025, the Supervisory Board observes that the Board of Directors has carried out INA's management mandate in a disciplined, adaptive, and accountable manner amid heightened global and domestic economic dynamics. INA's performance demonstrates that the investment strategy, governance practices, and risk management framework established since its inception have been effectively implemented and continue to mature. This is reflected in the achievement of investment deployment, portfolio management, financial performance, as well as its tangible contributions to the national economy.

On investment, INA deployed Rp10.5 trillion in 2025, marking its highest annual deployment since inception (excluding the one-off Trans Sumatra Toll Road transaction). Cumulatively, total investment deployment (prior to divestment) reached Rp46.9 trillion over the 2021–2025 period. INA also secured Rp5.3 trillion in co-investment from partners in 2025, bringing total cumulative to Rp41.2 trillion. As a result, total value of INA's investments with its partners (post-divestment) reached Rp74.5 trillion, reflecting a co-investment multiplier of 1.2 times and underscoring a selective, high-quality, and impact-driven approach in building long-term strategic partnerships. INA's average annual investment deployment of USD610.7 million was also recorded at 2.54 times higher than the average deployment by private funds in Indonesia.

On activity, INA recorded 11 closing deals and 3 divestments in 2025, marking the highest transaction frequency since its inception. Proceeds from divestments amounted to Rp923.1 billion, bringing total cumulative to Rp13.6 trillion over the 2021–2025 period. The Supervisory Board views these achievements as a reflection of INA's ability to sustain transaction momentum, while maintaining discipline in managing full investment cycle, from deployment through to exit. This also demonstrates INA's continued commitment to upholding independence and professionalism, as well as its adherence to commercial principles in investing alongside its partners.

From an asset allocation standpoint, 2025 marked a notable strategic shift, as INA successfully attracted investment partners into strategic domestic non-SOE assets. This underscores INA's progress in diversifying its investment base, from an initial reliance on captive SOE assets to privately originated deals. This transition also reinforces INA's strategic repositioning and enhances its synergy with Badan Pengelola Investasi Daya Anagata Nusantara (BPI Danantara) in its role overseeing SOE assets and investments.

In portfolio management, the Supervisory Board observes that the Asset Under Management composition has become increasingly aligned with the strategic asset allocation. In 2025, the portfolio comprised 62.3% infrastructure, 18.4% private equity, 12.5% hybrid capital solutions, 4.1% funds, and 1.4% each in real estate and public equity. Compared to the previous year, share of infrastructure declined, while allocations to private equity and hybrid capital solutions increased, reflecting the implementation of a rebalancing strategy to achieve more optimal yields.

By sector, INA's investments have reached across six key sectors, with the largest allocations in Infrastructure, Transportation & Logistics (48.1%) and Digital & Digital Infrastructure (25.9%), followed by Green Energy & Energy Transition (7.0%), Healthcare (7.1%), Advanced Materials (7.6%), and other sectors. This diversification reflects a balanced approach between national strategic mandate and commercial return objectives, including through the strengthening of indirect investment strategies to broaden investment pipeline and mitigate risks.

The Supervisory Board also emphasizes on strengthening operational alpha and fundamental performance of portfolio companies. Strengthened monitoring and governance at the portfolio company level are reflected in the Supervisory Board's directive to incorporate underlying asset performance into INA's key performance

indicators. Overall, INA's portfolio performance in 2025 was positive, as evidenced by the highest mark-to-market valuation of its investments since inception. Notwithstanding this achievement, certain investment assets experienced valuation declines due to various factors. The Supervisory Board continues to encourage the Board of Directors to rigorously monitor investment performance, drive the implementation of operational alpha at the asset level, and regularly report progress to the Supervisory Board. Any investment losses are addressed comprehensively within the established loss tolerance framework in accordance with applicable regulations.

On investment performance, INA recorded a return of 8.1% net of tax in 2025, excluding in-kind shares. This level of return exceeded both risk-free instruments and long-term domestic equity market benchmarks. The Supervisory Board views this achievement as a reflection of careful, prudent, and well-diversified portfolio management amid dynamic market conditions.

INA's financial performance also delivered highly satisfactory results. Total revenue reached Rp8.5 trillion, or 133% of target, an increase of 43.0% compared to the previous year. Net profit amounted to Rp7.4 trillion, or 160.9% of target, rose by 37.3% compared to 2024. Revenue was supported by dividends, interest income, and mark-to-market gains, while operating costs remained efficiently managed at Rp1.03 trillion, or approximately 60.1% of budget. This achievement represents the highest performance since INA's establishment.

On financial position, INA's total assets reached Rp111.0 trillion, with equity of Rp108.2 trillion, an increase of 44.3% compared to its initial capital. Liabilities stood at Rp2.8 trillion, with a debt-to-equity ratio of 0.02 times, well below established threshold. Total Assets Under Management, with co-investment partners, reached Rp146.2 trillion. The Supervisory Board continues to note that significant portion of in-kind shares requires close monitoring, given their sensitivity to INA's performance and exposure to external market volatility.

INA has effectively managed its investment portfolio. Overall, INA has optimized the financial and operational performance of its investment assets to preserve value and achieve expected returns. INA continues to monitor well-implementation of operational alpha, while undertaking continuous improvement across selected investment assets to realize the enhancement of long-term value creation and sustainable development.

On global perspective, INA has demonstrated good performance compared to several leading global SWFs. As a relatively new SWF, INA's reputation and credibility have gained recognition from its partners. This achievement is noteworthy, given INA's dual mandate, which presents greater challenges compared to global SWFs that operate across a broader range of highly commercial sectors. This underscores INA's ability to successfully carried out its dual development and commercial mandate, while delivering optimal performance compared to several other global SWFs.

The Supervisory Board also views that INA's investment achievements have delivered tangible contributions to the national economy. As of the end of 2025, INA has successfully mobilized investment commitments of more than Rp400 trillion from global and domestic partners. These investments have been directed toward strategic sectors that generate multiplier effects, including capital inflows, technology transfer, job creation, income enhancement, as well as asset recycling to help alleviate fiscal pressures.

In 2025, INA with the Ministry of Finance, initiated the piloting of socio-economic impact measurement for investments in the toll road and port sectors. The independent study results indicate significant contributions to GDP, job creation, tax revenues, as well as improvements in logistics cost and time efficiency. The Supervisory Board considers this approach important to be further developed to ensure that INA's contributions can be measured in a more comprehensive manner.

Contributions to national infrastructure development have also become increasingly evident, with approximately 62% of total portfolio allocated to this sector. Investments span a range of strategic assets, such as toll roads, ports, telecommunications infrastructure, energy, data centers, as well as downstream mineral industries, thereby generating broader multiplier effects on national economy. Indirect investment approaches through funds also provide flexibility, access to global infrastructure investment pipelines, as well as potentials to derive insights from strategic partners to enhance value creation in infrastructure sector.

In addition to investment, portfolio, and financial performance, the Supervisory Board notes that the Board of Directors has successfully maintained INA's reputation and credibility as a professional, reliable, and trusted investment partner. This is reflected in increasing confidence of strategic investors, as well as expansion of global partnerships.

Based on these overall indicators, the Supervisory Board considers that the Board of Directors has managed INA in an effective, accountable, and results-oriented manner throughout 2025. Amid evolving dynamics, INA has remained able to deliver solid growth, further strengthen its portfolio, and generate tangible contributions to the national economy, while sustaining its credibility as a trusted sovereign wealth fund of Indonesia.

Key Challenges and Mitigation Efforts

Throughout 2025, the Supervisory Board oversaw INA's performance amid complex global and domestic economic dynamics. From an investment perspective, challenges evolve from geopolitical conditions and the consolidation of government policies. From a project perspective, INA encountered challenges related to the complexity of transaction structures, differing interests between asset owners and investors, policy dynamics affecting the pace of investment realization, as well as external factors beyond INA's control across all phases of investment cycle. From an organizational perspective, the significant leadership changes within INA during 2025 constituted an important development requiring close attention.

In response to these developments, INA has undertaken adjustments to its strategic positioning while remaining firmly aligned with its founding mandate, in which to support national development while delivering optimal returns. This has been implemented through an investment strategy focused on building a balanced and sustainable portfolio, while capturing opportunities in strategic sectors and the ongoing relocation of global supply chains.

The Supervisory Board acts as a strategic partner in strengthening risk management and maintaining investment discipline, while encouraging the exploration of opportunities in sectors with strong commercial characteristics to sustain growth momentum. Synergies with BPI Danantara, regulators, and other stakeholders have also continued to be strengthened to support the creation of national economic value.

The significant leadership changes throughout 2025 also presented operational challenges for INA. Supported by well-established business continuity management and systems, INA was able to navigate these dynamics effectively, as reflected in its satisfactory performance achievements in 2025.

With an adaptive approach and underpinned by strong governance, increasingly intensive oversight and communication between the Supervisory Board and management, strengthened risk management and the three lines model, as well as the active role of Committees, the Supervisory Board believes that INA is well positioned to manage challenges while capturing opportunities to further strengthen its role as an investment catalyst for sustainable national economic development.

Role of the Supervisory Board in the Implementation of Governance, ESG, and Risk Management in 2025

For a long-term investment institution such as INA, credibility is not solely determined by investment performance, but also by consistency in upholding governance discipline, the integrity of decision-making processes, and the ability to manage

risks in a measured manner. The Supervisory Board views strong governance as a fundamental foundation for institutional sustainability, as well as a prerequisite for building trust among investors and stakeholders. As such, throughout 2025, the Supervisory Board has continued to actively perform its oversight function to ensure that all INA's operational and investment activities are carried out in a transparent, accountable, and well-aligned manner with the institution's long-term mandate.

Within this framework, the Supervisory Board ensures that INA's management consistently adheres to international governance standards applicable to sovereign wealth funds. As a full member of the International Forum of Sovereign Wealth Funds (IFSWF), INA is guided by the Santiago Principles, which emphasize independence, transparency, accountability, and prudent risk management. In 2025, INA conducted a reassessment of its compliance with these principles, which has been accepted by the IFSWF, demonstrating continued alignment with global best practices.

Throughout 2025, the Supervisory Board assesses that the Board of Directors has undertaken various important measures to strengthen INA's governance and risk management framework in line with increasing scale of its investment activities. Refinements to internal policies were carried out through a series of Board of Directors Regulations (PDD), covering the strengthening of enterprise risk management, implementation of portfolio stress testing at both institutional and portfolio company levels, as well as refinements to treasury risk management policies in response to market volatility dynamics. All policy formulation processes were conducted in consultation with the Supervisory Board to ensure alignment with INA's institutional mandate and global best practices.

In addition to strengthening management-level, the Supervisory Board has also refined the governance framework at the Board level by updating the Supervisory Board Regulations (PDP). These refinements form part of a continuous improvement approach in addressing issues arising from operational practices. The PDP refinements are also intended to accelerate policy responsiveness to evolving dynamics, while remaining firmly committed to prudent governance. Based on the evaluation conducted, several refinements have been identified, among others strengthening the role of the Supervisory Board in deliberating strategic and operational matters, refining the process for selection and appointment of members of the Board of Directors, and affirmation of policy consultation framework.

The refinements also include expansion of the Ethics Committee's scope of duties in providing advice on legal and compliance matters, adjustments to provisions on financial instrument transactions in line with benchmark best practices, preparation of interim reports for Supervisory Board members concluding their term of office, as well as formalization of procedures to develop Supervisory Board regulations and resolutions. Simplification of business processes related to administrative and remuneration aspects has also been undertaken as part of efforts to accelerate the Supervisory Board's policy responsiveness to evolving challenges and dynamics. All refinements have been stipulated under Supervisory Board Regulation No. 05 of 2025, which became effective on 5 September 2025.

In carrying out its oversight function, the Supervisory Board is supported by 3 (three) committees, namely the Audit Committee, Ethics Committee, and Remuneration and HR Committee, facilitated by the Supervisory Board Secretariat. Throughout 2025, the Audit Committee convened 15 meetings focusing on the oversight of financial reporting, effectiveness of internal control systems, and implementation of risk management. The Ethics Committee held 12 meetings to monitor compliance with the code of conduct and to ensure that potential conflicts of interest are adequately managed. Meanwhile, the Remuneration and HR Committee conducted 26 meetings, which, among others, discussed performance evaluations, formulation of key performance indicators, market-benchmarking remuneration review, as well as support for the selection process of members of the Board of Directors.

The Supervisory Board also monitors the implementation of risk management comprehensively through the three lines model framework. Under this structure, business units act as the first line, responsible for managing risks, while the Risk Management Division and Compliance Division perform oversight functions as the second line, and the Internal Audit Division serves as the third line through a risk-based audit approach. The application of Risk Control Self-Assessment (RCSA) further strengthens the monitoring of portfolio risks and compliance in a more structured and continuous manner.

Based on the results of both internal and independent audits on compliance with prevailing laws and regulations as well as internal controls, no material weaknesses were identified in INA's internal control system. The independent auditor also stated that INA has complied with applicable legal, regulatory, and contractual requirements in all material respects, with no issues identified in relation to its internal controls. In addition, INA's financial statements received an Unqualified Opinion, indicating that they have been fairly presented in accordance with applicable international accounting standards.

The strengthening of governance and risk management discipline has further enhanced INA's reputation and credibility at both the domestic and international levels. This is reflected in the independent assessment by Global SWF, which assigned a governance, sustainability, and resilience (GSR) score of 72%, surpassing the global sovereign wealth fund average of 53%. External recognition is also reinforced by credit ratings of BBB internationally and AAA nationally, both with a stable outlook from Fitch Ratings, as well as 100% neutral-to-positive media exposure with no negative coverage. INA has also actively participated in various domestic and international forums as part of strengthening its institutional positioning at the global level.

On sustainability aspect, the Supervisory Board commends that the Board of Directors has further strengthened the integration of environmental, social, and governance (ESG) principles into both the investment decision-making process and portfolio monitoring. Throughout 2025, ESG assessments have been incorporated into investment decisions, while the ESG roadmap has begun to be implemented across several INA investments. The ESG Division has also conducted periodic monitoring of portfolio companies, with plans to implement more structured ESG key performance indicators going forward.

In 2025, for the first time, INA also conducted a measurement of socio-economic impact of selected investments in the toll road and port sectors. The independent study indicates that these investments have delivered significant contributions to the national economy, including enhanced connectivity, contributions to GDP growth, job creation, and increased state revenues. The Supervisory Board views the development of this impact measurement framework as an important step to ensure that INA's investments not only generate commercial returns, but also deliver broader economic and social benefits for Indonesia.

Ultimately, the Supervisory Board views that the ability to uphold governance discipline, integrity of internal control systems, and consistently implement sustainability principles constitutes the fundamental foundation for INA's long-term sustainability as Indonesia's sovereign wealth fund. Through continuous strengthening, INA is expected to carry out its investment mandate in a prudent, professional, and an orientation toward long-term value creation for national economic development.

Supervisory Board's View on the 2026 Outlook

Entering 2026, the Supervisory Board views that INA will continue to operate in an environment that demands agility, discipline, and institutional resilience. Amid a still volatile global landscape, INA needs to maintain a balance between prudent investment and the ability to capture emerging strategic opportunities. With an increasingly mature governance foundation, a continuously expanding portfolio, and sustained investor confidence, INA is well equipped to continue its role as a long-term investment catalyst for national development.

The Supervisory Board notes that 2026 will remain marked by global economic uncertainty, volatility in international financial markets, geopolitical tensions, and ongoing fragmentation of global trade. Within this context, the Government and various international institutions continue to view Indonesia as having a positive growth outlook. Macro assumptions targeting growth of approximately 5.4%, indicates that national economic fundamentals remain strong.

Going forward, the quality of Indonesia's growth will be largely determined by its ability to sustain investment momentum, strengthen domestic consumption, and national productivity. The Supervisory Board views that strengthening downstream, advancing clean energy-based industries, debottlenecking, and improving the ease of doing business will remain critical factors in supporting inclusive and sustainable economic growth. External challenges will need to be carefully anticipated; however, with strong policy coordination and sustained macroeconomic stability, Indonesia continues to have the capacity to further enhance its competitiveness and attract long-term investment.

In navigating these conditions, INA needs to continue developing adaptive and innovative investment schemes to respond accurately to evolving global dynamics. The Supervisory Board assesses that INA has responsively formulated its 2026 strategy by comprehensively taking into account existing developments. From an investment perspective, INA continues to review the relevance of its priority sectors in alignment with government programs, including maintaining its focus on healthcare, transportation and logistics, green energy and natural capital, digital and AI, as well as expanding into advanced materials and manufacturing. At the same time, the portfolio rebalancing strategy will continue to be pursued to achieve more stable, solid, and sustainable growth by increasing allocations to private equity, hybrid capital solutions, real estate, and funds. Indirect investment strategies through LP+ and co-GP schemes are also considered to remain relevant, provided that, in aggregate, they deliver positive impacts on the national economy, expand access to technology, support capital deployment, and create opportunities for higher-quality direct deals. Geographically, in 2026 INA will begin to explore investment opportunities in overseas assets that can generate benefits for Indonesia (Indonesian nexus). Overseas investments encompass both direct placements and indirect investments through managed funds. This reflects INA's proactive and adaptive approach in capturing opportunities amid global and domestic dynamics. As its investment portfolio continues to expand, INA's financial foundation is further strengthened through effective and efficient funding and treasury management strategies. In this context, enhancing the portfolio's recurring income profile becomes increasingly important to enable INA to sustain stable and long-term growth.

The Supervisory Board also views that INA's outlook for 2026 will be determined by its ability to strengthen its portfolio structure and maintain investor confidence. Geopolitical uncertainty, potential capital outflows, and shifts in global investor risk appetite need to be addressed through attractive investment structures, disciplined governance, and a continued solid financial position. With the reputation and portfolio established over its first five years, INA has a strong foundation to sustain and further enhance the confidence of global investment partners, while capitalizing on opportunities arising from shifts in international capital flows.

The Supervisory Board notes that INA's key challenges going forward lie not only in external conditions, but also in the need to continuously maintain synergy between its national development mandate and commercially attractive return targets. The identification of potential assets that meet investor appetite, the high level of dynamics in transaction negotiations, as well as the predominantly long-term nature of INA's portfolio represent challenges that must be carefully managed. As such, the Supervisory Board encourages the Board of Directors to adopt a more holistic approach across all stages of investment cycle, from pipeline sourcing, deal execution, value creation, to exit strategy. The optimization of pipeline carry-over, potential follow-on investments (expansion) from existing investments, as well as exploration of new pipelines, particularly from private assets and more commercial and less regulated sectors, should also continue to be strengthened.

In navigating 2026, the Supervisory Board also emphasizes the importance of maintaining governance discipline and prudence in every strategic decision. Investment decision-making must continue to adhere to established risk appetite, supported by comprehensive due diligence, rigorous assumption testing, and active portfolio monitoring through early warning systems and stress testing. The Supervisory Board continues to emphasize the importance of cultivating risk awareness across all INA personnel at every stage of investment process. In addition, the management of institutional relationships with key stakeholders needs to be continuously strengthened to support transaction execution, enhance portfolio value, and reinforce INA's reputation. In this regard, the Key Performance Indicators (KPIs), jointly discussed and approved by the Supervisory Board, serve as an important instrument to maintain the Board of Directors' focus on direction, priorities, and key initiatives throughout the year.

Equipped with a more refined strategy, growing experience since its establishment, and strong commitment from the Board of Directors and all stakeholders, the Supervisory Board believes that INA has sufficient capacity to face 2026 with measured optimism. The Supervisory Board views that, should the strategies set out in the 2026 RKAT be implemented in a disciplined, adaptive, and consistent manner, INA will be able to maintain its operational and financial performance, while continuing to deliver meaningful contributions to Indonesia's sustainable economic development.

INA's Contribution Towards Indonesia Emas 2045

The Supervisory Board views that INA's role as a sovereign wealth fund is strategic in supporting Indonesia's long-term development agenda towards Indonesia Emas 2045. Through its mandate to manage and optimize investments in national strategic assets, INA is expected to act as a catalyst in accelerating sustainable economic growth, enhancing national competitiveness, and attracting high-quality foreign direct investment. INA's presence not only contributes to capital mobilization, but also in facilitating technology transfer, enhancing domestic industrial capacity, and reinforcing a more integrated and long-term oriented investment ecosystem.

Since its establishment in 2021 up to 2025, INA has actively contributed across various strategic sectors that form the foundation of Indonesia's economic transformation. These contributions were carried out among others through investments aimed at expanding access to healthcare and education services, thereby enhancing the quality of human resources and national resilience. In addition, INA has also taken a role in strengthening both traditional and digital infrastructure development, which serve as the backbone of national connectivity and drivers of economic growth across sectors. Investments in transportation, logistics, and digital infrastructure have also supported improvements in distribution efficiency, regional economic integration, and Indonesia's competitiveness within global value chains.

INA also takes a role in activating new economic drivers through investments in green energy, energy transition, and the development of strategic minerals that support future industrial ecosystems. The development of these sectors not only contributes to the downstreaming of natural resources, but also strengthens Indonesia's position within global supply chains for higher value-added industries. In addition, through investments in digital and digital infrastructure sector, INA participates in expanding public access to technology-based economic services, while also promoting broader financial inclusion for both communities and businesses.

On the other hand, INA also supports the development of manufacturing and innovation sectors through investments that enhance production capacity, strengthen industrial ecosystems, and advance research and development. This approach is expected to accelerate economic transformation toward higher value-added sectors and improve the competitiveness of national industries in global market. In line with sustainable development

agenda, INA also continues to promote investments in renewable energy infrastructure and sustainability-oriented projects to address future energy needs that are cleaner and more efficient.

These contributions directly support the achievement of key targets of the National Long-Term Development Plan (RPJPN) 2045, among others by increasing Indonesia's per capita income to levels comparable with advanced economies, significantly reducing inequality and poverty levels, strengthening the competitiveness of human resources, as well as enhancing Indonesia's position in global leadership. At the same time, INA's investments are also expected to contribute to efforts to reduce greenhouse gas emission intensity through the development of clean energy sectors and implementation of sustainable investment practices.

In carrying out this mandate, INA manages long-term investments through an innovative and collaborative approach by building partnerships with global investors to attract long-term oriented foreign capital. All INA investments are also undertaken with due consideration to ESG principles, ensuring that each investment not only delivers optimal financial returns but also generates positive impacts for society and the environment. INA's investment sectors, which span six core sectors as well as other opportunistic sectors, are periodically reviewed and aligned with national development priorities.

INA continues to strengthen synergies and foster mutually beneficial relationships with both domestic and global investment partners. To optimize its impact on the national economy, INA, together with BPI Danantara, continues to collaborate in assessing joint investment opportunities, mobilizing international capital flows into domestic assets, and promoting best-in-class governance, including talent mobility, to strengthen the national investment ecosystem. These efforts have already demonstrated tangible results through the successful joint investment by INA and Danantara in a strategic domestic asset in 2026.

With a long-term oriented investment strategy, strong global collaboration, as well as professional and disciplined management, the Supervisory Board believes that INA plays an important role as one of the key drivers of Indonesia's economic growth, while continuing to strengthen the foundation of inclusive, resilient, and sustainable national economic development on the path toward Indonesia Emas 2045.

Appreciation

In closing, the Supervisory Board affirms that the sustainability of INA's performance and credibility will be determined by its consistency in upholding governance discipline, institutional integrity, and the quality of its investment decision-making. In an increasingly complex global environment, INA needs to continue strengthening its institutional foundation, ensuring that every investment process is carried out professionally, accountably and aligned with its long-term mandate to create sustainable economic value for Indonesia.

The Supervisory Board extends its appreciation to the Board of Directors and all INA personnel for the commitment and professionalism demonstrated throughout the year. Dedication, integrity, and the ability to adapt to evolving dynamics have been key factors in maintaining the confidence of global investors and strengthening INA's position as a credible investment partner. The Supervisory Board believes that, with a strong spirit of collaboration and disciplined implementation of governance, INA will become a key instrument in strengthening the financing of national development in the future.

The Supervisory Board also extends its appreciation to the Government, investor partners, stakeholders, and all parties who have supported INA's journey. The trust and collaboration built over time constitute an important foundation for INA to continue carrying out its mandate independently and professionally. With a consistent commitment to sound governance, prudent risk management, and responsible investment, INA is well positioned to continue strengthening the foundation of national economy and delivering tangible contributions toward Indonesia Emas 2045.

Finally, on behalf of the Supervisory Board and the entire INA organization, I would like to express our sincere appreciation and gratitude to Darwin Cyril Noerhadi for his dedication and contributions during his tenure as a member of INA's Supervisory Board. I also extend my congratulations to Fauzi Ichsan on his appointment as a member of the Supervisory Board of INA for the 2026–2031 term.

In addition, we would like to convey our appreciation and gratitude to Ridha D.M. Wirakusumah, Arief Budiman, Stefanus Ade Hadiwidjaja, and Thomas Oentoro for their dedication and contributions during their tenure on INA's Board of Directors.

May INA continue to uphold the trust that has been established and deliver sustainable impact for Indonesia's economy.

On Behalf of the Supervisory Board

Purbaya Yudhi Sadewa
Chairman of Supervisory Board
Ex-officio Member of Supervisory Board

MESSAGE FROM THE CHAIRMAN OF THE BOARD OF DIRECTORS

“Trust is not measured solely by the mandate entrusted to us, but by the sincerity with which it is safeguarded; for it is from that stewardship that trust grows and endures.”

Ridha Wirakusumah
Chairman of Board of Directors
Chief Executive Officer

Dear Esteemed Stakeholders,

When I reflect on our fifth year, one word comes to mind: resilience.

Resilience not as a slogan, nor as a reaction to volatility, but as a discipline cultivated deliberately over time. In 2025, INA did not merely endure a complex environment; we demonstrated that our foundations are strong enough to grow within it. The year demanded steadiness of judgment, clarity of direction, and consistency in execution. It required us to act with confidence without surrendering prudence.

This resilience was tested not only by external conditions, but also by the natural evolution of a growing institution. Throughout the year, INA navigated organizational transitions and leadership realignments as part of its continued institutional development. Such dynamics are part of building a long-term institution. What mattered most was our ability to preserve culture, maintain governance discipline, and sustain execution consistency. In that context, 2025 became a defining year, one that strengthened our foundations and marked our strongest performance to date.

I say this with humility, as we believe that the value of an institution lies in its consistency in upholding the standards it has set. Over time, INA has come to be known as an organization that is professional, disciplined, execution-oriented, investment-focused, and committed to working diligently to generate sustainable value for Indonesia. We anchor our institution in performance, not merely as a numerical achievement, but as the outcome of processes carried out with integrity and discipline. In 2025, INA delivered strong performance, not because we were driven by headline figures, but because we safeguarded and strengthened the foundations that drive performance: our people, our governance, our discipline, and the precision of our execution.

At INA, every investment is directed toward delivering **meaningful impact**. A responsible and impact-oriented investment approach shapes how we think and operate. Every responsibility entrusted to us is safeguarded with earnest and accountability. We believe that with disciplined capital and **credible partnerships**, even a relatively modest equity position can serve as a catalyst for multiplied impact for Indonesia.

This is why our 2025 Annual Report theme, “Tomorrow is Built on Today’s Trust,” is relevant to us. The future is built through decisions taken carefully each day, how we allocate capital, manage risk, uphold governance, and sustain partnerships. Trust is therefore born from consistent action carried out with discipline and professionalism. Over five years, that consistency has gradually shaped institutional credibility.

Macroeconomic landscape

The global environment in 2025 reinforced this reality. Global growth remained moderate at around 3%. Capital flows became increasingly selective as investors recalibrated portfolios amid elevated interest rates and geopolitical fragmentation. Global Foreign Direct Investment (FDI) continued to recover but remained below historical peaks, reflecting a structural shift toward sector-focused and strategic deployment. Energy transition investments surpassed USD1 trillion annually, while digital infrastructure and critical mineral supply chains became central to geopolitical and industrial competition.

Indonesia, however, demonstrated structural resilience. Economic growth remained above 5%, supported by downstream industrialization, infrastructure expansion, digital acceleration, and strong domestic consumption. Investment realization remained a critical driver of GDP, reaffirming the importance of patient, long-term institutional capital.

In response to the structural shift of the global economy toward strategic sectors, and supported by the resilience of Indonesia’s economic structure, INA continues to strengthen its strategic positioning to invest in priority and high-potential sectors. INA remains committed to serving as a trusted investment platform, bridging global capital with domestic opportunities to generate long-term value while enhancing Indonesia’s competitiveness. We carry out this mandate with discipline and prudence, underpinned by a forward-looking perspective that enables us to navigate evolving global dynamics with confidence.

Strategic Partnership

> **In carrying out its mandate, INA does not invest alone. Partnership forms an important part of how we move forward.**

More than a transaction, partnership for us is built on trust, mutual respect, shared responsibility, and long-term alignment, not only with investors, but also with government stakeholders, SOEs, regulators, portfolio companies, and even within our own team. In investment, capital is certainly important; however, the presence of investable deals and trust-based partnerships carries equal weight. In an era of de-globalization, where many countries are becoming increasingly inward-looking, attracting capital and executing real transactions has become more challenging, and in such an environment, consistency and credibility matter even more.

Over the past five years, INA secured USD25 billion in commitments from 40 strategic partners across 15 countries. including pension funds, insurance companies, sovereign wealth funds, asset managers, strategic corporations, and private equity firms. These partnerships are designed not only to mobilize capital flows, but also to generate operational alpha through sustainable value creation.

INA strategic investment portfolio

Five years ago, INA was entrusted with a mandate: to mobilize capital into sectors that strengthen Indonesia's long-term economic architecture. In 2025, that mandate is reflected not only in intent, but in measurable scale and impact.

Amid a challenging environment, cumulatively INA and our co-investors have deployed Rp74.5 trillion (~USD4.7 billion). INA's deployment portion has reached Rp33.3 trillion (~USD2.1 billion), growing 8.3 times from inception. Importantly, Rp41.2 trillion (~USD2.6 billion) in FDI has been mobilized into Indonesia. Assets Under Management now stand at Rp146.2 trillion, reflecting not only scale, but sustained global confidence in INA's institutional capacity. Yet resilience is not defined by volume alone, but by strategic direction, disciplined allocation, and the durability of outcomes.

In response to evolving structural needs, INA expanded its strategic priority sectors in 2025 to include: infrastructure, transportation and logistics; green energy and energy transition; digital and digital infrastructure; healthcare services; and advanced materials. This expansion reflects our efforts to remain aligned with Indonesia's development trajectory and global capital reallocation trends.

From a sectoral perspective, infrastructure, transportation and logistics currently represents the largest allocation, accounting for 44.0% of total cumulative deployment. INA has supported the development of over 250 kilometers of toll road connectivity, positioning INA and its investment partners as the third-longest toll road owners in Indonesia. Futhermore, in the port sector, INA and its partners have invested in assets operating the largest international container terminal in Sumatra, enhancing operational efficiency while contributing to capacity expansion to nearly 1.5 million TEUs per year. Still within infrastructure, INA and its partners have also developed approximately 200,000 square meters of modern, internationally standardized logistics properties, actively strengthening supply chain resilience amid evolving global trade dynamics.

Digital and digital infrastructure account for 29.5% of INA's total allocation. Amid double-digit growth in the digital economy and a significant increase in data consumption, infrastructure readiness has become a critical factor in maintaining competitiveness. INA and its investment partners have invested in one of Southeast Asia's largest telecommunications tower operators, with over 40,000 towers across Indonesia, and have expanded into the fiber optic segment, operating more than 57,000 kilometers of fiber network. INA and its partners have also invested in a hyperscale data center, one of the most advanced in Southeast Asia, to support the development of artificial intelligence (AI), with a capacity of 72 MW powered by one of the most advanced chips available. This capacity represents approximately one-third of Indonesia's domestic data center capacity, further strengthening the country's position as a regional hub for digital infrastructure.

In the green energy and energy transition sector, Our geothermal portfolio represents one of the largest in Indonesia, with access to globally scaled reserves and development pipelines, serving as a backbone of the country's clean energy supply. This portfolio generates approximately 395 GWh of clean electricity per month and contributes to the reduction of around 0.3 million tons of CO_2 equivalent emissions monthly. INA also supports the development of the electric vehicle ecosystem and energy storage initiatives, in line with Indonesia's ambition to strengthen its position in the global electric vehicle supply chain.

In healthcare, INA supports Indonesia's largest hospital network and retail pharmacy platform, and has invested in the country's first and Southeast Asia's largest plasma fractionation facility, with a capacity exceeding 600,000 liters per year. This investment strengthens national biopharmaceutical resilience and reduces reliance on imports.

In advanced materials sector, INA's investments contribute to scaling LFP cathode production capacity to become the largest globally outside China. The first phase reached a capacity of 30,000 tons per year in 2025, followed by a second phase of 110,000 tons commencing operations in early 2026, and a third phase of 120,000 tons expected to be operational in early 2027. This development supports Indonesia's participation in the global battery value chain and advances the national industrial downstreaming agenda.

INA's performance is defined not only by capital deployment, but also by disciplined execution of exit strategies that optimize returns. In parallel with ongoing investment development, INA undertakes divestments of portfolio assets that have delivered value. In 2025, this included the divestment of a logistics real estate asset and a partial transfer of loan exposure in the hospitality sector, underscoring that value realization is an integral component of our stewardship.

Responsible investment for sustainable value creation

> **At INA, sustainability is implemented through our Responsible Investment approach. Our performance is not measured solely through operational or financial indicators, but also by sustainability outcomes reflected in our social, economic, dan environmental contributions.**

For us, sustainability is not an additional agenda, but the way we direct and deploy capital. This approach ensures that every investment considers not only financial returns but also long-term economic, social, and environmental impacts. Through structured impact measurement and continuous monitoring, we view financial returns and national development as mutually reinforcing objectives. Furthermore, we believe that enduring value can only be created when responsibility is embedded from the outset of each investment decision.

INA's Responsible Investment Framework is anchored in 3 (three) interrelated pillars: ESG Integration, Active Ownership, and the Development of Green Investment Sectors. These pillars reflect our commitment to aligning financial performance with long-term value creation, while supporting the low-carbon development agenda.

Independent assessment by Institute for Economic and Social Research, University of Indonesia (LPEM UI) confirms that investment in strategic infrastructure not only generates substantial economic value but also enhances connectivity, stimulates regional economic activity, creates employment opportunities, and fosters capacity development for Indonesia's top talent. In addition, it delivers broader social and environmental benefits, contributing to Indonesia's long-term sustainable growth.

The study indicates that the Bakauheni–Terbanggi Besar Toll Road is projected to contribute approximately Rp400 trillion to GDP over its concession period, support around 20,000 jobs annually, record an Economic Benefit Cost Ratio (EBCR) of 2.59. This reflects the project's strong economic viability and its significant contribution to the national economy. The Belawan New Container Terminal is projected to contribute Rp82 trillion to GDP, generate Rp15 trillion in fiscal revenue, support approximately 4,400 jobs annually, record an EBCR of 1.90, and reduce approximately 3.4 million tons of CO_2 emissions through improved operational efficiency.

ESG integration continues to be strengthened across all stages of the investment lifecycle, from screening, initial review, due diligence, ESG roadmap development, and reporting. This approach is further reinforced through INA's participation in international sustainability forums, including as an observer of the Asia Investor Group on Climate Change (AIGCC), ensuring that our practices remain aligned with evolving global standards.

As part of strengthening ESG integration, INA conducts structured periodic evaluations of sustainability performance across portfolio companies. The 2025 ESG survey, conducted among companies under ownership for at least one year, reflects tangible socio-governance impact, including supporting more than 6.100 jobs, with women representing 61% of the total workforce. Eleven key ESG topics were prioritized in the monitoring process, with a 100% response rate from strategic portfolio companies, while 89% of companies have established sustainability policies.

These outcomes extend beyond reported metrics and are reflected in operational practice. Case highlights further illustrate this discipline. PT Rafflesia Investasi Indonesia became one of the first toll road operators in Indonesia to report through the The Global Real Estate Sustainability Benchmark (GRESB) framework, achieving a score of 71 out of 100 in its inaugural assessment, marking progress in institutionalizing sustainability within road infrastructure.

At Belawan New Container Terminal, the "Tumbuh Bersama" program, in collaboration with Pelindo and DP World Foundation, integrates mangrove restoration, educational support, and structured ESG monitoring into port development. Operational decarbonization efforts, supported by Science Based Targets initiative (SBTi) validation at group level, reinforce measurable environmental governance.

This approach is also reflected in capital allocation direction. Green Investment Sector Development remains a strategic priority. INA recognizes the transition toward a low-carbon economy not only as an environmental imperative, but as a structural growth opportunity. These allocations support energy transition initiatives, renewable development, and nature-based solutions aligned with national and global sustainability agendas.

Sustainability also begins internally. INA integrates ESG principles into institutional operations, including monitoring Scope 1 and Scope 2 greenhouse gas emissions, workforce diversity, competency development, and governance strengthening. Scope 1 emissions from operational vehicles were recorded at 4.7 tons CO_2-e in 2025, while Scope 2 emissions remain zero under the market-based method. To further reduce Scope 2 exposure, INA has begun purchasing Renewable Energy Certificates (RECs) issued by PLN, securing coverage equivalent to operational electricity consumption for 2023 and 2025. This initiative reinforces demand for clean energy while aligning internal practices with SDG 7 and SDG 13 commitments.

Ultimately, sustainability at INA serves as an overarching architecture that integrates all aspects of institutional stewardship. Investment performance at INA is not an endpoint, but the result of disciplined capital allocation, structured partnerships, strong governance, risk awareness, active monitoring, and timely capital recycling. Returns are not isolated targets; they are responsibilities embedded within broader national mandate. This discipline demonstrates that capital managed within a structured governance framework can generate impact beyond the balance sheet, strengthen trust, and contribute to Indonesia's long-term resilience.

Financial performance and institutional resilience

Financial performance at INA is the expression of discipline in preserving capital, risk management, and sustaining value across evolving cycles.

Amid evolving dynamics, 2025 marked INA's strongest performance since its establishment, both in terms of diversified capital deployment and financial outcomes. This achievement reflects the strength of our operational foundation and the institutional knowledge developed over time.

On financial achievements, total revenue reached Rp8.5 trillion, representing a 43.0% year-on-year increase and exceeding the target with an achievement rate of 134.0%, driven by dividend income, interest income, and unrealized gains from investments. On the cost side, INA continued to implement measured efficiency initiatives, as reflected in investment, operating, and financing expenses that remained below budget, demonstrating strong cost discipline.

INA recorded a net profit of Rp7.4 trillion, representing a year-on-year increase of 37.3%, extending a solid growth trajectory with a 2022–2025 CAGR of 41.6% and achieving 160.9% of the target. This represents the highest level, in line with a significant improvement in INA's Return on Assets (ROA), which increased to 6.7% in 2025, or growing by 37.1% compared to the previous year. This achievement marks a significant milestone that not only reflects robust financial performance but also reinforces INA's role as a strategic institutional investor in supporting Indonesia's sustainable economic development. As of the end of 2025, INA's total assets reached Rp111.0 trillion, with equity amounting to Rp108.2 trillion, in line with retained earnings growth to Rp15.8 trillion, further strengthening INA's capital foundation to support its long-term investment mandate.

To sustain this performance requires resilient capital management. INA's Internal treasury assets reached Rp76.2 trillion at year-end 2025. Cash and bond portfolios generated average gross returns of 5.75% (4.75% net). The market value of in-kind shares reached Rp58.2 trillion, representing Rp13.2 trillion (29.3%) above acquisition value, with cumulative dividend income of Rp15.9 trillion since receipt. External funding options remain available on unsecured and competitively priced terms, ensuring flexibility while maintaining prudent leverage within defined risk appetite. This strength also ensures INA's readiness to capture investment opportunities in a timely and sustainable manner amid evolving market dynamics.

Further reflecting these strengths, Fitch has maintained a BBB rating on the international scale and AAA (idn) on the national scale, with a Stable Outlook (note: outlook revised to Negative as of 11 March 2026), aligned with Indonesia's sovereign rating. These ratings reflect sustained governance consistency and disciplined risk management.

In essence, 2025 demonstrates that resilience is not defined by the absence of volatility, but by the capacity to absorb it by continually upholding our mandate.

Governance architecture

Governance maturity forms the foundation of our resilience. As a sovereign investment institution entrusted with long-term national capital, we recognize that legitimacy is not built through performance alone, but through discipline in exercising authority, reviewing decisions, and upholding accountability. For us, governance is not an accessory to strategy; it is the framework that ensures strategy remains credible and durable.

INA operates under a two-tier governance structure in accordance with prevailing regulations, including Government Regulation No. 74 of 2020, which establishes a clear separation between oversight and executive management. The Supervisory Board provides strategic oversight and ensures alignment with the mandate and regulatory framework, while the Board of Directors carries executive responsibility for operational execution and institutional management. This structural clarity preserves independence, strengthens checks and balances, and reinforces institutional resilience.

Within this framework, governance is exercised through defined organs, formal charters, and structured committees. The Investment Committee serves as a principal deliberative forum, ensuring that each proposed transaction is rigorously reviewed from financial, risk, legal, and ESG perspectives before receiving Board approval. In 2025, 95 Investment Committee meetings and 88 Board meetings were convened, reflecting both the scale of activity and the depth of deliberation underlying every decision.

To ensure alignment of its governance with international best practices, INA conducted a self-assessment against the Santiago Principles, which cover the legal framework, institutional structure, as well as the investment and risk management framework to maintain operational independence and strong risk oversight. During its three years

as a full member, INA has continued to enhance various aspects of these principles. The results of the self-assessment were submitted to the International Forum of Sovereign Wealth Funds (IFSWF), accepted, and published on the official IFSWF website on 5 November 2025.

Governance at INA is also anchored in the principle of collective accountability. Decisions are not concentrated in individuals; they are institutionalized through documented processes, layered review mechanisms, and transparent reporting lines. This ensures that investment discretion remains bounded by mandate, defined risk appetite, and fiduciary duty. This governance approach forms the foundation for integrated risk management

Integrated risk management

Risk governance forms an integrated component of INA's institutional architecture. Risk management is not merely about having structured concepts and frameworks; more importantly, INA places strong emphasis on discipline and consistency in its implementation across all investment and operational processes.

We apply a comprehensive risk management approach covering both transaction-level and portfolio-level risk, ensuring that every investment decision operates within a disciplined and structured risk framework.

Risk awareness at INA operates through five core stages: risk appetite setting, identification, mitigation, monitoring, and reporting. This framework is supported by stress testing at both transaction and portfolio levels, forward-looking Investment Risk Dashboards, and macroeconomic monitoring. Through this approach, every exposure remains aligned with the mandate and defined risk boundaries.

In line with this risk framework, at the portfolio level, INA continues to refine its Strategic Asset Allocation (SAA) to optimize risk-adjusted returns, maintain liquidity, and balance the portfolio toward resilient assets with stable returns. INA is also expanding its indirect investment platform, targeting a 10–20% allocation through Strategic LP structures and selective participation as a co-GP in upper-tier funds. Through these indirect investments, INA aims to broaden access to deal flow while integrating global expertise into national priorities.

In 2025, INA strengthened its enterprise risk management approach, underscoring that its focus extends not only on investment risk but also on all aspects of operational risk. This approach is reflected in risk screening across 32 investment processes, alongside strengthened risk management across strategic, financial, legal and compliance, reputational, and operational dimensions. Risk tolerance thresholds were formalized through dedicated SOPs, and Risk and Control Self-Assessment (RCSA) was implemented systematically. These measures ensure that risk discipline is institutionalized rather than episodic.

Institutional capabilities in human capital

Behind this institutional performance stand the people of INA. They translate mandate into measurable outcomes. At INA, strategy does not end at direction-setting; it is realized through disciplined execution, where analytical rigor, structured processes, and professional judgment converge.

Professionalism, for us, is embedded in daily practice, reflected in how decisions are made, accountability exercised, and collaboration fostered across functions. Professional standards are embedded in internal policies and behavioral expectations, ensuring that governance is not treated as formality, but as lived principle. Culture becomes the institution's first line of discipline, sustaining consistency and integrity across cycles.

Strengthening institutional capability remains central to maintaining that discipline. Throughout 2025, several organizational enhancements were implemented. These structural enhancements deepen analytical capacity and reinforce risk discipline across the investment lifecycle.

Leadership engagement also expanded across international and domestic forums, reinforcing INA's role within global and regional dialogue on investment, energy transition, and sustainable finance. Participation in these platforms reflects our commitment to representing Indonesia responsibly within global capital markets.

As of year-end 2025, INA was supported by 80 professionals, excluding members of the Board of Directors and Supervisory Board. The workforce reflects diversity across age, gender, educational background, and position levels. Of the 80 employees, 45 are male and 35 female employees, with the majority holding undergraduate and postgraduate degrees. This composition reflects a blend of experience, specialization, and emerging leadership capacity.

All that we have undertaken this year ultimately converges on one responsibility: how we safeguard the mandate entrusted to INA.

In closing, I would like to return to what the theme truly asks of us: to treat the present as the space where trust is built through what we do today. The decisions we make today, in capital allocation, governance, sustainability, risk discipline, and how we develop our people, shape not only the results we record this year, but the resilience we carry into tomorrow. Our mandate is long-term; therefore, our discipline must also be long-term. The future we aspire to build is not a distant destination; it is the continuation of how consistently we uphold responsibility in the present.

As we enter 2026, INA will continue to strengthen the execution of its investment strategy, focusing on optimizing the existing portfolio, expanding into new strategic sectors, and increasing indirect investments through partnerships with leading global fund managers. These efforts are supported by enhanced asset allocation, disciplined risk and liquidity management, and continued strengthening of organizational capabilities.

Building on the trust consistently established with the Government, global partners, and all stakeholders, INA will further expand access to high-quality investment opportunities while reinforcing its role as a credible investment platform. Through this approach, we aim not only to grow our assets, but also to strengthen Indonesia's economic architecture, ensuring that the capital deployed today contributes to resilience, competitiveness, strategic independence, and shared prosperity across generations.

Tomorrow is built on today's trust. And trust endures only when our actions remain consistent, across cycles, across challenges, and across generations.

Ready.
Steady.
Deal.

Ready. Steady. Deal.

Investment is a disciplined journey, ready in preparation, steady in execution, and purposeful in every deal.

Investment is a continuous act of responsibility. It begins with the development of professional partnerships and collaboration structures, followed by disciplined deployment, and safeguarded through continuous portfolio management. Through this cycle, value is created not only for today, but also for future generations.

Over the course of five years, INA has progressed from institutional formation to a mature discipline of stewardship. Returns are not viewed as standalone targets, but as responsibilities inherent within a broader national mandate. Performance reflects the quality of execution, not merely the result of momentum.

Strategic Meaning

This growth reflects strengthened institutional capacity, global credibility, and investor trust in connecting international capital with national development priorities.

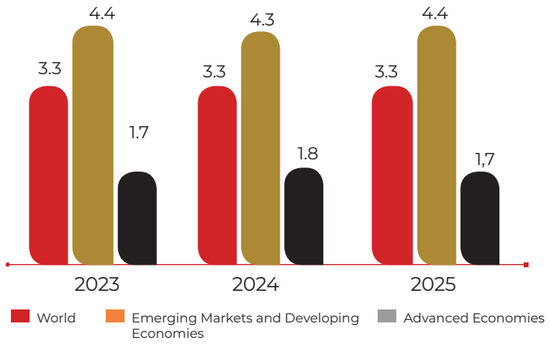

Ready and Steady in a Changing Global Landscape

GLOBAL & DOMESTIC ECONOMIC CONTEXT

2025 was marked by continued global dynamics, including trade fragmentation, geopolitical tensions, and monetary policy adjustments across major economies. Shifts in supply chain configurations and cross-border capital flows shaped a more selective and cautious global investment landscape, with increasingly visible divergence across regions.

The normalization of global inflation and interest rate adjustments across advanced economies influenced international investors' risk perception and yield preferences. In this context, policy stability and institutional credibility became key differentiating factors in attracting and sustaining long-term capital flows.

Global Economic Growth Trend (%)

Global Inflation and Trade Volume Dynamics (%)

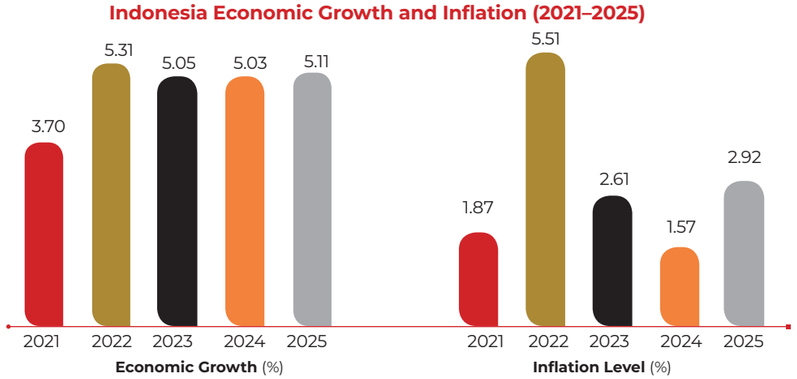

Source: IMF- WEO, Jan 2026

INDONESIA MACROECONOMIC RESILIENCE

Amid these global dynamics, Indonesia demonstrated relatively stable macroeconomic resilience. Growth remained steady with controlled inflation, supported by domestic consumption, consistent investment, and prudent fiscal and monetary policy. This stability provides a credible foundation for long-term investment decisions.

Indonesia Economic Growth and Inflation (2021–2025)

Source: IBPS

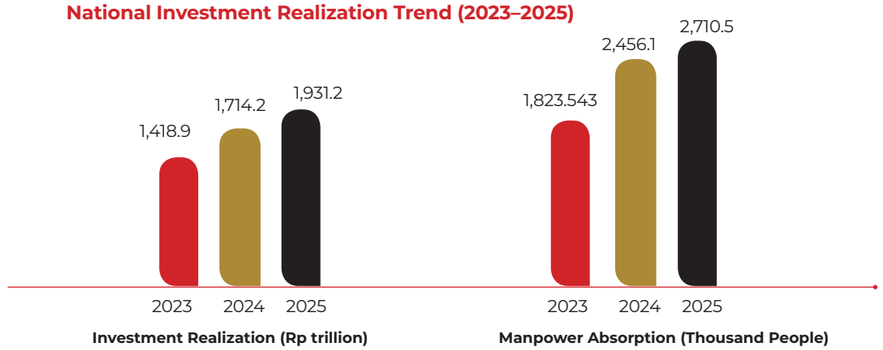

Indonesia's sovereign rating remained at investment grade BBB (S&P), BBB (Fitch) and BAA2 (Moody's), with a stable outlook throughout 2025, reinforcing perceptions of policy discipline and structural resilience. In a more selective global environment, macro stability and governance credibility form a critical foundation for sustainable long-term investment.

NATIONAL DEVELOPMENT PRIORITIES & INVESTMENT LANDSCAPE

National development priorities continue to emphasize infrastructure strengthening, industrial downstreaming, energy transition, and digital and connectivity development. These long-term priorities require phased capital deployment, clear partnership structures, and execution readiness aligned with Indonesia's strategic objectives.

National investment realization remained solid, reflecting Indonesia's structural attractiveness amid heightened global selectivity. The deepening of the financial and capital markets further expands financing alternatives and provides more structured divestment pathways for long-term investments.

National Investment Realization Trend (2023–2025)

Source: BKPM

In responding to global uncertainty alongside relatively stable domestic conditions, INA reinforces institutional discipline and governance consistency. A complex macro environment does not call for opportunistic positioning, but rather strengthens the importance of investment selectivity, measured risk management, and execution readiness across the investment cycle.

On this foundation, INA directs its investment strategy toward strategic sectors aligned with national development priorities, supported by structured partnerships and disciplined capital allocation. This approach ensures a balance between sustainable commercial returns and long-term contribution to Indonesia's development.

Strategy as Direction

Investment Strategy

In line with its dual mandate, INA performs its role not only as an investment manager focused on generating economic value and optimal long-term returns, but also as one of the nation's strategic instruments in supporting sustainable economic development in Indonesia. Investment decisions are guided by a broader responsibility to attract foreign capital inflows, help accelerate economic growth, focus on developing strategic sectors and exploring new strategic sectors, as well as support job creation.

Amid domestic economic dynamics and evolving global geopolitical uncertainty throughout 2025, INA remained consistent in executing its mandate. Performance resilience was sustained not through momentum alone, but through responsible investment practice and strong governance foundations. Strategy in this context, therefore, serves not merely as a plan, but as direction, guiding capital allocation, risk management, and partnership execution with measure and accountability.

In carrying out this mandate, INA adheres to core principles as the foundation for its investment and operational decision-making, as follows:

- Developing strategic partnerships
- Creating operational value enhancement
- Upholding ESG principles in investment and operational decision-making
- Implementing governance and risk management practices aligned with international standards

These principles anchor decision-making, ensuring that growth is pursued with discipline and national relevance.

Ready. Steady. Deal.

Three Pillars of INA's Investment Strategy

Strategy provides direction not only for where capital is placed, but for how it is positioned to create continuous national value. INA's investment strategy is structured around three integrated pillars that balance focus, capability, and discipline.

Defining Strategic Sector Focus

INA concentrates its capital in sectors that shape Indonesia's structural transformation, by sustaining its focus on four priority sectors, namely: infrastructure, transportation and logistics; green energy and energy transition; digital and digital infrastructure; and healthcare services, while also expanding into advanced materials as a sector with strong investment fundamentals and strategic alignment with the national agenda. Sector focus is not merely thematic; it emphasizes deliberate positioning in areas that underpin long-term competitiveness and resilience.

1

Expanding Through Indirect Investments

Growth is not only achieved through direct investment deployment, but also through partnership platforms that expand access and deepen capabilities. INA acts as a Strategic Limited Partner (LP) by partnering with leading global General Partners (GPs)/investment managers across key strategic sectors, enabling access to high-quality investment opportunities and the transfer of global expertise. This approach broadens deal flow, strengthens INA's internal capabilities, and creates opportunities for co-investment in Indonesia. In addition, INA may also establish Co-GP structures for dedicated funds, typically focused on priority sectors or the Indonesian market. This approach is most suitable when INA can play a strategic role in directing investment allocation and attracting external capital participation.

2

Strengthening Strategic Asset Allocation

Long-term value requires calibrated allocation. INA refined its Strategic Asset Allocation to optimize risk-adjusted returns while preserving liquidity and resilience. Capital was directed toward priority sectors and projects, alongside portfolio rebalancing into higher and more immediate yield asset classes. This allocation framework ensures that the portfolio remains robust, adaptive, and excelled in the long-term.

3

INA's investment strategy also takes into account the potential for cross-sector integration to broaden investment opportunities, while remaining aligned with evolving macroeconomic conditions and global trends.

The execution of these three pillars is supported by the strengthening of strategic enablers. INA continues to develop professional talent from diverse backgrounds, optimize funding structures, deepen value creation initiatives, reinforce proactive risk management, apply integrated governance and ESG practices, enhance operational efficiency, strengthen technological capabilities, and ensure the effectiveness of internal audit functions. They form the foundation of institution's competitiveness and long-term value.

Ready. Steady. Deal.

Sector Architecture and Focus

Sector focus defines the direction of INA's investment deployment. In 2025, INA deepened its investment focus on priority and strategic sectors that align with national development objectives and address fundamental structural challenges in Indonesia. Capital is deployed where it can strengthen resilience, enhance productivity, and generate long-term value.

INA's Core Investment Sectors and Value Creation

Infrastructure, Transportation and Logistics

Investment in this sector is directed toward modernizing and expanding infrastructure to increase national capacity and connectivity. Strengthening reliable supply chains supports key industries, while technology adoption enhances operational efficiency.

Green Energy and Energy Transition

Investment in this sector is directed to support the transition to a lower-carbon energy system through the development of renewable energy sources, strengthening energy infrastructure, and optimisation of natural capital utilisation. The adoption of renewable energy and low-carbon technologies helps reduce emissions, enhance national energy resilience, and decrease dependence on fossil fuels.

Digital and Digital Infrastructure

Investment in this sector is focused on strengthening the digital ecosystem through the development of advanced data center infrastructure and comprehensive national and international connectivity. Digital adoption and innovation expansion enhance productivity, accelerate economic transformation, and strengthen Indonesia's integration into the regional digital economy.

Healthcare Services

Investment in the healthcare sector is directed toward strengthening infrastructure and service capacity to improve access and quality of service. This investment promotes healthcare manufacturing self-reliance, positions Indonesia as a healthcare manufacturing hub, and accelerates medical and digital innovation across the entire value chain. The sector encompasses strategic sub-sectors that strengthen national health system resilience and competitiveness of healthcare industry.

Advanced Materials

Investments are directed toward strengthening the downstreaming and industrialisation agenda, among others targeting upstream investments, expanding midstream and downstream value chains to enhance domestic value-added, as well as building strategic partnerships. Investments are also aimed at reinforcing Indonesia's position within global supply chains, particularly in energy transition industrialisation, battery and electric vehicle industries, semiconductors, and the development of other future technologies.

Other Potential Sectors

Investments in other potential sectors are directed to complement INA's focus on priority sectors by opening opportunities in areas with long-term growth prospects and broad economic impact. Through this approach, INA seeks to promote the transfer of international best practices, strengthen existing domestic platforms, and support the expansion of business activities across regions in Indonesia beyond Jakarta.

In addition to offering competitive return potential, investments in these sectors are also expected to expand access to quality services, create employment opportunities for Indonesia's top talent, and contribute to strengthening national competitiveness and the quality of human capital over the long term.

Investment Deployment Composition

ALLOCATION BY SECTOR
Since INA's establishment in 2021 until December 2025, the composition of total investment deployment together with co-investors reflects a diversified allocation and oriented toward nationally strategic sectors as follows:

Infrastructure, Transportation & Logistics: **44.0%**

Digital & Digital Infrastructure: **29.6%**

Green Energy & Energy Transition: **9.8%**

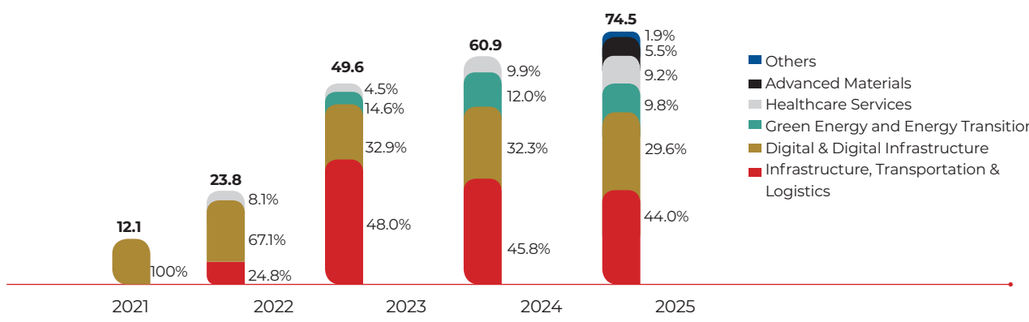

Healthcare Services: **9.2%**

Advanced Materials: **5.5%**

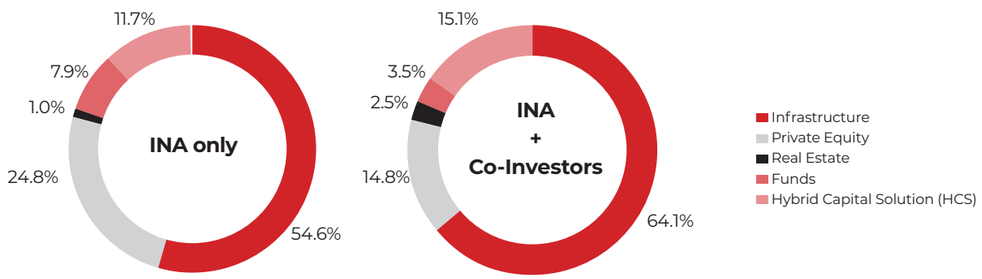

Other Potential Sectors: **1.9%**

This allocation reflects a deliberate capital deployment approach toward sectors with long-term economic relevance and structural impact on national development.

Growth based on sectors (Rp Trillion)

ALLOCATION BY ASSET CLASS
By asset class, the largest share of investment allocation is directed toward Infrastructure, as detailed below:

Performance Rooted in Tangible Partnerships

Cumulative Investment Deployment 2021-2025

Investment deployment reflects the consistent execution of mandate. Since its establishment, INA with its co-investors has cumulatively deployed approximately Rp74.5 trillion (~USD4.7 billion). This growth reflects enhanced institutional capacity to manage and allocate capital in a deliberate and sustainable manner.

Of this total, INA's cumulative direct deployment reached Rp33.3 trillion (~USD2.1 billion). In addition, INA has successfully attracted foreign direct investment (FDI) into Indonesia with a cumulative value of Rp41.2 trillion (~USD2.6 billion) since inception through the end of 2025.

Throughout 2025, INA and its Co-Investors deployed Rp15.7 trillion (approximately USD982 million), with INA's portion at around Rp10.5 trillion (approximately USD654 million).

From an investment performance perspective, in 2025 INA recorded a return of 8.1% net of tax, excluding in-kind shares. For comparison, this rate of return exceeded the average yield of the domestic bond market for 5 - 10 year maturities, with ranged from 6.1% to 6.6%.

These figures represent not merely quantitative expansion, but an affirmation of growing trust, credibility, and institutional capacity in connecting global capital with national development priorities.

The following are details on cumulative investment deployment of INA with its co-investors over the past 5 (five) years, by economic sector, aligns with the 5 (five) core focus sectors defined in INA's investment strategy.

Infrastructure, Transportation and Logistics Sector

INA's investment in this sector covers several key sub-sectors:

- **Toll road sub-sector**, with two global investment partners, INA has established an Indonesian toll road investment platform spanning more than 250 km across 4 (four) toll road sections, while also implementing Electronic Traffic Law Enforcement (ETLE) technology to strengthen governance and enhance traffic safety.
- **Port sub-sector**, INA with co-investor that is among the world's largest port operators, has established the largest port development platform in Sumatra, with a planned total capacity of up to 1.5 million TEUs. This initiative is intended to strengthen Indonesia's role as a maritime logistics hub. The investment also enables direct access to global shipping networks (international direct calls) and enhances port operational productivity through the adoption of best practices, equipment modernization, and international ESG standards.
- **Modern warehouse sub-sector**, represents an extension of INA's first-mile investments in the logistics sector (toll roads and ports), through the development of 3 (three) key warehouse assets with a total net leasable area of approximately 200,000 square meters. This investment is undertaken in partnership with a co-investor, with a shared commitment to developing logistics infrastructure that meets international standards. The development of the third warehouse asset was completed in 2025, marking the continuation of INA and co-investor joint program, aimed at strengthening the portfolio and expanding capacity along key logistics corridors.
- In 2025, INA **deployed an indirect investment** as a Strategic Limited Partner (LP) in an emerging market infrastructure fund managed by Global Infrastructure Partners (GIP), providing strategic exposure to global infrastructure opportunities across the energy, transportation, digital, and water/waste sub-sectors.
- In addition, INA provides **Hybrid Capital Solutions** to its co-investors, aimed at strengthening portfolio diversification while maintaining strategic exposure.
- **Other sub-sectors**, including airports, industrial estates, cold chain infrastructure, and fuel retail distribution, which collectively reinforce the logistics ecosystem.

Ready. Steady. Deal.

The Infrastructure, transportation and logistics sector forms the foundation of national connectivity and productivity. Investment in this sector is directed toward strengthening goods flow, economic mobility, and regional integration sustainably.

Digital and Digital Infrastructure Sector

INA's investment in this sector include:

- **Data center sub-sector**, INA is advancing the development of a hyperscale data center with a capacity of up to 72 MW, equivalent to approximately one-third of Indonesia's domestic data center capacity, located in Batam. This data center platform stands among the largest in the Asia Pacific by the end of 2025, with a total capacity of approximately 1 GW, encompassing operational capacity, assets under construction, and reserved capacity across seven markets in Southeast Asia, East Asia, and Europe. This deployment reinforces Indonesia's position as a key hub within the regional digital infrastructure network. In 2025, INA and its co-investor (DayOne) continued its investment by participating in a Series C funding round for the platform. This reflects INA's capacity and conviction to deploy follow-on capital into well-performing portfolio assets, while also demonstrating its commitment to enhancing long-term value through active investment lifecycle.
- **Telecommunications sub-sector**, through its investment in a tower company managing more than 40,000 telecommunications towers, doubling over the five-year period from 2020 to 2025, INA has strengthened its position in digital infrastructure. This investment was undertaken through an IPO that successfully attracted global blue-chip investors and was supported by a stronger perception of independence, thereby enabling enhanced access to capital to support both organic and inorganic expansion, including accelerated growth in the fiber optic segment, which now operates more than 57,000 km of network.
- **Digital application sub-sector**, through financing facilities for a digital travel ecosystem with over 55 million monthly active users and more than 2 million vendor partners.

Digital application underpins modern economic transformation. A total of 29.6% of INA's investment deployment has been allocated to this sector to strengthen the national digital ecosystem and regional connectivity.

Ready. Steady. Deal.

Green Energy and Energy Transition Sector

Investment in this sector strengthens energy resilience while fostering long-term decarbonization.

Key sub-sectors of INA's investment were deployed to:

- **Geothermal energy sub-sector**, INA deployed investment in a geothermal company generating 395 GWh of electricity per month while reducing CO_2 emissions by 0.3 $mtCO_2eq$ per month. As an anchor partner, INA actively initiates and attracts strategic investment partners, structures optimal transactions, and ensures the application of strong governance and disciplined execution alongside its partners. This approach not only enhances the scalability and quality of the assets but also contributes to the formation of one of the largest geothermal portfolios in the world.
- **Other sub-sectors**, including the electric vehicle (EV) ecosystem, nature-based solutions, energy storage and transmission, utilities, and waste management, INA serves as an investment enabler, bridging investment opportunities with global partners, accelerating project readiness through cross-stakeholder coordination, and advancing optimal investment structures to enhance project attractiveness and long-term sustainability.

Ready. Steady. Deal.

Healthcare Services Sector

INA's investment were deployed into its key sub-sectors, as follows:

- **Hospital sub-sector**, through its investment in Indonesia's largest hospital network, comprising 38 hospitals, 67 clinics, and more than 5,100 beds, INA takes a role in supporting the company's performance improvement through a range of strategic initiatives.
- **Retail pharmaceutical sub-sector**, INA's investment is realized through its ownership in a retail pharmacy company operating more than 400 clinics and laboratories, as well as approximately 1,000 pharmacies.
- **Plasma fractionation sub-sector**, INA is supporting the development of Indonesia's first plasma fractionation facility, with a capacity of more than 600,000 liters per year. In this investment, INA serves as a strategic local partner, contributing to the strengthening of national healthcare resilience through financial support and coordination with relevant local stakeholders.

This sector strengthens national health system resilience and the competitiveness of the healthcare industry.

Ready. Steady. Deal.

Investment is focused on supporting downstreaming in the LFP cathode sub-sector.

Advanced Materials Sector

In 2025, INA and its co-investors deployed in the development of an LFP cathode production facility (LBM New Energy (AP) Pte. Ltd.) with a Phase I annual capacity of 30,000 tonnes. Phase II, with a capacity of 110,000 tonnes, is scheduled to commence operations in early 2026, followed by Phase III with a capacity of 120,000 tonnes in early 2027. This investment reinforces Indonesia's national downstreaming agenda and strengthens its position within the global battery value chain. It also positions INA as an integral part of the global energy transition towards battery technologies. These battery technologies are further utilized across the renewable energy and data center sub-sectors, where INA has made significant investments, thereby opening opportunities for deeper integration across broader energy and industrial ecosystems.

INA Investment Contribution

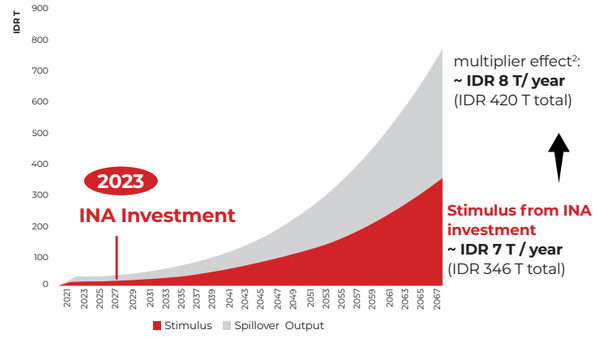

Investment as a Driver of Social and Economic Impact
For INA, investment extends beyond the achievement of risk-adjusted commercial returns. Investment also serves as an instrument to strengthen national connectivity, enhance economic efficiency, and create long-term value for society.

Based on independent assessments, INA's investments deliver not only commercial returns but also contribute to strengthening the economic structure, creating jobs, and enhancing overall welfare. Social and economic impact remains an integral part of INA's mandate and long-term responsibility.

An independent study conducted by the Institute for Economic and Social Research, Faculty of Economics and Business, Universitas Indonesia (LPEM UI), examined two of INA's long-term investments, the Bakauheni–Terbanggi Besar (BTB) section of the Trans Sumatra Toll Road and the Belawan New Container Terminal (BNCT), and concluded that both projects deliver significant economic and social contributions.

Bakauheni – Terbanggi Besar Toll Road

IDR 7.5 T/ year
Contribution to GDP[3]

~20,000 jobs/ year
Direct and indirect

IDR 1.7 T/ year
Potential government revenue from direct and indirect taxes

IDR 2.8 T/ year
Additional household revenues

The development of the Bakauheni–Terbanggi Besar (BTB) Toll Road plays a significant role in strengthening inter-regional connectivity and improving logistics efficiency across Sumatra Island. With a total length of 256 kilometres, INA, and its co-investors, is currently the third-largest toll road owner in Indonesia. Throughout the project's construction and operational period from 2015 to 2067, the BTB investment is projected to contribute approximately Rp400 trillion to national Gross Domestic Product and support around 20,000 jobs annually over its concession period. From an economic perspective, the project records an Economic Benefit–Cost Ratio (EBCR) of 2.59, indicating that every Rp1 invested generates Rp2.59 in economic value. This reflects the project's strong viability and its substantial contribution to the national economy.

Increased Urbanization

~8%

Population growth in toll-connected areas (compared to 3% in non-toll-connected areas)

Higher MSME Revenue

~12%

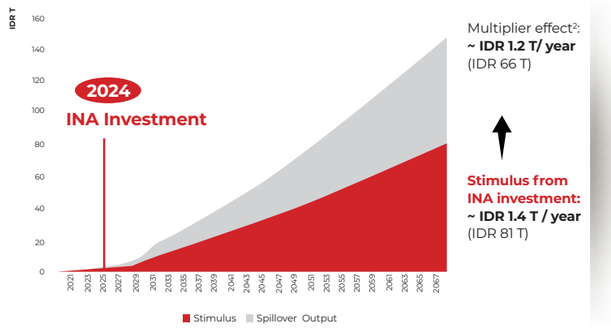

Average revenue growth (compared to pre-BTB) among MSMEs reporting a positive impact from BTB on their businesses

Market Expansion

~46%

Of surveyed businesses expanded their markets to new provinces

Belawan New Container Terminal

Multiplier effect[2]:
~ IDR 1.2 T/ year
(IDR 66 T)

Stimulus from INA investment:
~ IDR 1.4 T / year
(IDR 81 T)

IDR 1.5 T/ year
Contribution to GDP[3]

~4,400 jobs/ year
Direct and indirect

IDR 0.3 T/ year
Potential government revenue from direct and indirect taxes

IDR 20 T
Time saving from direct-calls
2030-2072

IDR 40 T
Saving from Terminal Handling Charges (THC),
2030-2072

Investment in the Belawan New Container Terminal (BNCT) also demonstrates measurable long-term social and economic impact. The project is projected to contribute approximately Rp82 trillion to national GDP over the period from 2016 to 2072 and support around 4,400 jobs annually. It is also expected to generate fiscal revenue of approximately Rp15 trillion. From an economic perspective, BNCT records an EBCR of 1.90, indicating that every Rp1 invested generates Rp1.90 in economic value, significantly exceeding national infrastructure benchmarks. Beyond economic indicators, the revitalisation of BNCT has also contributed to increased MSME income, improved access to essential goods, and a reduction of approximately 3.4 million tonnes of CO_2 emissions through shorter shipping routes and enhanced operational efficiency.

Improved Access to Commodities

~25%

Surveyed businesses reported improved access to raw materials and commodities

Higher MSME Revenue

~50%

Surveyed businesses reported revenue growth

Market Expansion

~30%

Surveyed businesses expanded to other provinces

"This report reflects how strategic, long-term investment partnerships can transform capital into sustained economic and social value. The data presented by LPEM UI affirms that when investments are structured with strong governance and aligned with national priorities, their impact can extend far beyond balance sheets, enhancing connectivity, efficiency, and competitiveness nationwide."

Blood Plasma Fractionation Project

Strategic Milestone

Indonesia's first plasma fractionation facility and the largest in Southeast Asia

Operational Timeline

- Commercial operations: late 2026
- Production of Plasma-Derived Medicinal Products (PDMP): 2027

Construction Progress

> 98% completed
(as of end-2025)

Total Joint Investment
USD150 million

Strategic Meaning

Building sustainable national capacity, not merely addressing present demand, but ensuring that national health resources generate long-term value for Indonesia's healthcare system.

INA's investment in SKPlasma Core Indonesia reflects a long-term commitment to building national self-reliance in strategic healthcare. Plasma-based medicine production is not merely an industrial undertaking; it is fundamental to strengthening the resilience of the national healthcare system and protecting patients with critical conditions. By enabling domestic production of plasma-derived therapies, Indonesia reinforces sustainable access to essential medicines, enhances affordability and safety, and reduces reliance on imported plasma products.

The development of a high-technology plasma fractionation facility in Karawang marks a milestone in advancing Indonesia's high-value bio-pharmaceutical industry. The investment builds not only physical infrastructure, but institutional capability. Through technology transfer, industrial capacity development, and the creation of high-skilled employment, the project strengthens Indonesia's biomedical expertise. In a global context where only around 20 countries operate plasma fractionation facilities, this initiative positions Indonesia among nations with strategic capability in producing Plasma-Derived Medicinal Products (PDMP).

Through the joint venture PT SKPlasma Core Indonesia, established by INA and SK Plasma, Indonesia's first and Southeast Asia's largest plasma fractionation facility is being realized. As of the end of 2025, construction progress has exceeded 98%, with commercial operations targeted for late 2026 and PDMP production commencing in 2027. The joint investment of USD150 million represents INA's approach to building enduring national capacity, not merely addressing present demand, but ensuring that national health resources generate sustained value for Indonesia's healthcare system.

"This facility represents a critical step toward reducing our dependency on imported plasma-based medicines by meeting local demand with locally produced products. Through technology transfer and knowledge-sharing for Indonesian health care workers, it will contribute to the nation's capability building and a healthier Indonesia."

Data Center Project

INA's investment in the development of a data center platform together with DayOne strengthens Indonesia's digital economic foundation as part of its long-term responsibility to national competitiveness. The hyperscale data center campus at Nongsa Digital Park, Batam, expands digital infrastructure capacity while reinforcing data sovereignty and the security of the national digital ecosystem. Through Indonesia–Singapore–Malaysia regional connectivity, the investment positions Indonesia within an increasingly integrated Southeast Asian digital economy. Economically, it supports sustainable value creation through investment inflows, high-value employment generation, and the transfer of global-standard digital expertise. The initiative reflects INA's approach in building strategic infrastructure that strengthens Indonesia's role in digital transformation.

Strengthening Indonesia's Digital Infrastructure through Hyperscale Investment
In 2025, INA and DayOne advanced the development of a 72 MW greenfield data center campus in Batam, marking a significant milestone in strengthening Indonesia's digital infrastructure. DayOne, a platform formerly under GDS, operates data centers across seven countries and partnered with INA to establish its first large-scale data center in Batam. The 72.4 MW campus, with an investment value of approximately USD600 million, is projected to become the first AI-enabled facility in Southeast Asia equipped with the latest advance systems. As of October 2025, 32.4 MW has commenced operations, with full completion targeted in 1H 2026. Upon full operation, the campus is expected to represent approximately one-third of Indonesia's total data center capacity.

The project recorded a capital multiplier of **9.2x** on INA's investment, with an even greater multiplier generated through the mobilization of IT infrastructure spending, including servers and systems deployed in data centre operations.

Portfolio Divestment

Discipline Across the Investment Cycle

Investment does not end at acquisition and asset development. Realized value must be managed prudently through timely capital reallocation decisions. In this context, divestment forms an integral part of disciplined portfolio management, ensuring that each portfolio decision is guided by a long-term perspective and balanced risk–return considerations.

In 2025, INA completed several repayment and divestment transactions within its portfolio. In the logistics sector, INA successfully divested two out of three modern warehouse assets. Beyond realizing investment value, the transaction strengthened INA's track record in logistic real estate and created additional capacity to pursue new strategic opportunities within the asset class.

INA also completed the transfer of a portion of its loan facility exposure to a leading hospitality partner in September 2025. This action reflects active and measured portfolio management, ensuring that financing structures remain aligned with strategic priorities and defined risk parameters.

These divestments reaffirm that portfolio performance is shaped not only through expansion, but through timely and disciplined exit decisions. In this way, capital management becomes an instrument to preserve flexibility, strengthen liquidity, and sustain INA's long-term investment capacity.

Capital with Continuity

Funding Strategy 2025

Funding strategy forms part of institutional discipline in ensuring investment continuity. Capital management extends beyond liquidity considerations, encompassing a careful balance between productivity and prudence. Capital is deployed to generate optimal returns while consistently operating within defined risk boundaries. This approach ensures that every funding decision supports long-term stability and sustained execution capacity.

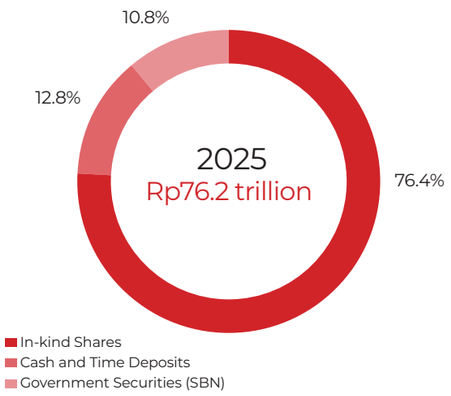

In 2025, INA consistently implemented its funding strategy by focusing on four key principles:

1. Internal funding sources were managed efficiently to optimize returns while remaining within established internal risk limits.
2. With due consideration to cash preservation, INA may utilize bank financing (leverage) to support investment needs, ensuring that borrowing structures are aligned with funding requirements and investment objectives.
3. INA continues to strengthen its credibility in both global and domestic financial markets through transparent and measured funding practices.
4. Ongoing enhancement of operational processes, governance frameworks, and risk management remains central to maintaining the quality and resilience of capital management.

Through this approach, INA's funding strategy not only supports current investment requirements, but also reinforces financial resilience and institutional flexibility amid evolving market conditions.

Internal Funding Sources

Treasury Assets Composition as of 31 Desember 2025

Internal funding sources form the foundation of sustained investment capacity. Treasury assets are managed through a balanced approach to return optimization, capital preservation, and liquidity adequacy, ensuring stability alongside ongoing investment expansion.

In managing its treasury assets, INA may also allocate a portion of its funds by engaging with external investment managers for instruments like mutual fund. INA applies a selection process for external investment managers that takes into account factors such as reputation, track record, expertise, performance, and the underlying financial asset instruments, ensuring alignment with the principles governing its treasury management.

On an aggregate basis, treasury assets in the form of cash and bonds generated an average return of 5.75% (gross) or 4.75% (net of tax) as of 31 December 2025. The market value of in-kind shares reached Rp58.2 trillion, reflecting an increase of Rp13.2 trillion or 29.3% compared to the acquisition value of Rp45 trillion. Dividend income received since the initial receipt of the share's amounts to Rp15.9 trillion.

The valuation of in-kind shares is conducted periodically, and their management takes into consideration the investment needs, underlying fundamentals, and market conditions. This approach safeguards capital productivity while preserving the flexibility required to support long-term investment priorities.

External Funding Sources

External funding serves as an instrument to expand investment capacity while maintaining disciplined risk management. A range of third-party financing options may be utilized, including bank loans (bridging, bilateral, syndicated facilities), capital markets financing (bond issuance), acquisition financing in various forms (bridging, short- or long-term loans, dividend recap), as well as asset securitization. These funding structures may be applied at the INA level, its subsidiaries/sub-holdings, or at the project level.

As an alternative source of funding, INA has banking facilities that provide additional flexibility in capital management. Such financing is extended on an unsecured basis, with competitive interest rates, and may be utilized by INA and its subsidiaries/sub-holdings in which INA holds at least 51% ownership and maintains management control. This approach ensures that investment expansion remains aligned with governance standards and defined risk controls.

Partnership as a Strategic Choice

INA does not invest alone. Partnership is not symbolic alignment, but structural design. The portfolio reflects deliberate choices made within shared governance frameworks and aligned long-term interests.

Global Strategic Partnerships

(5-Year Journey)

Total Long-Term Commitment

USD25 billion

Partnership Reach

40 strategic partners from **15 countries**

Partner Profile
- Pension Funds
- Insurance Companies
- Sovereign Wealth Fund
- Asset Managers
- Strategic Corporations
- Private Equity

Strategic Significance

Partnerships reflect global trust, strengthen capital mobilisation, and support Indonesia's long-term development.

INA is mandated to invest alongside partners, both domestic and international, as part of its operating model to mobilize capital, share risk, and strengthen governance and returns through collaboration with partners that bring proven expertise and track record.

INA plays an active role in originating and providing access to commercial and sustainable investable opportunities for strategic partners, while fostering cooperation grounded in mutual value creation. In every co-investment, INA ensures proportional risk sharing and robust risk mitigation frameworks to safeguard long-term value for all stakeholders.

Over five years, INA has earned the trust of leading investment partners, with total long-term commitments reaching USD25 billion.

INA currently collaborates with 40 strategic partners from 15 countries, including pension funds, insurance companies, sovereign wealth funds, asset managers, strategic corporations, and private equity firms. These partnerships are designed not only to attract capital inflows in the form of FDI, but also to generate operational alpha through sustainable value creation. Through collaboration with global and institutional partners having competitive strengths, investments facilitate the transfer of managerial and technical expertise, the adoption of world-class governance standards, and the application of advance technologies. This approach strengthens asset productivity and enhances industrial competitiveness in Indonesia.

More broadly, this approach aligns with global investment practices that place partnership quality and operational value enhancement as key determinants of long-term success. The presence of strategic partners with proven capabilities not only strengthens project execution and risk management, but also supports the development of industrial ecosystems, enhances local workforce capacity, and promotes sustainable job creation, generating broader economic impact for the national economy.

Managing Trust Through Process

Trust does not precede performance; it follows discipline. What sustains results is not only intention, but structure, embedded in process, governance, and risk awareness. Trust is therefore not declared; it is constructed through consistent execution.

Discipline in Every Decision

Investment Process

The investment process comprises nine principal stages, which may vary depending on asset class and transaction scenario:

01 Identification of potential investments

02 Transaction analysis and review

03 Discussion, negotiation, and agreement with prospective partners

04 Formation of platform or investment vehicle (where required)

05 Submission of Early Investment Memo (EIM)

06 Due diligence

07 Fulfilment of financing, loans, and/or guarantees

08 Submission of Final Investment Memo (FIM)

09 Closing

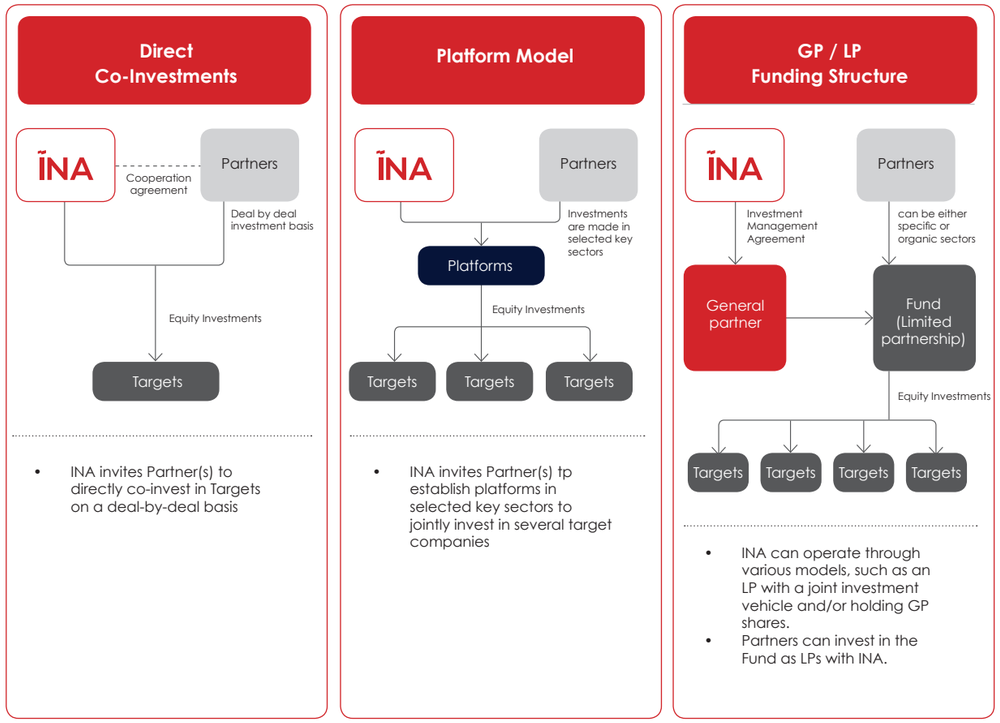

Strategic operations, legal, risk, compliance, and ESG functions are actively involved at every stage, ensuring that discipline is embedded across the full lifecycle of investment.

INA has established an Investment Committee responsible for overseeing investment execution, monitoring compliance with risk appetite, evaluating new investment strategies, and providing recommendations to the Board of Directors based on proposals submitted by the Investment Division through formal investment memo.

Investment Scheme

INA establishes structural flexibility in partnering with domestic and international investors. Investments may be executed through direct co-investment, joint platforms, Limited Partnership (LP) structures, participation as General Partner (GP), or other arrangements suited to the transaction context.

This flexibility enables balanced allocation of roles, risks, and returns, while enhancing capital acquisition and execution effectiveness. By aligning governance rights and economic interests, INA ensures that partnerships are built not merely for participation, but for sustained value creation consistent with international best practice.

INA applies defined criteria in the selection of external investment partners, including General Partners (GPs) and investment managers for fund investments. The assessment covers, among others, track record, reputation and credibility, financial and fundraising capabilities, as well as alignment of interests, commitment and consistency with INA's mandate and risk appetite. Such evaluation forms part of INA's investment and operational due diligence as well as decision-making process to support prudent and accountable investment management.

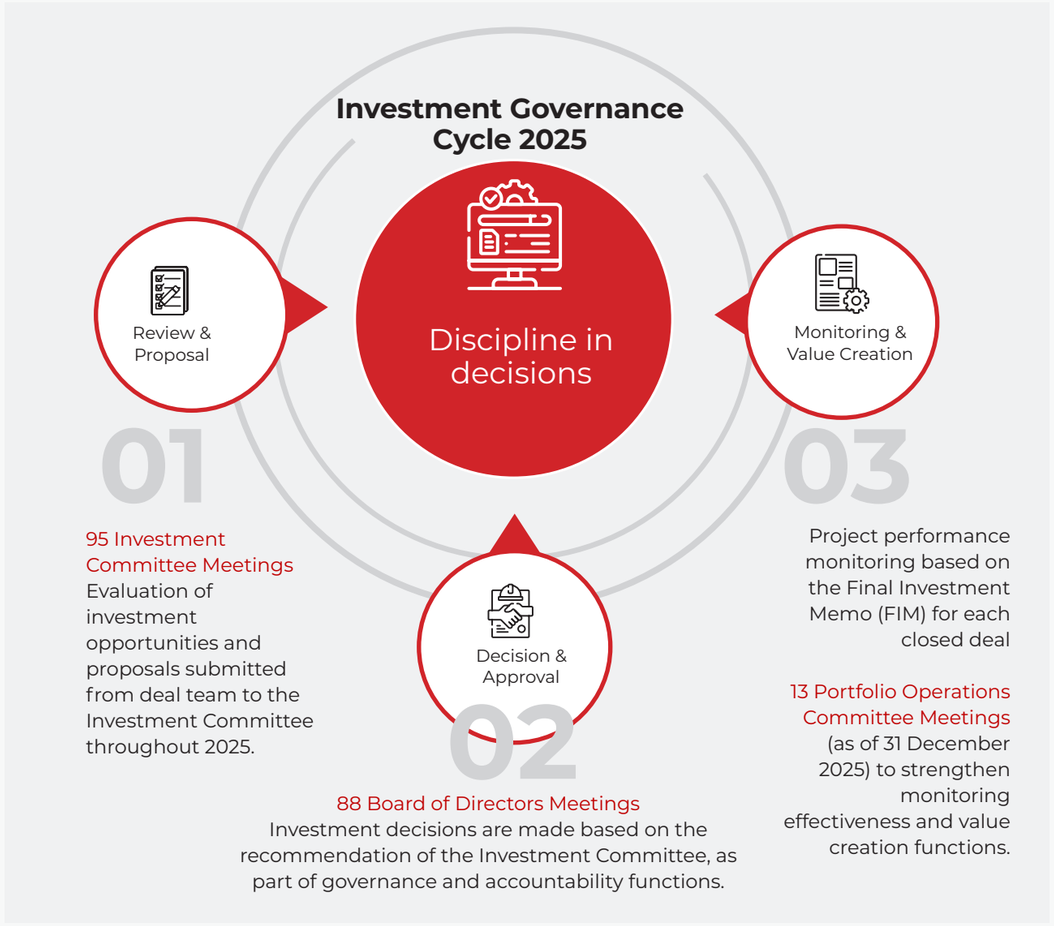

Investment Structure

INA's investment structures are designed to be adaptive, considering investment needs, asset class characteristics, project cost allocation across affiliated entities, and overall group monitoring effectiveness, while maintaining alignment with commercial, risk, compliance, and legal considerations.

Structural determination takes into account:

- Optimisation of return profile
- Dividend and/or capital gain repatriation planning
- Investment tenor (short, medium, long term)
- Sectoral and target risk level
- Value optimisation for co-investors
- Cash preservation strategy and appropriate funding mix (INA equity or external financing)

To support effective execution, INA may establish supporting corporate vehicles. As of the end of 2025, INA has formed 21 supporting corporate structures, consisting of 19 wholly owned subsidiaries/ sub-holdings and 2 joint ventures.

Governance Embedded in Structure and Process

Investment Governance

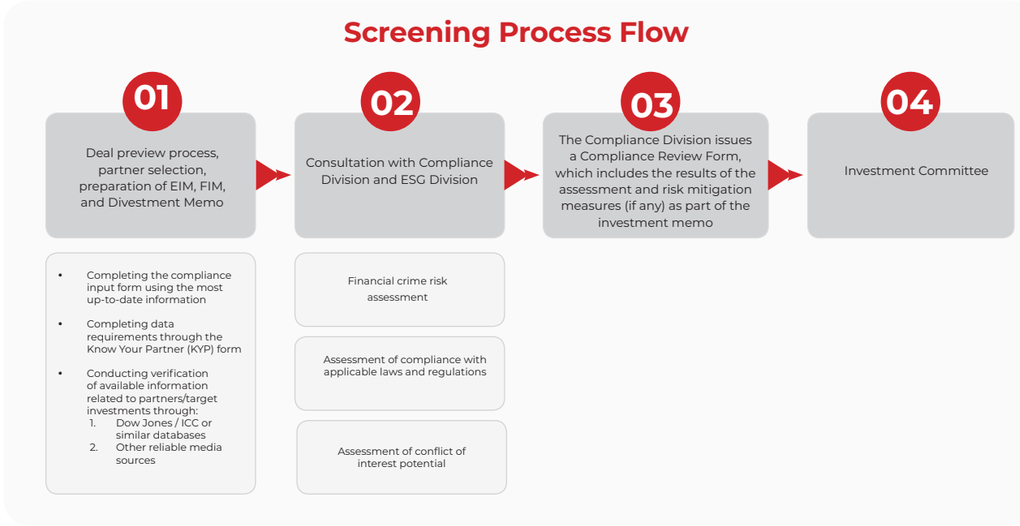

All INA investment decision-making processes refer to the Job Creation Law (Law No. 11 of 2020, as amended by Law No. 6 of 2023), Government Regulation No. 74 of 2020 concerning the Indonesia Investment Authority, Board of Directors Regulations (PDD) on investment and other relevant PDDs, as well as Supervisory Board Regulations (PDP) governing consultation procedures and reporting.

The Supervisory Board Regulations and Board of Directors Regulations are living documents, continuously reviewed and adjusted in line with relevance, institutional needs, and latest dynamics. In reference with internal provisions, PDDs are reviewed periodically at least once every two years since its establishment. In 2025, INA updated its Investment Regulation (PDD No. 8 of 2025) to broaden investment scope and further strengthen governance application.

INA conducts compliance review and screening across all investment processes, including:

1. assessment of potential conflicts of interest;
2. assessment of financial crime risks;
3. assessment of compliance with prevailing laws and regulations.

In 2025, INA conducted financial crime risk screening on investment partners, targets, and sponsors across 32 investment processes.

To ensure the effective implementation of policies and governance standards, INA conducts periodic internal audits covering both general investment processes and specific investment projects. Where necessary, internal audit may also perform advisory functions to evaluate governance practices, risk management, and mitigation frameworks within particular transactions.

Risk Management as Continuous Awareness

Risk awareness is not a response to uncertainty, but a discipline embedded in every decision. For INA, risk is not viewed as an obstacle, but as a dimension that must be understood, measured, and managed consciously. A culture of risk awareness is established as a core value, ensuring that every investment and operational step fully considers its risk implications.

INA's risk management framework comprises 5 (five) core stages:

- Establishment of Risk Appetite aligned with business strategy, investment strategy, and inherent operational and investment risks.
- Risk identification and assessment, including emerging risks and shifts in risk profiles arising from new investments or business changes.
- Risk mitigation through controls designed to reduce measured risk exposures.
- Risk monitoring to identify material changes or new risks.
- Risk reporting to the Supervisory Board, Board of Directors, and investors to ensure adequate understanding on risk exposures and its mitigations.

Investment Risk Management

Investment risk is inherent to INA's primary mandate. To ensure adequate control, INA strengthens both first-line and second-line oversight through integrated, comprehensive, and consistent investment processes, supported by enhanced risk management tools.

The Risk Division is involved from pre-entry evaluation through post-entry monitoring at both transaction and portfolio levels.

Transaction Level:

- Risk review and mitigation are conducted through evaluation of Early Investment Memo (EIM), Final Investment Memo (FIM), Final Divestment Memo (FDM), and due diligence findings, with outcomes discussed in the Investment Committee and/or Risk Management Committee.
- Periodic monitoring ensures mitigation effectiveness and identifies emerging risks, reported monthly to the Portfolio Operations Committee.

Portfolio Level:

- Pre-entry risk measurement ensures aggregate exposure remains aligned with risk appetite and long-term strategy.
- Stress testing at both deal and enterprise levels maintains readiness under adverse scenarios.
- Formulation of a forward-looking Investment Risk Dashboard to support adaptive, risk-based allocation investments.
- Macroeconomic monitoring to develop early warning indicators of potential industry impacts.
- Refinement of risk assessments through back-testing, benchmarking, stress-testing tools, and investment valuation oversight.

Sustainability of INA

Responsible Investment

Sustainability of INA

Responsible Investment as the Foundation for Value Creation and Long-Term Impact.

Sustainability at INA is an integral part of how we invest and operate. By integrating ESG principles into our strategy, governance, and day-to-day operational practices, we ensure that current performance not only delivers sustainable impact, but also strengthens organizational resilience and accountability.

Our Conviction

Responsible Investment is an integral part of INA's governance and investment strategy in ensuring the achievement of its dual mandate, namely optimizing returns while contributing to sustainable national development. The integration of environmental, social, and governance (ESG) aspects is carried out in a structured manner across all stages of the investment process to strengthen risk management, enhance quality of investment decision-making, and maintain resilience and competitiveness of portfolio amid evolving economic and regulatory dynamics.

Beyond that, Responsible Investment also serves as a lever for sustainable long-term value creation and impact. Through the application of strong governance, the conduct of comprehensive due diligence, as well as credible monitoring and measurement of sustainability impacts, INA believes in its ability to consistently deliver optimal returns while contributing meaningfully to sustainable development and economic growth.

The year 2025 marked an important milestone for INA in implementing long-term impact measurement across its investment portfolio. During the year, INA began conducting comprehensive impact assessments on selected strategic investments in the toll road and port sectors, forming a foundation for strengthening the framework for monitoring, evaluation, and asset management going forward. At the same time, INA consistently monitors environmental, social, and governance performance across its other portfolio companies through structured and active engagement, as well as oversight of key metrics to ensure accountability, transparency, and continuous improvement across its investment ecosystem.
.

Our Approach

Sustainability is a core principle underpinning our investment decision-making, portfolio monitoring, and overall operational activities. Our Responsible Investment framework is built on three interrelated pillars: ESG Integration, Active Ownership, and the Development of Green Investment Sectors. These pillars reflect our commitment to aligning financial performance with long-term value creation, while supporting the transition toward a low-carbon development agenda.

We adhere to established internal policies and sustainability frameworks to ensure that ESG considerations are systematically integrated across the entire investment cycle. This disciplined approach is not only intended to safeguard investment value, but also to drive long-term value creation in alignment with INA's investment mandate.

ESG Integration

Material ESG factors are considered at every stage of the investment process. Apart from strengthening risk management, this approach enables us to identify opportunities for sustainable value creation across our portfolio.

Active Ownership

As a shareholder, INA leverages its role, in line with its level of influence, to drive the long-term performance of its portfolio companies. This is carried out through engagement and collaboration with portfolio companies to strengthen governance practices and the management of sustainability-related risks and opportunities.

Green Investment Sector Development

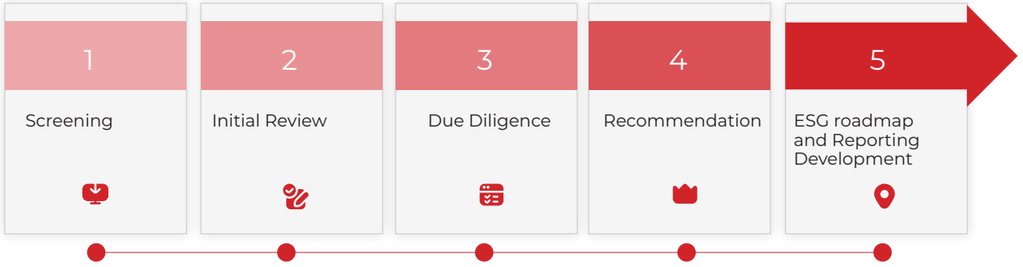

We are committed to directing investment toward sectors that support the low-carbon transition, including clean energy development and nature-based solutions. By doing so, INA supports efforts to address climate change.

ESG Integration Across Investment Lifecycle

We conduct ESG risk and opportunity assessments from the early stages of investment evaluation. For INA, ESG integration serves as an approach to assess the quality and long-term resilience of investments.

We recognise that ESG risk profiles differ across sectors and transactions. Accordingly, we apply a materiality-based analysis to determine the most relevant issues, taking into account business characteristics, operational geography, supply chain structures, and other significant factors. This materiality-driven approach ensures that our focus remains directed toward matters that truly influence performance and the sustainability of the investment.

Pre-Transaction

ESG Screening, Initial Review, and ESG Due Diligence (1, 2, 3)

The process begins with screening against INA's exclusion list. This is followed by ESG due diligence or assessment to identify material risks as well as potential areas for sustainable value creation within the target company.

ESG Recommendations (4)
Material ESG findings and recommendations form part of the investment deliberation process and, where relevant, are integrated into transaction documentation.

Post-Transaction

ESG Roadmap Development and Reporting (5)

Following the investment, INA collaborates with portfolio companies to develop ESG roadmaps and targets aligned with the investment structure and level of ownership. Sustainability performance is reported periodically by portfolio companies based on agreed arrangements. INA monitors and communicates ESG performance progress to stakeholders on a proportional basis, in line with its ownership stake and level of control.

ESG Focus Areas

INA prioritizes 12 ESG focus areas as guidance in the screening and due diligence process, as well as a reference for determining key monitoring areas to assess the progress of portfolio companies. These focus areas serve as a structured framework to ensure that material sustainability aspects are consistently and comprehensively considered in every investment.

We also recognize that each sector presents distinct ESG characteristics and risk profiles. As such, we consider sector-specific focus areas or metrics where relevant, allowing our oversight and engagement to remain both contextual and responsive to the dynamics of each investment.

- GHG Emissions & Air Pollutants
- Health & Safety
- Energy Management
- Engagement, Diversity & Inclusion
- Water Management
- Community Engagement
- Waste Management
- Workforce & Economic Growth
- Ecological Impact
- Business Model Resilience
- Labor Practices & Training
- Business Ethics & Anti-Corruption

Active Ownership

Active Ownership reflects INA's commitment to exercising its stewardship role comprehensively and sustainably. Through structured engagement, we promote strengthened governance, institutional discipline, and long-term value creation within portfolio companies.

Corporate Governance
We promote the implementation of sound governance principles supported by adequate policies and mechanisms, including codes of conduct, anti-bribery and anti-corruption policies, and effective whistleblowing channels. These instruments serve as the ethical foundation in fostering long-term performance.

Board Oversight
We encourage an active and accountable role of the Board of Directors in providing direction, overseeing strategy, and ensuring that ESG matters are managed with transparency and responsibility. Strong board oversight is essential to embedding sustainability into corporate decision-making.

Human Resource
We foster the development and implementation of strategies that cultivate a competent and diverse workforce, while fostering an inclusive and safe working environment. Human resource remains a key enabler of long-term resilience and innovation.

Sustainability Management
We work with portfolio companies to formulate and execute structured sustainability strategies, including energy efficiency improvements, greenhouse gas emissions control, and strengthened whistleblowing mechanisms. These efforts are directed at strengthening operational discipline and promoting responsible growth.

Throughout 2025, INA introduced the ESG Portfolio Monitoring System as a centralized platform to manage, develop, and monitor sustainability data from portfolio companies in a more structured and well-documented manner, strengthening transparency and oversight across the portfolio.

2025 Data Collection Process

To measure progress in sustainability performance, INA conducted its annual survey of portfolio companies that have been under ownership for at least one year. This threshold ensures that assessments are grounded in sufficient operational experience and tangible observation.

Data collection encompasses both quantitative and qualitative indicators, which are further complemented through direct discussions and ongoing collaboration with portfolio company management. This approach enables us to move beyond reporting formality toward substantive understanding.

Through this data-driven methodology, INA is able to monitor progress consistently and identify priority areas for improvement, particularly in corporate governance, human resource management, and sustainability strategy. The objective is not only to measure performance, but to strengthen institutional discipline and long-term value creation across the portfolio.

INA ESG Survey 2025 Highlights*

The 2025 ESG Survey reflects the tangible social and governance footprint of INA's portfolio companies. Beyond metrics, these figures represent livelihoods supported, inclusivity strengthened, and institutional discipline that are continually reinforced.

11 ESG performance topics covered	**100%** response rate from key companies	**89%** of companies with sustainability policies	**61%** of women in the workforce
>6,100 jobs supported	**0%** employee workplae fatality cases	**44%** of key companies with women representative on Board of Directors	**67%** companies have board-level oversight on ESG topics
78% of employees received training	**89%** of companies have a good corporate governance (Code of Conduct/ Whistleblowing System/ Anti Bribery Corruption) policies	Approximately 11% of portfolio companies are covered under the group sustainability commitment. Across all entities, capacity-building efforts remain a priority, with total training hours exceeding 152,200 over the reporting period.	

*) The information presented covers key entities in which INA is a shareholder, noting that the portfolio is dynamic and subject to year-on-year changes.

Portfolio Highlights (Case Studies)

Throughout 2025, all completed transactions underwent comprehensive ESG integration. Screening, due diligence, and the formulation of ESG recommendations formed an inseparable part of the investment decision-making process. For INA, ESG consideration is not a procedural layer, but a discipline that safeguards both value and responsibility.

Our focus lies in identifying material ESG issues to ensure that assessments are targeted, proportionate, and grounded in substance.

Where an investment opportunity passes the initial screening stage, a more comprehensive and in-depth due diligence process is conducted to evaluate risk exposure and long-term value enhancement potential.

In carrying out this process, INA may engage independent technical advisers to support the identification of additional material risks and the formulation of appropriate mitigation measures. Where relevant to the nature of the investment, additional assessments, including climate risk assessments, may also be integrated into the ESG due diligence process.

Highlight: PT Rafflesia Investasi Indonesia (RII)

PT Rafflesia Investasi Indonesia (RII) became one of the first toll road operators in Indonesia to report its sustainability performance through the GRESB assessment. GRESB is a globally recognized standard and benchmark used to evaluate the sustainability performance of companies, infrastructure and real estate assets, as well as investment funds.

The GRESB assessment evaluates how organizations manage environmental, social, and governance (ESG) aspects, including the management of emissions, energy, water, waste management, occupational health and safety, and responsible governance practices. The results serve as a reference point for investors and stakeholders to compare sustainability performance across entities, while driving continuous improvement in ESG practices.

In its first reporting, PT RII achieved a score of 71 out of 100, reflecting a strong initial commitment to implementing and transparent sustainability practices. This milestone represents not only compliance with an international benchmark, but also a key step toward institutionalizing sustainability within Indonesia's toll road infrastructure sector.

Supporting SDGs:

Highlight: PT Belawan New Container Terminal (BNCT)

***Tumbuh Bersama* Program (Growing Together Program)** represents a collaborative initiative between BNCT, Pelindo, and the DP World Foundation, aimed at developing a green, inclusive, and sustainable port while delivering tangible benefits to the Belawan community. The program encompasses a range of social and environmental initiatives, including mangrove planting to support coastal ecosystem preservation and the enhancement of educational facilities for local communities. Through this initiative, port development is not only focused on infrastructure expansion, but also delivers tangible social and environmental benefits to surrounding communities.

From a governance and performance management perspective, BNCT has integrated an ESG monitoring system that captures key metrics, including environmental footprint, employment and labor practices, and governance aspects. This structured approach ensures that operational management remains aligned with measurable and transparent sustainability standards, reinforcing accountability across the organization.

DP World's sustainability commitment that has been validated through the Science Based Targets initiative (SBTi), further guides operational management, with group-level targets cascaded down to regional levels, including Asia Pacific. Decarbonization remains a strategic priority, pursued through the progressive electrification of operations and continuous efforts to reduce carbon intensity.

Supporting SDGs:

Green Investment Sector Development

INA regards green investment as an essential aspect of its long-term mandate. The transition toward a low-carbon economy is not viewed merely as an environmental imperative, but as a strategic pathway to resilient and future-oriented growth. As such, we are committed to allocating capital toward sectors that support this transition.

We actively evaluate and participate in investments that advance energy transition initiatives, renewable energy development, and the sustainable utilization of natural capital to strengthen environmental resilience. These investments are assessed not only for their financial viability, but also for their structural contribution to climate mitigation and adaptation.

We believe that investments in this sector support both global and national sustainability agendas while unlocking sustainable growth opportunities for Indonesia. Through this approach, INA seeks to act as a catalyst in accelerating investments aligned with sustainable development objectives and climate resilience.

Supporting SDGs:

INA continues to align its efforts, including its investment strategy, in support of the Government of Indonesia's commitment to achieve Net Zero Emissions by 2060, while considering long-term sustainable value creation opportunities.

Responsible Investment Governance

The Responsible Investment Framework outlines the structured approach we apply to integrate environmental, social, and governance (ESG) considerations into investment management. Through ESG integration across the entire investment cycle, INA is able to safeguard investment value while generating sustainable long-term benefits.

Sustainability principles at INA are upheld through a clearly defined governance structure that engages multiple functions across the organisation. Strategic direction, execution of initiatives, and oversight of ESG considerations are coordinated and integrated, reflecting our belief that responsible investment must be institutionally anchored, and not solely dependent on a single division.

The Board of Directors oversees the sustainability agenda as an integral component of overall corporate strategy. Within the investment process, the Investment Committee considers material ESG risks and opportunities as part of its deliberative decision-making process, ensuring that environmental and social factors are considered alongside other aspects.

ESG Division collaborates intensively with the Investment Division, the Strategic Operations Division, and other relevant functions to ensure that ESG matters are identified at the earliest stage of a transaction, adequately analyzed, and managed continuously throughout the holding period. This process includes ESG due diligence, the integration of material findings into investment analysis, and active engagement with portfolio companies to strengthen their sustainability practices over time.

	Corporate Level	Investment Process
Oversight	Board of Directors	Investment Committee
Accountability	ESG Division	ESG Division and Investment Division
Implementation	All corporate organs with supervision by ESG Division	ESG Division, Investment Division, and Strategic Operations Division

Sustainability in INA Operations

Sustainability in INA's operations begins with internal discipline. By managing our environmental footprint, strengthening governance practices, and investing in our people, we ensure that responsibility is embedded not only in where we invest, but in how we operate.

Sustainability Integration in INA Operations Process

INA integrates ESG principles not only within its investment processes, but also consistently across its internal operations. For INA, sustainability is not a regulatory obligation to be fulfilled, but a long-term strategic orientation that shapes how value is created and preserved for all stakeholders.

As such, we actively monitor and manage key ESG indicators within our operations, including greenhouse gas emissions (Scope 1 and Scope 2), workforce diversity, competency development through structured training programs, and the strengthening of governance practices. These dimensions reflect the conviction that institutional credibility begins with strong internal governance. These indicators serve as a foundation for assessing and continuously improving operational performance, ensuring that organizational growth remains aligned with industry best practices and global expectations of responsible business.

GREEN HOUSE GAS EMISSIONS
INA is committed to implementing more environmentally responsible operational practices through structured measures in managing and reducing greenhouse gas emissions arising from corporate activities. We believe that transparent reporting, coupled with consistent emission reduction efforts, is essential to generating tangible and sustained impact.

In 2025, INA continued the utilization of electric vehicles to reduce emissions associated with fuel consumption from operational transportation (Scope 1). This initiative was pursued alongside growing operational demands, ensuring that efficiency and sustainability remain balanced and mutually reinforcing.

These efforts reflect INA's ongoing commitment to understanding, measuring, and progressively reducing the Company's carbon footprint, while strengthening our role as a responsible investor contributing to a cleaner energy transition.

For 2025, INA recorded a Scope 1 and Scope 2 carbon intensity of 0.06 tCO_2e/FTE/year calculated using the market-based method.

Description	2023	2024	2025
Scope 1 (tonnes CO2-e) Total emissions from fuel consumption of operational vehicles	4.7	5.0	4.7
Scope 2 (tonnes CO2-e)* Total emissions from electricity consumption for office operations	0	0	0

*market-based method

INA SUSTAINABILITY INITIATIVES
As part of our commitment to reducing Scope 2 emissions, INA has begun purchasing Renewable Energy Certificates (RECs) issued by PLN. RECs are market-based instruments that enable companies to claim that their electricity consumption is sourced from renewable energy, while simultaneously supporting the acceleration of Indonesia's clean energy transition.

Why Scope 2 Matters
Scope 2 emissions represent indirect emissions arising from a company's electricity consumption. By ensuring that the electricity used in our operations is aligned with renewable energy through RECs, INA contributes to reducing its operational carbon footprint and strengthening demand for clean energy at the national level.

As of the publication of this report, INA has secured RECs equivalent to its operational electricity consumption during the period of 2023 and 2025. This step reflects our continued commitment to carrying out more sustainable practices within our corporate operations. Looking ahead, INA will also support portfolio companies in measuring and managing Scope 1 and Scope 2 emissions, aligned with the transition toward a low-carbon economy.

This initiative aligns with SDG 13: Climate Action, which underscores the importance of concrete efforts to reduce greenhouse gas emissions, and SDG 7: Affordable and Clean Energy, which promotes wider access to and adoption of clean energy. Through this action, INA contributes not only to greener internal operations, but also to foster sustainable energy ecosystem in Indonesia.

Occupational Health and Safety
INA is committed to creating a safe, healthy, and comfortable working environment for all employees, in line with Law No. 1 of 1970 on Work Safety. Hazard identification and emergency response are managed through structured procedures and transparent incident reporting. To ensure preparedness for emergency situations, INA has established an emergency response unit and conducts dedicated training for employees engaged in emergency handling and medical support.

This commitment is reflected in the absence of workplace safety incidents resulting in serious injuries within INA's work environment throughout 2025.

Social Impact Assessment

> Our Social Impact Assessment affirms that infrastructure investment must extend beyond financial returns. Through rigorous, data-driven evaluation, INA ensures that each strategic asset contributes to connectivity, job opportunity expansion, and long-term socio-economic value for Indonesia.

In 2025, INA collaborated with the Institute for Economic and Social Research, Faculty of Economics and Business, Universitas Indonesia (LPEM FEB UI) to prepare the Socio-Economic Impact Report of INA's Investment Portfolio. The assessment evaluates the long-term impact of INA's strategic infrastructure investments on communities, regional connectivity, and Indonesia's sustainable development.

The preparation of this study reflects INA's commitment to ensuring that investments deliver not only financial returns, but also measurable and sustainable Socio-Economic benefits. Through a data-driven approach covering both construction and operational phases, the assessment evaluates the contribution of investments to job creation, enhanced economic access, improved public service efficiency, and strengthened governance and environmental quality.

During the reporting year, the evaluation focused on two major infrastructure assets: the Bakauheni–Terbanggi Besar (BTB) Toll Road and the Belawan New Container Terminal (BNCT).

Bakauheni - Terbanggi Besar (BTB) Toll Road

The 141-kilometre Bakauheni–Terbanggi Besar (BTB) Toll Road represents the first section of the Trans-Sumatra Toll Road, connecting Bakauheni Port with Central Lampung. This infrastructure plays a critical role in enhancing interregional connectivity across Sumatra and accelerating the mobility of people and the distribution of goods.

From a social perspective, improved connectivity has directly impacted public access to economic centres, healthcare services, education, and other essential public facilities. The significant reduction in travel time, from approximately five hours to less than two hours, has increased economic efficiency while opening broader business opportunities for MSMEs in the connected regions.

> Based on the LPEM FEB UI study covering the period 2015–2067, the project is projected to support approximately 20,000 jobs per year, both directly and indirectly, and demonstrates an EBCR of 2.59. In addition, travel efficiency is estimated to generate cumulative cost savings exceeding Rp170 trillion, contributing to logistics price stability and strengthening regional competitiveness.

Regions directly connected by the toll road have demonstrated stronger economic dynamism and higher activity growth compared to those not connected, reflecting the role of infrastructure in reducing interregional development disparities.

From a sustainability perspective, improved travel efficiency is estimated to contribute to a reduction of approximately 1.6 million tons of CO_2 emissions, along with lower particulate matter (PM_{10}) emissions over the analysis period. The implementation of the Electronic Traffic Law Enforcement (ETLE) system has also enhanced road safety and transport governance, reinforcing public trust in toll road infrastructure as a reliable and transparent public service.

Belawan New Container Terminal (BNCT)

Belawan New Container Terminal (BNCT), located along the strategic Malacca Strait shipping lane, plays a significant role in strengthening national logistics connectivity and enhancing Indonesia's access to international markets through the development of direct call services.

The expansion of the terminal has increased its capacity from 600 thousand TEUs to 1.4 million TEUs, supported by a strategic partnership with DP World. In addition to reinforcing Indonesia's position within global trade networks, this development also broadens economic opportunities for domestic businesses through more efficient and competitive distribution access.

> Based on the LPEM FEB UI study covering the period 2016–2072, BNCT is projected to support approximately 4,400 jobs per year and demonstrates an EBCR of 1.90. The project is also estimated to generate cost savings of approximately Rp60 trillion through improved shipping efficiency and reduced terminal service costs.

From a social perspective, the revitalization of BNCT has stimulated increased economic activity in the surrounding port area, including growth in logistics, transportation, and other supporting service sectors. Enhanced labor mobility and improved access to goods and commodities strengthen supply chain resilience and contribute to regional economic stability.

From an environmental and governance standpoint, improved operational efficiency and route optimization are estimated to contribute to a reduction of approximately 3.4 million tons of CO_2 emissions over the analysis period. The implementation of a Terminal Operating System (TOS), weight bridge integration, and strengthened cybersecurity and occupational safety standards have further enhanced operational reliability and port governance quality.

Global Engagements and Strategic Partnerships

Throughout 2025, INA actively participated in various regional and global forums, including the Official Monetary and Financial Institutions Forum (OMFIF), Southeast Asia Institutional Investment Forum (SEAIIF), IFSWF Annual Meeting, AVCJ Private Equity Forum, and Milken Institute Asia Summit. This engagement reflects INA's commitment to continuously strengthening its strategic perspective amid market dynamics, shifting capital cycles, and evolving expectations on ESG practices and governance.

Across these forums, INA emphasized the importance of portfolio resilience, cross-cycle investment discipline, and ESG integration throughout investment cycle, from origination to post-investment monitoring. Discussions also highlighted the need for strong governance, operational independence, transparency, as well as partnership models capable of attracting sustained private capital participation.

At the portfolio level, INA's partnerships are realized through strategic collaboration with global partners and local governments in developing priority assets. This approach ensures that investments not only enhance economic competitiveness and national connectivity, but also support measurable social and environmental contributions.

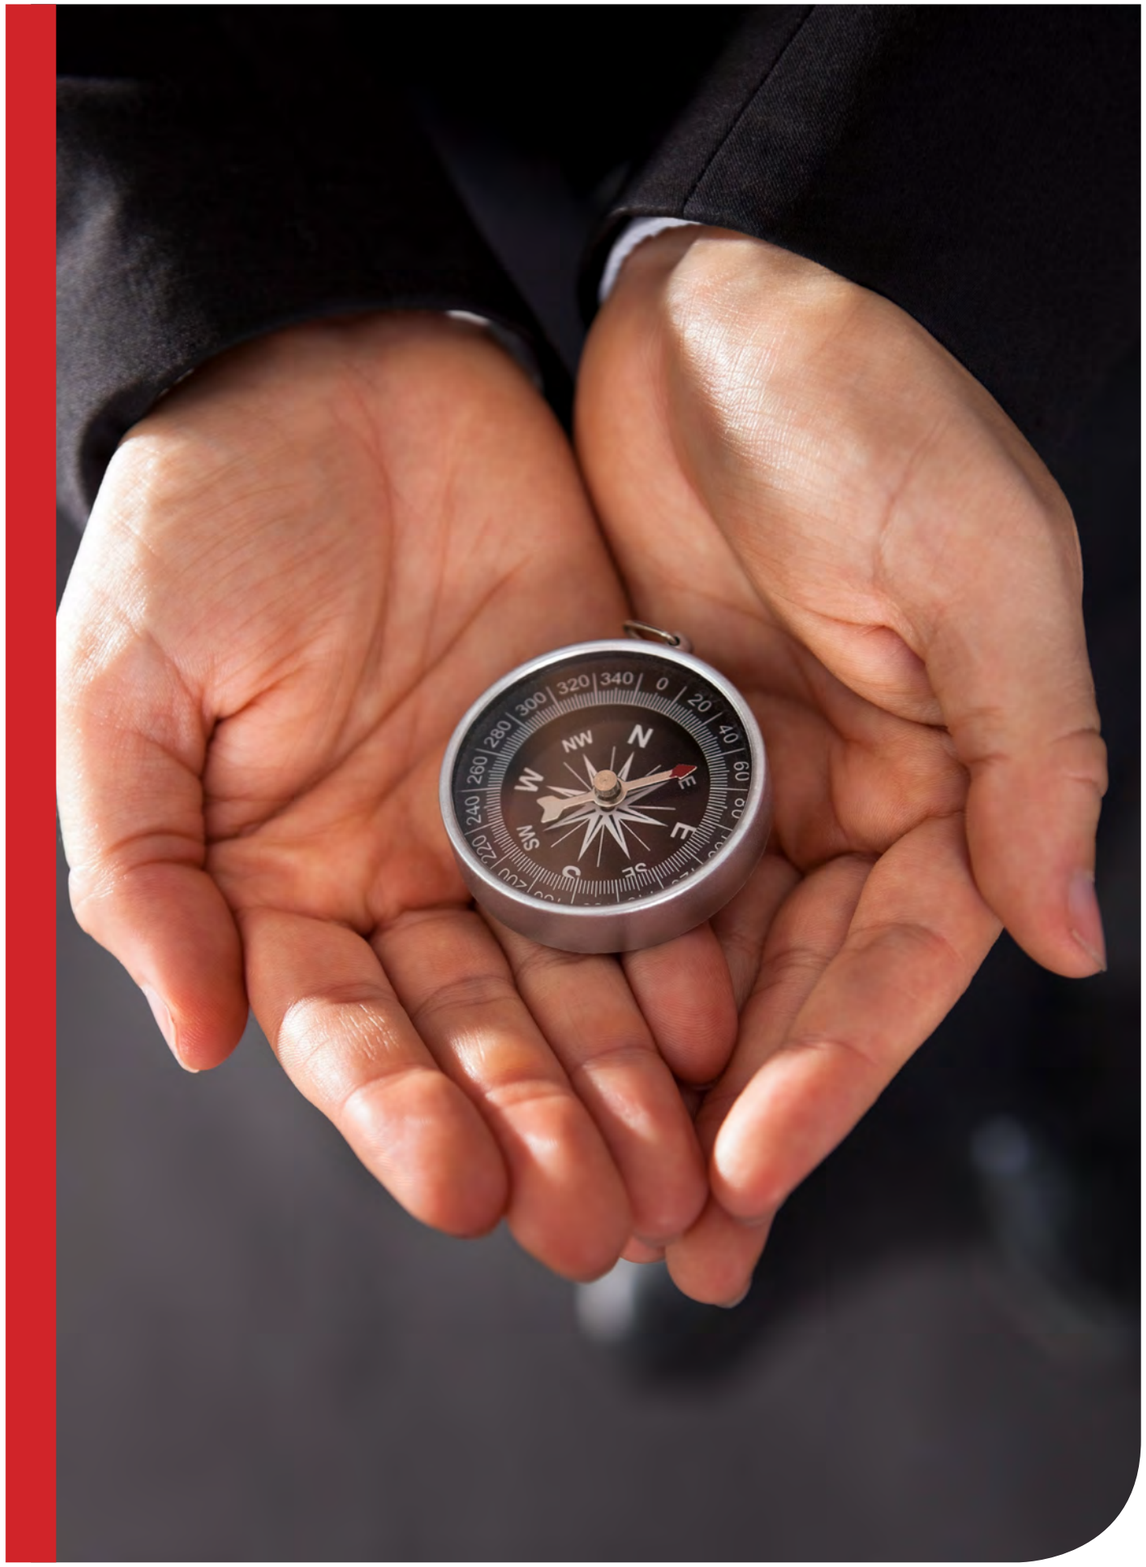

Through structured and trust-based partnerships, INA continues to strengthen its role as a credible, adaptive, and responsible long-term investor in supporting Indonesia's sustainable economic growth.

Cross-Reference of Disclosures to GRI 2021 Standards

INA adopts the GRI (Global Reporting Initiative) 2021 Standards as one of the references in preparing sustainability disclosures on selected material topics in this Annual Report. The application of this reference takes into account INA's characteristics and context as a sovereign wealth fund. This step represents an initial effort to progressively align sustainability disclosures with broader practices, ensuring that the information presented is more structured and relevant to stakeholders.

Governance and Integrity

Institutional Governance

Trust stands at the core of INA's governance commitment. The governance provides the framework through which authority is exercised, decisions are overseen, and accountability is upheld across all activities. Not merely a compliance requirement, governance functions as an institutional discipline that ensures integrity, transparency, and responsibility in every investment decision and organizational action.

INA was established as an independent and professional institution to carry out its mandate in a comprehensive and accountable manner. Independence is not merely an institutional status, but a foundation that safeguards objectivity in every decision-making. Professionalism extends beyond technical competence; it reflects a disciplined, transparent, and long-term commitment in serving the nation's interests.

Within the governance context, these principles are embedded through structured oversight, policies, and control mechanisms. Overall, INA's governance serves as both a value foundation and a control system, ensuring that authority is exercised with accountability, decisions are properly overseen, and all organizational actions remain aligned with its mandate and the trust entrusted to the institution.

Governance Structure

INA's governance structure ensures clear roles and responsibilities, as well as accountability in decision-making across the organisation. This clarity establishes a balance between oversight and management functions, enabling effective supervision without compromising independence.

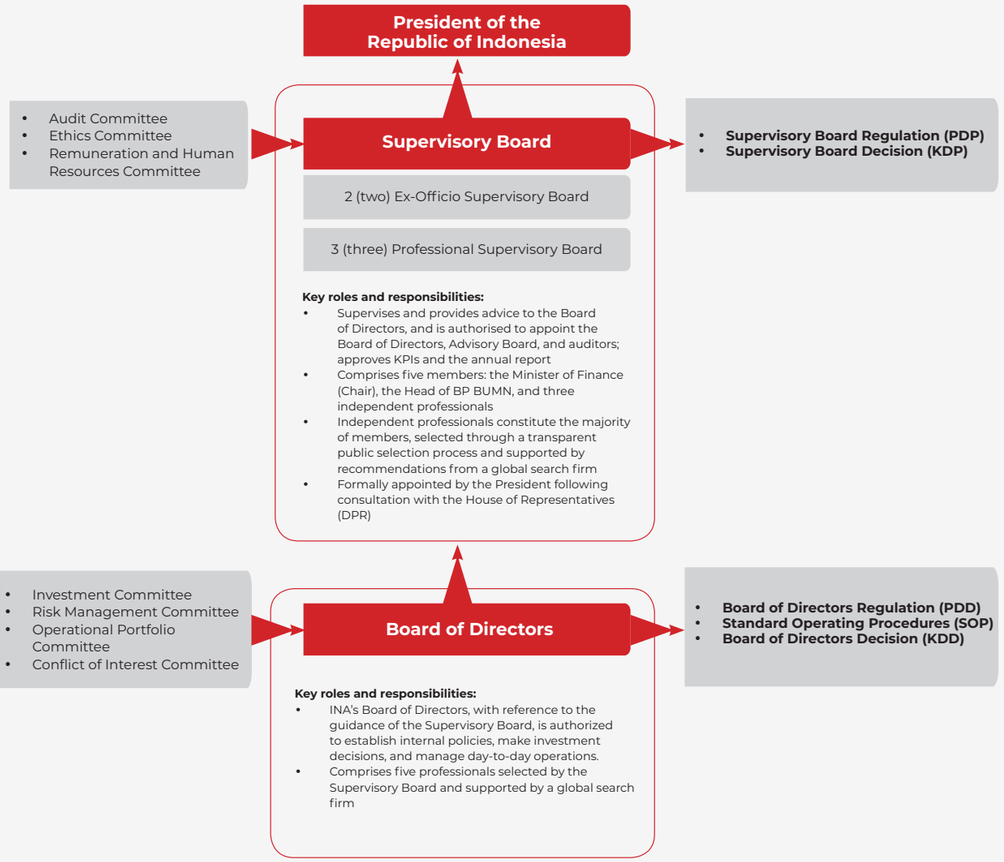

The interaction between the Supervisory Board, and the Board of Directors is built on mutual reinforcement and constructive checks and balances. This dynamic promotes independent oversight, accurate decision-making, and consistent with INA's dual mandate. Governance is therefore positioned not as administrative formality, but as an operating discipline that shapes conduct, safeguards integrity, and strengthens institutional credibility over time.

Governance Legal Foundation and Architecture

As an embodiment of the State's mandate, INA's governance structure is built on a strong legal foundation and designed to ensure institutional independence. In accordance with the Job Creation Law (Law No. 11 of 2021, as superseded by Law No. 6 of 2023) and Government Regulation No. 74 of 2020 concerning the Indonesia Investment Authority, INA's governance and compliance structure is established as a two-tier board that reports directly to the President of the Republic of Indonesia.

This framework is designed not only to fulfil regulatory requirements, but also to ensure that strategic decisions are made independently, professionally, and align with global industry best practice standards. With this foundation, INA governance reinforces its commitment to integrity, accountability, and long-term credibility.

INA Governance Structure

Board Oversight and Committees

Within a sound governance architecture, oversight is not merely a function but a moral responsibility to safeguard the institution's direction and integrity. Committees under the Supervisory Board and the Board of Directors are established as focused, expertise-based extensions of oversight, ensuring that each strategic area receives proportionate and in-depth attention.

Through specialized oversight functions, the committees review critical aspects such as risk, audit, investment, and governance practices. This approach enables more comprehensive deliberation of complex matters, ensuring that every decision is made with careful consideration of risk exposure, compliance, and its long-term implications.

Oversight is exercised through periodic review mechanisms, structured discussions, and accountable reporting. As such, the committee structure not only strengthens the control system but also reinforces a culture of responsibility and prudence at every level of the organization.

SUPERVISORY BOARD

The Supervisory Board serves as the organ responsible for overseeing the management of INA by the Board of Directors, ensuring that all policies and decisions remain aligned with the mandate, prudential principles, and established governance standards. In carrying out these responsibilities, the Supervisory Board is supported by Committees and a Secretariat that enhance the effectiveness of its review and coordination functions.

Supervisory Board Regulations
The oversight framework is set out in the Supervisory Board Regulations, which comprise 13 policies, including those related to operational oversight, ethical guidelines, and decision-making procedures. The latest update to the Supervisory Board Regulations was conducted in September 2025, reflecting a commitment to continuous governance refinement.

Supervisory Board Meetings
The Supervisory Board periodically convenes Supervisory Board meetings to deliberate and decide on matters within its duties and authority, with all proceedings formally documented in the minutes of meeting. As part of its oversight function, such meetings may invite the Board of Directors to present agendas related to INA's operations. As of 31 December 2025, the Supervisory Board had convened 13 (thirteen) Supervisory Board Meetings, 5 (five) of which included the participation of the Board of Directors. In addition, the Professional Supervisory Board regularly convened progress monitoring meetings with the Board of Directors to review performance and investment achievements, including discussions on specific issues requiring consultation with the Supervisory Board, for a total of 20 (twenty) meetings.

Supervisory Board Composition
The composition of Supervisory Board consists of:
1. The Minister of Finance, serving as Chairman and Ex-officio Member of Supervisory Board.
2. The Head of SOE Regulatory Agency (BP BUMN), serving as an Ex-officio Member of Supervisory Board.
3. 3 (three) members from professional backgrounds.

Members of the Supervisory Board are appointed and dismissed by the President. The term of office for Supervisory Board members is 5 (five) years (except for the first year of INA's establishment) and members may be reappointed for one additional term.

The composition of Supervisory Board is as follows:

Chairman of Supervisory Board Ex-officio Member of Supervisory Board	Purbaya Yudhi Sadewa
Ex-officio Member of Supervisory Board	Dony Oskaria
Professional Member of Supervisory Board	Haryanto Sahari
Professional Member of Supervisory Board	Darwin Cyril Noerhadi*
Professional Member of Supervisory Board	Erwandi Hendarta

*) Term of office ended effective 22 January 2026 based on Presidential Decree No. 11/P of 2026, and was replaced by Fauzi Ichsan based on Presidential Decree No. 27/P of 2026 for the 2026-2031 term, effective as of 4 March 2026.

Supervisory Board Profiles

Purbaya Yudhi Sadewa

Chairman of Supervisory Board
Ex-officio Member of Supervisory Board

He is an Indonesian national known as an economist and technocrat with extensive experience in the public sector and national financial markets. He currently serves as the Minister of Finance of the Republic of Indonesia based on Presidential Decree No. 86/P of 2025 dated 8 September 2025.

Previously, he served as Chairman of the Board of Commissioners of the Indonesia Deposit Insurance Corporation from September 2020 to September 2025. His government career includes various strategic positions, among others as Deputy for Coordination of Maritime Sovereignty and Energy at the Coordinating Ministry for Maritime Affairs and Investment; Special Staff for Economic Affairs at the Coordinating Ministry for Maritime Affairs, the Coordinating Ministry for Political, Legal and Security Affairs, and the Coordinating Ministry for Economic Affairs; Deputy III for Strategic Issues Management at the Presidential Staff Office of the Republic of Indonesia; as well as Member of the National Economic Committee. He has also been active in various national economic forums and organizations, including as a Member of the Advisory Board of the Indonesian Chamber of Commerce and Industry and the Indonesia Economic Forum.
Prior to his public service career, he began his professional journey as a Field Engineer at Schlumberger Overseas SA, and subsequently pursued a career at Danareksa Research Institute as Senior Economist and Chief Economist. He also served as President Director of PT Danareksa Securities and Member of the Board of Directors of PT Danareksa (Persero), with extensive experience in economic research, capital markets, and corporate management.

He holds a Bachelor's degree in Electrical Engineering from the Institute of Technology Bandung (ITB), as well as a Master of Science (MSc) and a Doctorate in Economics from Purdue University, Indiana, United States.

Dony Oskaria

Ex-officio Member of Supervisory Board

He is an Indonesian national who serves as the Head of the State-Owned Enterprises Regulatory Agency (BP BUMN) since 8 October 2025, based on Presidential Decree No. 109/P of 2025 on the Appointment of the Head and Deputy Head of the State-Owned Enterprises Regulatory Agency. In this capacity, he serves a strategic role in strengthening governance, overseeing performance, and shaping the direction of SOE transformation to ensure long-term value creation and national competitiveness.

Previously, he was widely recognized for his role in transforming Indonesia's tourism sector during his tenure as President Director of InJourney from 2021 to 2024. Under his leadership, consolidation and strengthening of the aviation and tourism ecosystem were carried out. His leadership experience also includes roles as CEO of Hospitality & Entertainment at CT Corp, Commissioner of PT Garuda Indonesia (Persero) Tbk, Vice President Director of PT Garuda Indonesia (Persero) Tbk, and Member of the National Economic and Industry Committee (KEIN).

He obtained a Bachelor's degree in International Relations from University of Padjadjaran in 1996 and a Master of Business Administration (MBA) from the Asian Institute of Management, Philippines, in 2009. The combination of corporate and public policy experience further reinforces his capacity to advance structural reform and drive the sustainable transformation of SOEs.

Haryanto Sahari

Professional Member of Supervisory Board

He is an Indonesian national and a Senior Public Accountant with more than 30 years of experience in Indonesia. He currently serves as an Independent Commissioner of PT Bank Permata Tbk and as Chairman of the Risk Oversight Committee.

He is also active in various audit committees across several public companies, and in 2022 was appointed as a member of the Audit Committee at the Ministry of Health. Previously, he served as Country Senior Partner at PricewaterhouseCoopers Indonesia for 10 years, with extensive audit experience in leading companies in Indonesia.

He also has experience in corporate restructuring since the Asian financial crisis and has a strong reputation in corporate governance and risk management, both domestically and internationally.

He holds a bachelor's degree in Accounting from the Faculty of Economics, University of Indonesia, and is a Certified Public Accountant (CPA) and Chartered Accountant (CA).

Erwandi Hendarta

Professional Member of Supervisory Board

He is an Indonesian national with more than 35 years of experience in the financial and legal sectors, having built a career across various roles and industries. He began his career at Bank Indonesia, where he worked with multilateral organisations such as the World Bank, Asian Development Bank, and Japanese Overseas Economic Cooperation Fund (OECF) (now known as JICA).

He subsequently pursued a career as an investment banker at Schroders Indonesia (part of Schroders Plc., London's investment banking division), focusing on corporate finance as well as mergers and acquisitions. He currently serves as Senior Counsel at HHP Law Firm, widely recognised as one of the leading law firms in Indonesia.

He holds a Bachelor of Laws from University of Airlangga, an LL.M. (Master of Laws) from Cornell University, United States, and an MBA from Boston University, United States. He is also a recipient of two prestigious scholarships: the Fulbright Scholarship from the United States and the Joint Japan/World Bank Graduate Scholarship Program.

With a unique background and extensive experience, ranging from his tenure at Bank Indonesia, to serving as an investment banker, and currently as Senior Counsel at HHP.

He has been recognized as a top-tier lawyer by leading international legal publications, including Legal500, Chambers & Partners, IFLR1000, AsiaLaw, and others. He was also awarded Dealmaker of the Year at the ALB Indonesia Law Awards in 2021, and received the Managing Partner of the Year award from the ALB Indonesia Law Awards in 2016 during his tenure as Managing Partner at HHP Law Firm.

Darwin Cyril Noerhadi

Professional Member of Supervisory Board

He is an Indonesian national and one of the leading investors in Indonesia, with a professional background in the financial sector, capital markets, investment, and energy, and is known as the founder of private equity firm Creador in Indonesia.

He has been actively involved in various investment transactions across Southeast Asia and South Asia, including Indonesia, Malaysia, India, and Vietnam. Throughout his career, he has held several executive positions, including CEO of the Indonesia Stock Exchange, Group CFO of Medco Energi Internasional Tbk, Partner in Corporate Finance at PricewaterhouseCoopers Indonesia, and Senior Managing Director of Creador, a regional private equity firm in Southeast Asia.

He currently serves as Commissioner of PT He also serves as Commissioner of PT Medikaloka Hermina Tbk, Commissioner of PT Daya Intiguna Yasa Tbk, Independent Commissioner of PT Austindo Nusantara Jaya Tbk, President Commissioner of Creador Indonesia, and previously served as Independent President Commissioner of PT Mandiri Sekuritas.

He holds a bachelor's degree in Petroleum Geology from the Bandung Institute of Technology, an MBA in Finance and Economics from the University of Houston, and a Doctorate in Strategic Management from the University of Indonesia, awarded with cum laude distinction.

Fauzi Ichsan

Professional Member of Supervisory Board

He is an Indonesian national with over 30 years of professional experience across both the public and private sectors. In the public sector, he served as Chairman of Indonesia Financial Group (IFG), Indonesia's largest non-bank financial holding company, from 2020 to 2026, and previously as Chief Executive of Indonesia Deposit Insurance Corporation (LPS) from 2015 to 2020. In the private sector, he held the position of Managing Director at Standard Chartered Bank Indonesia and worked as a fixed income dealer at Citibank in both Indonesia and Singapore.

He currently holds several non-executive roles at the board level across leading institutions, including Unilever Indonesia, AKR Corporindo, Manulife Investment Management, and Minamas Plantation (SD Guthrie) in Malaysia. He began his career at the Ministry of Finance of the Republic of Indonesia in 1991.

He holds a master's degree in Development Studies from Massachusetts Institute of Technology (MIT) and a bachelor's degree in Economics from London School of Economics (LSE). He is also active as a patron of several social foundations and serves as Chairman of the LSE Alumni Association Indonesia.

Supervisory Board Committees

Audit Committee

Duties of the Audit Committee
The Audit Committee is tasked to reviewing and evaluating the effectiveness of internal controls, the quality of financial statements, compliance with prevailing regulations, internal audit function, communication with external auditor, risk management, and the implementation of Good Corporate Governance (GCG) principles. The Committee convenes at least 6 (six) meetings annually and has held 15 (fifteen) meetings throughout 2025.

The Audit Committee membership comprises from both within and outside INA to ensure independent, professional, and objective perspectives in supporting the oversight function.

Audit Committee Composition
- Chairman and Member: Haryanto Sahari (Professional Member of Supervisory Board)
- Member: Sumiyati
- Member: Nita Skolastika Ruslim

Audit Committee Profiles

Haryanto Sahari

1. Professional Member of Supervisory Board
2. Chairman and Member of the Audit Committee

Sumiyati

1. Member of the Audit Committee
2. Professional Experience:
   - Inspector General of the Ministry of Finance (2017–2021)
   - Chairman of the Government Accounting Standards Committee
   - Audit Committee member at several Ministries/Agencies
   - Commissioner at companies in the non-bank financial industry

The Committee also supervises the control of gratuities, management of conflicts of interest, and follow-up of Whistleblowing System reports concerning violations of the Code of Ethics and related provisions. The Ethics Committee convenes meetings at least once every 3 (three) months to carry out its duties and authorities. Throughout 2025, the Ethics Committee has held 12 (twelve) meetings.

The Ethics Committee membership comprises representatives from both within and outside INA to ensure independence and objectivity in upholding ethical standards.

Ethics Committee Composition
- Chairman and Member: Erwandi Hendrata (Professional Member of Supervisory Board)
- Member: Hikmahanto Juwana (concurrently serves as the Chief Executive of the Ethics Committee)
- Member: Dedi Syarif Usman

Ethics Committee Profiles

Erwandi Hendarta

1. Professional Member of Supervisory Board
2. Chairman and Member of the Ethics Committee

Hikmahanto Juwana

1. Member of the Ethics Committee
2. Professional Experience:
   - Professor of Law at the University of Indonesia
   - Commissioner in several companies
   - Former Tax Supervisory Committee

Dedi Syarif Usman*

1. Member of the Ethics Committee
1. Professional Experience:
   - Executive of Finance Ministry
   - Commissioner in several national corporations

*) effective since 9 May 2025, replacing Ahmad Hadibroto which tenure was ended on 25 February 2025.

Remuneration and Human Resources Committee

Duties of the Remuneration and Human Resources Committee
The Remuneration and HR Committee is tasked to providing recommendations on the nomination process and performance assessment of the Board of Directors, while reviewing and monitoring HR management strategies and remuneration systems to ensure alignment with governance principles and institutional needs. The Committee also facilitates and provides recommendations on the performance assessment of the Supervisory Board and the Key Performance Indicators (KPIs) of the Board of Directors, ensuring consistency between performance, accountability, and INA's strategic direction. The Committee convenes meetings at least once every 3 (three) months to carry out its duties and authorities. Throughout 2025, the Remuneration and HR Committee held 26 (twenty-six) meetings.

The Committee membership comprises representatives from both within and outside INA to ensure objectivity and balanced perspectives in overseeing HR management and remuneration governance.

Remuneration and Human Resources Committee Composition
- Chairman and Member: Moh. Chatib Basri
- Member: Darwin Cyril Noerhadi (Professional Member of Supervisory Board)
- Member: Bambang Widjanarko ES
- Member: Rabin Indrajad Hattari
- Member: Qoswara

Remuneration and Human Resources Committee Profiles

Moh. Chatib Basri

1. 1Chairman and Member of the Remuneration and HR Committee
2. Professional Experience:
   - Visiting scholar, Harvard Kennedy School
   - Head of Investment Coordinating Board (2012-2013)
   - Minister of Finance of the Republic of Indonesia (2013-2014)
   - Academician of Faculty of Economics, University of Indonesia
   - Consultant to various international institutions including IMF, World Bank, and ADB
   - Commissioner of the bank and telecommunication institutions

Darwin Cyril Noerhadi*

1. Professional Member of Supervisory Board
2. Member of the Remuneration and HR Committee

*) Effective November 2025, Darwin Cyril Noerhadi was replaced by Erwandi Hendarta.

Bambang Widjanarko ES

1. Member of the Remuneration and HR Committee
2. Professional Experience:
   - Board of Directors and Commissioner at the multiple national companies
   - HR Professional and Strategic Consultant
   - Commissioner at the multiple national companies

Rabin Indrajad Hattari

1. Member of the Remuneration and HR Committee
2. Professional Experience:
   - Economist at international institutions, including ADB, IMF, and the World Bank
   - Secretary of the Ministry of State-Owned Enterprises (2023–2026)
   - Commissioner at various national companies
   - Deputy for Policy and Strategy at BP BUMN

Qoswara

1. Member of the Remuneration and HR Committee
2. Professional Experience:
   - Director of the State Asset Management Agency (2018–2023)
   - Executive at the Ministry of Finance

BOARD OF DIRECTORS

The Board of Directors is the organ responsible for managing INA's operations. The Board is accountable for the strategic and day-to-day management, ensuring that all policies and decisions are implemented effectively, accountably, and in alignment with INA's mandate. In carrying out its management function, the Board of Directors may establish committees comprising members of the Board, employees, and/or other parties as necessary to facilitate deeper deliberation, strengthen the quality of decision-making, and ensure the consistent application of good governance principles across the organization.

Board of Directors Regulations
To ensure operational consistency and the implementation of good governance, the Board of Directors issues internal policies in the form of Board of Directors Regulations (PDD). To date, 41 policies are embodied in 13 PDDs, each established following a consultation process with the Supervisory Board as part of the check-and-balance mechanism. Throughout 2025, INA issued and/or reviewed 27 policies and 11 Standard Operating Procedures (SOPs).

Board of Directors Meetings
The Board of Directors convenes Board of Directors Meetings at least once a week. These meetings are held, among others, as a forum for strategic, investment, and operational decision-making. Each meeting is documented in the Minutes of Board of Directors Meetings. As of 31 December 2025, the Board of Directors had conducted a total of 145 meetings.

Board of Directors Composition
The composition of the Board of Directors comprises 5 (five) members, all of whom are professionals appointed and dismissed by the Supervisory Board. Among them, one member is designated as the Chairman of the Board of Directors. The term of office for members of the Board of Directors is 5 (five) years (except for the first year of INA's establishment) and members may be reappointed for only 1 (one) additional term. The implementation of duties and authorities of the Board of Directors, including the allocation of responsibilities among its members, is clearly set out in the Board of Directors Regulation as guideline in carrying out effective and accountable management functions.

Chairman of Board of Directors | Chief Executive Officer	Dr. Ridha D.M. Wirakusumah*
Member of Board of Directors | Chief Financial Officer	Eddy Porwanto
Member of Board of Directors | Chief Investment Officer	Andry Setiawan
Member of Board of Directors | Chief Investment Officer	Christopher Ganis
Member of Board of Directors | Chief Risk Officer	Thomas Oentoro**

*) Term of office ended effective 15 February 2026 based on Supervisory Board Resolution No. 2 of 2026, and was replaced with Eddy Porwanto as Acting Chairman of Board of Directors based on Supervisory Board Resolution No. 3 of 2026.
**) Term of office ended due to resignation effective 15 October 2025, based on Supervisory Board Decree No. 20 of 2025

BOARD OF **DIRECTORS**

Board of Directors Profiles

Dr. Ridha D. M. Wirakusumah

Chairman of Board of Directors
Chief Executive Officer

He is an Indonesian national and a senior executive in banking, financial services, and investment, with more than 30 years of experience across leading global and Indonesian institutions.

Prior to joining INA, he served as President Director of Bank Permata, Head of Indonesia at KKR & Co., and President Director of Bank Maybank Indonesia. He also held positions in several multinational companies, including CEO Asia Pacific of AIG Consumer Finance and GE Capital Consumer Finance and Banking, CEO of GE Capital Thailand, CEO of GE Capital Indonesia, Head of Corporate Finance at Bankers Trust, and in the Public Sector at Citibank Indonesia.

He holds a Doctorate in Business Administration from City University of Hong Kong, an MBA in Finance and International Business from Ohio University, and a bachelor's degree in Electrical Engineering, Electronics, and Science from Ohio University. He has also completed the Advanced Management Program at the University of California, Berkeley.

Eddy Porwanto

Member of Board of Directors
Chief Financial Officer

He is an Indonesian national and one of the leading finance professionals in Indonesia, with more than 30 years of experience and expertise in investment and corporate turnaround.

Prior to joining INA, he spent nearly a decade as a senior expert at Northstar Group, a leading investment firm in Indonesia, and served as a member of the Board of Commissioners and/or Board of Directors across several portfolio companies.

He has held CFO roles in leading companies across various sectors, including mining (CFO of Delta Dunia Makmur, Deputy CEO of Archipelago Resources), aviation and transportation (CFO of Garuda Indonesia), automotive (CFO of General Motors Indonesia), and consumer goods (CFO of Reckitt Benckiser Indonesia).

He holds an MBA in Corporate Finance & Banking from the University of Illinois at Urbana-Champaign and a bachelor's degree in Accounting & Finance from Lewis & Clark College, United States.

Andry Setiawan

Member of Board of Directors
Chief Investment Officer

He is an Indonesian national and a senior executive in investment and energy, with extensive experience in strategic leadership, infrastructure project development, and public asset management.

Prior to serving as Chief Investment Officer (CIO), he was Managing Director of Investment at INA and a member of the Investment Committee, where he led various strategic initiatives in the Green Energy & Transformation sector. His role included formulating investment strategies, evaluating transactions, and strengthening partnerships to support energy transition and sustainable infrastructure development in Indonesia.

Before joining INA, he held various leadership positions in the national petrochemical and power sectors, including executive roles at Chandra Asri and Tripolyta Indonesia Tbk. He played a key role in the development of large-scale national projects, particularly during his tenure as Finance Director and subsequently President Director of PT Indo Raya Tenaga, a joint venture behind the 2x1000MW Ultra Super Critical (USC) power plant project with Indonesia Power. In 2020, he transitioned to public asset management as Investment Director at PT Perusahaan Pengelola Aset (Persero), and later continued his strategic role at PT Danareksa (Persero).

He holds a Bachelor of Arts in Economics, summa cum laude, from the University of California, Berkeley.

Christopher Ganis

Member of Board of Directors
Chief Investment Officer

He is an Indonesian national known as a senior executive and advisor in the financial sector, with more than two decades of experience in the global investment industry, particularly in private equity, private credit, and structured financing across Southeast Asia.

Prior to his appointment as Chief Investment Officer (CIO), he served as Managing Director of Investment at INA and led the Hybrid Capital Solutions division, which provides flexible and structured financing solutions to address diverse market needs as part of portfolio diversification strategies. Previously, he worked at BlackRock, where he led private credit investments in Southeast Asia with a primary focus on Indonesia, and developed as well as executed primary and secondary credit investment strategies across the region.

Earlier in his career, he was a Partner at Asia Summit Capital and a Vice President at Indies Capital, where he was responsible for various cross-sector private credit transactions. He also worked at Salomon Smith Barney and later held several senior roles at Citi's Corporate and Investment Bank, including in Asia Credit Trading and Mergers & Acquisitions, with exposure to regional-scale financing and advisory transactions.

He holds an MBA with Honors from The Wharton School, University of Pennsylvania, and is a recipient of the Citi Markets & Banking Fellowship. He also holds a Bachelor of Science in Business Administration, summa cum laude, from The Ohio State University.

Thomas Oentoro

Member of Board of Directors
Chief Risk Officer

He is an Indonesian national with extensive experience in finance and investment management, having held roles across leading financial institutions in Southeast Asia.

He previously served as Independent Commissioner of Garuda Indonesia and held leadership positions at OCBC Indonesia and KV Asia Capital. Earlier in his career, his experience at the International Finance Corporation and Citibank further strengthened his expertise in business and financial analysis, valuation, and corporate finance.

He holds an MBA from The University of Chicago Booth School of Business and a Bachelor of Science in Finance from New York University, providing a strong foundation in financial principles and strategic insight. His professional experience and academic qualifications have equipped him with the capability to oversee and contribute to effective risk management strategies in his roles.

Board of Directors Committees

Investment Committee

The duties and authorities of the Investment Committee are set out in the Investment Committee Charter. The Investment Committee currently comprises internal members of INA, including members of the Board of Directors and employees, to ensure alignment between strategic direction and investment execution.

Duties of the Investment Committee:

1. Provide recommendations on investment decisions;
2. Oversee the performance of investment portfolio periodically;
3. Manage investment risks;
4. Formulate necessary actions and/or exit strategies.

The Investment Committee convenes at least once a week to discuss various topics, including but not limited to the evaluation of investment strategies, portfolio oversight and monitoring, compliance with risk tolerance limits, and progress updates throughout the project lifecycle, from initial exploration, execution to completion. As of 31 December 2025, the Investment Committee had convened 95 meetings.

Risk Management Committee

The duties and authorities of the Risk Management Committee are set out in the Risk Management Committee Charter. The Risk Management Committee currently comprises internal members of INA, including members of the Board of Directors and employees.

Duties of the Risk Management Committee:

1. Monitors changes in LPI's risk profile in line with INA's risk appetite statement.
2. Reviews updates to the risk appetite statement in accordance with evolving risks faced by INA.
3. Reviews the effectiveness of risk controls implemented by each division.
4. Provides guidance on issue handling and risk control measures across each division.

The Risk Management Committee convenes at least once every quarter to discuss matters including, but not limited to, the optimization of INA's risk governance framework based on benchmarking studies with other SWFs, implementation of a risk-aware culture and monitoring of risk control adequacy. As of 31 December 2025, the Risk Management Committee had held 12 (twelve) meetings.

Portfolio Operations Committee

The duties and authorities of the Portfolio Operations Committee are set out in the Portfolio Operations Committee Charter. The Portfolio Operations Committee comprises internal members of INA, including members of the Board of Directors and employees.

Duties of the Portfolio Operations Committee:

1. Oversee and monitor the performance of INA's investment portfolio;
2. Review and provide input, comments, and/or improvements, and deliver recommendations or request further revision of ongoing monitoring reports;
3. Discuss recent developments and operational issues at the level of the investment portfolio and/or investment assets of INA;
4. Provide strategic and/or technical direction at the investment portfolio and/or asset level to optimize performance and enhance overall portfolio value;
5. Provide recommendations regarding funding requirements and/or asset transfers as a result of portfolio monitoring and/or performance improvement initiatives;
6. Provide recommendations on performance enhancement and/or value creation initiatives, corrective actions, and submission of operational matters relevant for consideration by the Investment Committee or for consideration and/or decision by the Board of Directors.

The Portfolio Operations Committee convenes at least once a month to discuss various matters including, but not limited to, the monitoring of financial and operational metrics and KPI dashboards of each INA investment, monitoring of loss tolerance breaches, identification of key investment risks, human resource issues across the portfolio, and review of portfolio work plans. As of 31 December 2025, the Portfolio Operations Committee had held 13 (thirteen) meetings.

Conflict of Interest Committee

The duties and authorities of the Conflict of Interest Committee are set out in the Conflict of Interest Committee Charter. The Conflict of Interest Committee comprises internal members of INA, including members of the Board of Directors and employees.

Duties of the Conflict of Interest Committee:

1. Review, approve or decline approval, and determine necessary risk mitigation measures where potential conflicts of interest involving Employees require mitigation;
2. Review disclosures of potential conflicts of interest, including non-business interests reported and/or identified from members of the Board of Directors and/or members of the Conflict of Interest Committee;
3. Provide recommendations to the Board of Directors for decision in the Board of Directors Meeting, including recommendations on appropriate risk mitigation measures.

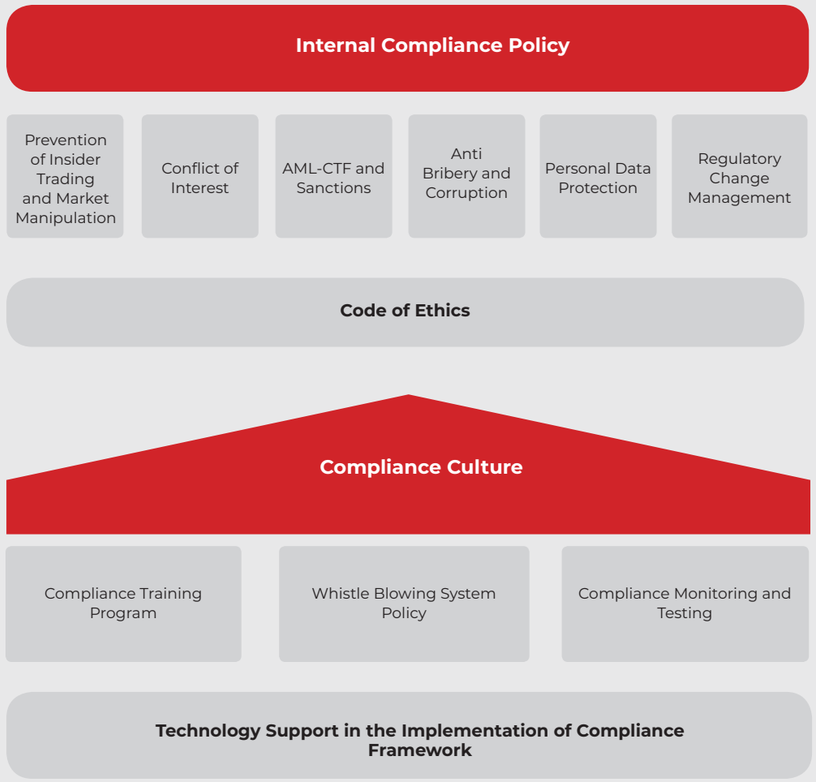

The Conflict of Interest Committee convenes meetings on an as-required basis. As of 31 December 2025, the Committee had held 1 (one) ad-hoc meeting and provided recommendations regarding a disclosed potential conflict of interest.

Governance Framework and Implementation

INA's governance framework extends beyond the formulation of principles and policies, but is realized through disciplined implementation and continuous monitoring to ensure consistent application, compliance, and effectiveness across all activities. Through this process, potential gaps are identified and addressed systematically. Such monitoring is not regarded as an administrative formality, but as an integral part of the management, ensuring that governance remains relevant, adaptive, and grounded in integrity and accountability.

INA Compliance Framework

In establishing a risk-based framework to foster a strong culture of compliance, INA refers to a compliance framework that guides its strategic direction and operational activities. This framework is designed to ensure that all decisions and actions remain aligned with applicable regulations and sound governance principles. INA continuously refines its compliance framework to ensure its continued relevance and effectiveness in responding to evolving regulatory dynamics and best practices.

Compliance Policies

To ensure the effective implementation of good governance within INA, compliance policies are formalized through Board of Directors Regulations (PDD) on compliance, as well as other relevant PDDs and/or SOPs. Throughout 2025, INA has issued 3 (three) new PDDs concerning data protection, document retention, and regulatory change management, including updates to INA's Code of Ethics, as part of strengthening its compliance framework.

Code of Ethics

INA consistently upholds its Code of Ethics and a culture of integrity through the implementation of an Integrity Pact signed by the Board of Directors and all Employees at the commencement of employment and renewed annually. In January 2025, INA reaffirmed this commitment through the renewal of the Integrity Pact as a collective commitment reinforcement of ethical values.

Through the Integrity Pact, INA affirms its commitment to (1) prevent and combat corruption, collusion, and nepotism; (2) reject any form of improper gratification that breaches the rules; (3) avoid conflicts of interest; and (4) comply with all applicable laws, regulations, and internal policies.

INA also strengthens controls over bribery, corruption, and conflict of interest risks through the issuance of Anti-Bribery and Corruption Policy, Conflict of Interest Policy, and Personal Trading Policy. These policies are supported by registration and approval procedures for gifts, hospitality, and personal investments. Following the launch of the Compliance Portal, all declaration, attestation, escalation, and approval processes are conducted in an integrated and online manner through the system.

Compliance Culture

To strengthen its compliance culture, INA develops risk training programs in the form of guidance notes that are updated regularly and comprehensively to build strong and sustainable institutional knowledge. INA also conducts quarterly orientation programs for new joiners to socialize the governance of INA's investment processes, including key areas requiring specific attention in investment risk evaluation.

Compliance culture is reinforced through internal socialization of the Code of Conduct and updates to policies and procedures, ensuring comprehensive understanding and consistent implementation across the organization.

Monitoring
Compliance with laws, regulations, and internal policies is monitored actively and periodically by the Compliance Division through:

1. Governance self-assessments conducted by the Board of Directors twice a year based on Supervisory Board parameters, with reports submitted to the Remuneration and HR Committee.
2. Monitoring of policy governance, including updates and issuance of new policies aligned with business and operational dynamics, and ensures periodic review of all INA policies.
3. Annual integrity pact signing by all Board of Directors and employees as commitment to INA Code of Conduct.
4. Personal investment disclosures by Board of Directors and employees twice a year for review and reporting.
5. Implementation of anti-bribery and anti-corruption risk control programs.
6. Monitoring and follow-up of reports received through the Whistleblowing System (WBS).

To monitor the alignment of INA's governance with international best governance practices, INA also conducts a self-assessment against the Santiago Principles. This assessment covers aspects of the legal framework, institutional structure, as well as investment and risk management, with the objective of maintaining operational independence, prudence in investment decision-making, and strong risk oversight.

During its 3 (three) years as a full member, INA has undertaken various refinements across all aspects of the Santiago Principles. The self-assessment results were submitted to the International Forum of Sovereign Wealth Funds (IFSWF), accepted, and published on the official IFSWF website on 5 November 2025.

Reporting Mechanisms
To ensure transparency and accountability, governance reporting is conducted to the Supervisory Board and its committees through:

1. Compliance and governance reports within the Quarterly Management Report.
2. WBS reports to the Ethics Committee and Audit Committee on a quarterly basis.
3. Share ownership reporting by Board of Directors and employees to the Ethics Committee every semester.
4. Governance self-assessment in reference with Supervisory Board parameters through the Remuneration and HR Committee at every semester.
5. Ad-hoc reporting as required by prevailing stipulations.

- Financial Statements
  The Board of Directors prepares monthly Financial Statements and submits Quarterly Financial Statements that have been reviewed by the Audit Committee and signed by the Board of Directors.

  - Quarter 1 of 2025 Financial Statements, dated 23 April 2025
  - Quarter 2 of 2025 Financial Statements, dated 15 July 2025
  - Quarter 3 of 2025 Financial Statements, dated 14 October 2025
  - Quarter 4 of 2025 financial statements, dated 26 February 2026

- Management Reports
  The Board of Directors also prepares monthly Management Reports and submits Quarterly Management Reports to the Supervisory Board no later than the second week (the 15th day) of the following month after the financial statements are finalized. The Quarterly Management Report comprises the Financial Performance Report, Investment Management Report, Operational Management Report, and Internal Compliance Report.

  - Quarter 4 of 2024 Management Report, dated 10 February 2025
  - Quarter 1 of 2025 Management Report, dated 14 May 2025
  - Quarter 2 of 2025 Management Report, dated 29 July 2025
  - Quarter 3 of 2025 Management Report, dated 3 November 2025
  - Quarter 4 of 2025 Management Report, dated 9 February 2026

Audit Implementation
The audit of INA's compliance with applicable laws and regulations was conducted by the Independent Auditor Purwanto Susanti & Surja (an EY affiliate) in accordance with PSA No. 62 for the year ended 31 December 2025. The Independent Auditor's Report concluded that, in all material respects, INA has complied with applicable laws, regulations, contracts, and requirements.

Internal Audit performs assurance and advisory activities independently to strengthen governance, risk management, and internal controls across the organization. Audit activities are carried out based on the 2025 Risk-Based Audit Plan approved by the Supervisory Board and the Audit Committee.

Throughout 2025, Internal Audit conducted reviews of investment processes and key operational processes, while also providing advisory support to enhance governance practices and risk management. Internal Audit reports the progress of its activities periodically to the Audit Committee, and audit execution is conducted in accordance with the Global Internal Audit Standards issued by The Institute of Internal Auditors (IIA).

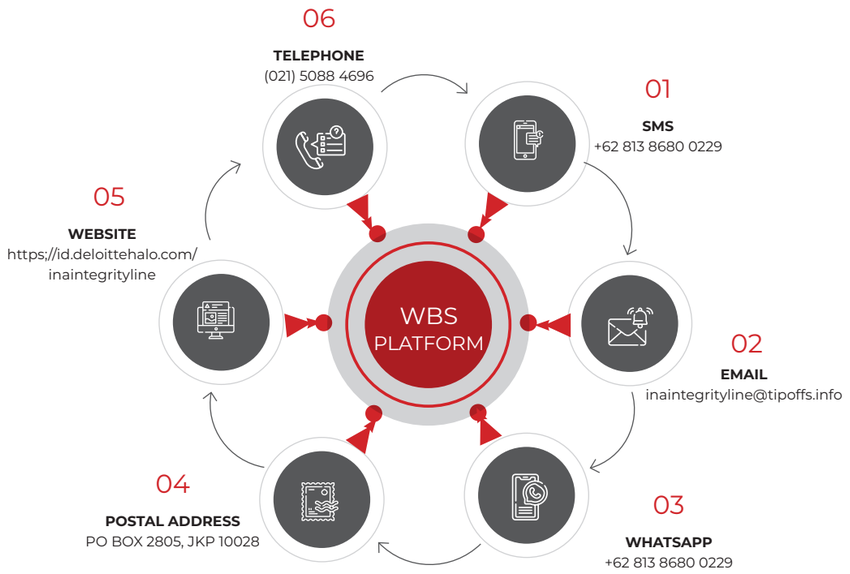

Technology Support

A robust compliance framework requires adequate technological and human resource support. INA has undertaken comprehensive exploration and benchmarking with various SWFs and global institutions to ensure the selection of relevant and effective solutions. From a technology perspective, INA's compliance framework is supported by several systems, including the Whistleblowing System through the INA Integrity Line, partner screening tools using Dow Jones Factiva, and the Compliance Portal (MCO – My Compliance Office) to facilitate integrated compliance declarations and monitoring.

- Compliance Portal
  A web and mobile-based application to integrating Code of Conduct, Conflict of Interest Policy, Personal Trading Policy, Insider Trading Policy, and Anti-Bribery and Corruption Policy, as well as managing the Negative List/Watchlist.

- Global Financial Crime Database
  Applied in the screening process of investment partners and targets to ensure that decisions are taken based on complete and accurate information, while supporting the control of money laundering risks, terrorism financing (AML/CFT), and sanctions compliance.

- Whistleblowing System (WBS)
  Since 2021, INA has implemented a Whistleblowing System (WBS) through INA Integrity Line to strengthen its culture of integrity, provide a secure reporting channel that protects whistleblowers, and mitigate potential financial and non-financial risks. The system manages reports of alleged violations involving the Supervisory Board, the Board of Directors, and Employees, by upholding strict confidentiality and integration with INA's official website. Reports are administered by an independent third party in coordination with the Compliance Division. Monitoring results are submitted monthly to INA and consolidated for quarterly reporting to the Ethics Committee and the Audit Committee. As of 31 December 2025, there were no reported ethical violations committed by the Supervisory Board, the Board of Directors, and/or their respective apparatus.

Risk Management

Risk considerations are embedded within every investment decision and process, while governance provides an added layer of oversight to ensure that risks are not only managed but also fully understood and controlled. Through review mechanisms, strong supervisory and structured reporting, risk exposures are consistently monitored to remain within the established risk appetite. The clear separation between execution and oversight functions reinforces checks and balances, strengthens institutional resilience, and safeguards sustainable long-term value.

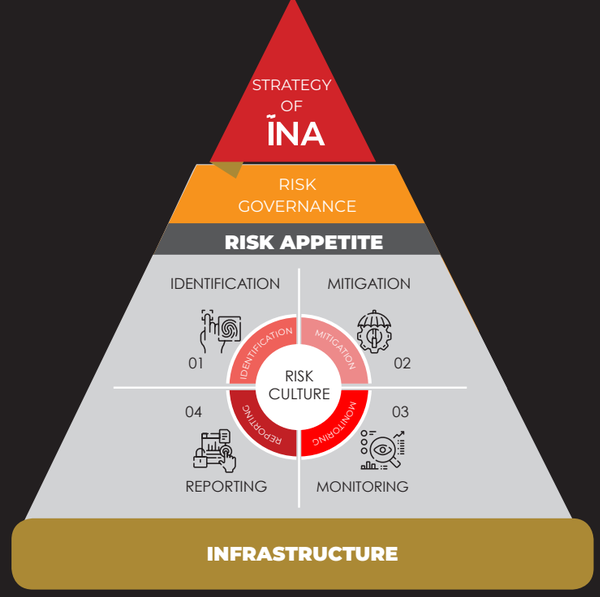

Risk Management Framework

INA's Risk Management Framework is applied consistently and continuously as a structured approach to identify, assess, mitigate, monitor, and report risks. The framework is embedded across all operational activities and investment stages, spanning the entire investment lifecycle. Material risks are clearly articulated in INA's Risk Appetite Statement as a reference for defined risk tolerance limits. The framework and its oversight also extend to investment portfolio companies, whether in the form of limited liability companies, funds, or other structures, commensurate with INA's level of influence and/or shareholding in such companies, while upholding internationally recognized good governance standards.

INA's Risk Management Framework comprises 6 (six) pillars:

- Risk Governance
- Risk Appetite Setting
- Risk Identification and Assessment
- Risk Mitigation
- Risk Monitoring
- Risk Reporting

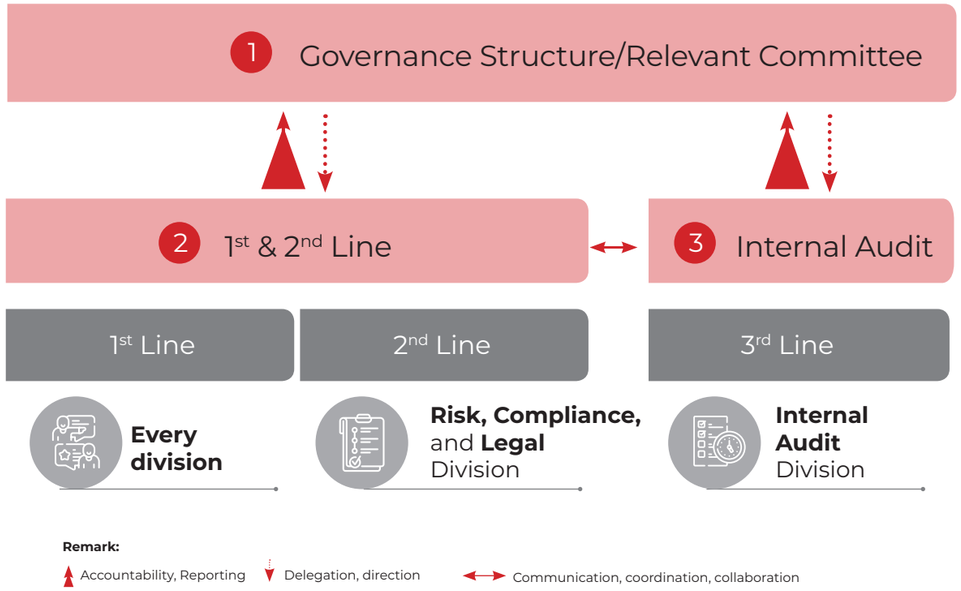

INA's Risk Management Framework is intended to:

1. Ensures consistent application of risk management across all investment and operational activities of INA in delivering its mandate and strategic objectives.
2. Fosters a risk-aware culture through an open, accountable, and collaborative working environment, in line with good governance principles.
3. Supports the implementation of INA's investment strategy to deliver optimal risk-based returns, while considering Environmental, Social, and Governance (ESG) aspects, and enhancing INA's attractiveness to investors for long-term sustainability and contribution to Indonesia's development.

Risk Governance Structure

Governance and risk management are implemented comprehensively to ensure that investment and operational processes are conducted prudently, with a robust internal control system in fulfilling the institution's mandate. In 2025, INA further strengthened risk management at both the investment and enterprise levels, and adopted the three lines model as framework that clearly define roles and accountability in risk management. This implementation is reflected in INA's governance structure as follows:

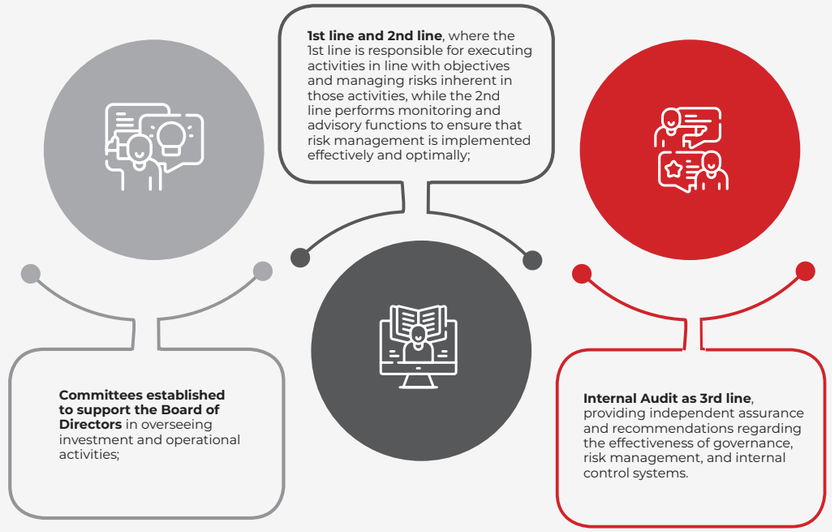

Risk Management Governance - Three Lines Model

Three Lines Model

INA adopts the Three Lines Model, which emphasizes governance structure and the interrelationship among functions in comprehensive risk management. The model is designed to strengthen synergy, communication, and coordination, particularly in managing risks across the first, second, and third lines.

The elements of Three Lines Model comprise:

Risk Management Implementation

The stages of INA's risk management implementation process include:

1. RISK APPETITE SETTING

INA formulates its risk appetite, risk tolerance limits, and monitoring mechanisms in alignment with its mandate, priorities, business strategy, and investment strategy across all activities, as articulated in the Risk Appetite Statement (RAS). The RAS serves as a reference in risk-based decision-making by defining the level of risk INA is willing to accept for identified and categorized material risks. The risk appetite is evaluated on a continuous basis in response to evolving circumstances and dynamics encountered by INA.

The formulation of RAS adheres to the following key principles:

- Balanced, encompassing 3 (three) aspects: achievement of objectives, required enabling factors, and risk tolerance;
- Clear and understood;
- Monitored and reviewed periodically.

The 1st line is responsible for proposing acceptable risk levels based on strategic objectives, financial capacity, and the organization's operational risk profile. The risk management and compliance functions as the 2nd line develop the risk appetite methodology, translate it into RAS, risk limits, and key risk indicators, and provide independent challenge to 1st line's proposals. Internal Audit, as the 3rd line, provides assurance on the adequacy and effectiveness of the risk appetite-setting process without being involved in decision-making.

INA has established its risk appetite across five key risks, as set out in the Risk Appetite Statement (RAS), namely investment risk, reputational risk, fraud risk, valuation risk, and liquidity risk.

2. IDENTIFIKASI DAN PENILAIAN RISIKO

INA identifies and assesses potential risks arising from its investment and operational activities, including emerging risks and changes in risk profiles resulting from investments and business dynamics. The process is conducted using consistent and measurable guidelines, referred to a risk taxonomy applied across all divisions. The risk taxonomy is designed to categorize risks by relevant domains and categories, providing a comprehensive and structured view of the organization's overall risk exposure.

The 1st line is responsible for identifying risks inherent in investment and operational activities and assessing their likelihood and impact based on actual conditions. The 2nd line provides risk framework, taxonomy, and assessment methodology, ensuring consistency across units, consolidating the corporate risk register, and validating material risks. Internal Audit, as the 3rd line, provides assurance on the adequacy of risk identification and assessment process, including ensuring that no significant risks are overlooked or insufficiently managed.

The following are 3 (three) key risk classifications that are interrelated and managed in line with INA's growth:

Investment Risk

Invesment Risk, referring to portfolio risks arising from the composition and aggregation of investments, including business risk, financial risk, external/market risk, and liquidity risk.

Financial Risk

Financial Risk, arising from variability in financial returns and additional funding-related risks, such as asset-liability management and funding. Key categories include liquidity and funding risk, market risk, and balance sheet resilience (capital risk). Financial risk may arise both within investment contexts and at the enterprise level.

Enterprise Risk

Enterprise Risk, comprising:

- **Strategic and business risk,** driven by external macro factors such as economic conditions, regulatory, and competitive dynamics, including strategic, macro, and reputational risks.
- **Non-financial risk,** resulting from inadequate or failed internal processes, human resources, or systems, including operational, legal, compliance, as well as technology and cyber risks.

3. RISK MITIGATION

Risk controls are designed and developed to mitigate risks inherent in INA's investment and operational activities. Control's effectiveness is assessed based on the adequacy of design and effectiveness of implementation in reducing risk exposure. The 1st line is responsible for designing and implementing risk control and mitigation measures integrated into day-to-day business processes. The 2nd line evaluates the adequacy of mitigation design, ensures alignment with established risk appetite, and provides recommendations for improvement where necessary. Internal Audit, as the 3rd line, conducts independent testing of effectiveness of implemented mitigation measures and provides assurance that controls operate in accordance with intended design and objectives.

4. RISK MONITORING

Risk monitoring aims to identify material changes in existing risks and emerging risks, in alignment with the Risk Appetite Statement and key investment and operational risks. INA has established an integrated monitoring system using measurable metrics to deliver effective, cross-divisional, and transparent risk reporting. The 1st line conducts routine monitoring of risk profiles and key risk indicators and takes corrective action where deviations from risk appetite or limits occur. The 2nd line develops and reviews monitoring systems periodically, and escalates material risks to the Board of Directors. The 3rd line provides assurance on the reliability of monitoring systems and effectiveness of escalation and follow-up mechanisms.

5. RISK REPORTING

Risk reporting aims to provide the Supervisory Board, the Board of Directors with comprehensive information to understand INA's risk exposure, key risk potentials, and corresponding mitigation measures. The 1st line provides accurate and timely reporting of risk information and risk events to the risk management function. The 2nd line consolidates this information into comprehensive, analytical, and forward-looking institution risk reports for submission to the Board of Directors and the Supervisory Board. Internal Audit, as the 3rd line, provides assurance on the reliability, completeness, and accuracy of risk reporting, enabling its use as a sound basis for strategic decision-making and effective oversight.

Strengthening of Enterprise Risk Management

In line with institutional growth, INA strengthened the enterprise risk function in 2025, focusing on strategic, financial, compliance, legal, reputational, and operational risks at the enterprise level, while strengthening the ERM foundation.

ERM initiatives in 2025 included:

- Development of RCSA-based enterprise risk.
- Holistic risk exposure reporting via the Enterprise Risk Dashboard.
- Centralized Incident and Issue Management mechanism.
- Development of a Business Continuity Management framework, including BCM team formation and Call Tree mechanisms.
- Implementation of ERM advisory functions as a second line in reviewing new initiatives and systems.

Dedication of Our People

Dedication of Our People

Our people acquire the institution's ability to execute its investment strategies and operational frameworks with precision and consistency. At INA, strategy is not defined by intent alone, but by disciplined follow-through, where analytical rigor, structured processes, and professional judgment translate mandates into measurable outcomes. Professionalism is expressed through clarity of thought, consistency of action, and the steady stewardship required to uphold institutional integrity and credibility.

Culture of Professionalism

The Way INA Works

Professionalism forms the cultural foundation of INA's organisation. Values, conduct standards, and human resource policies guide how decisions are made, how responsibilities are carried out, and how collaboration occurs across functions. This shared culture reinforces integrity, transparency, and respect for governance standards in daily practice.

By embedding professionalism into the organisation's values and policies, INA ensures that governance frameworks and procedures are not treated as formal requirements, but as guiding principles that shape behaviour. Culture therefore functions as the first line of discipline, sustaining credibility and consistency across all activities.

Dedication of Our People

I-RISE

I–RISE Values serve as the behavioral compass and professional standard that shape INA's operational activities. These values are translated in the way work is performed, decisions are made, and accountability is upheld for every mandate entrusted.

Indonesia Rise

INA upholds 5 (five) basic values that reflect a solid and professional culture.

01 Integrity

Every INA employee will always speak and act honestly, have high moral quality and values, comply with prevailing laws and regulations, act independently in accordance with the code of ethics, and prioritize INA's interests.

02 Responsibility

Every INA employee will always be responsible for every action taken, consider all key aspects in making decisions, and have the courage to make decision with measured risk.

03 Innovation

Every INA employee will always be able to generate ideas and breakthroughs that can improve performance and achieve the targets.

04 Symbiotic Collaboration

Every INA employee will always uphold the principles of cooperation and mutual benefit, as well as provide added value for INA, INA's partners, and other parties.

05 Excellence

Every INA employee will always strive for the best results by setting high standards and carrying out innovation and continuous improvement.

Human Resource Policies and Governance

To ensure that all human resource is managed professionally and consistently, INA has established comprehensive and structured internal policies. The policies cover organizational structure management, job descriptions, recruitment, learning and development management, performance management, remuneration systems, employee rights and obligations, as well as termination mechanisms. This framework is designed to support the disciplined and accountable execution of strategy and operations.

INA continues to foster a work environment that aligns with the interests of institution and its people, while upholding the organization's core values. The strengthening of human resource governance is carried out through:

- Periodic review and alignment of policies and procedures to remain consistent with the latest regulations, organizational needs, and international standards.
- Continuous improvement through internal evaluations, regular audits, and benchmarking against market best practices to maintain compliance and relevance.
- Integration of HR systems into a centralized digital platform to enhance efficiency in employee data management, payroll, remuneration, assignments, and compliance monitoring.
- Enhancement of data accuracy and transparency for all INA personnel, including secondees, nominees, and subsidiary employees, by ensuring compliance with Personal Data Protection regulations (UU PDP) and data security standards.
- Automation of routine Human Resources (HR) processes to improve efficiency and reduce administrative burden.
- Provision of a centralized and accessible internal digital library as a reference for HR policies, while supporting audit trails and transparency.
- Implementation of objective and measurable performance evaluations for all eligible employees, aimed at strengthening a professional work culture, enhancing individual performance, and fostering long-term motivation.

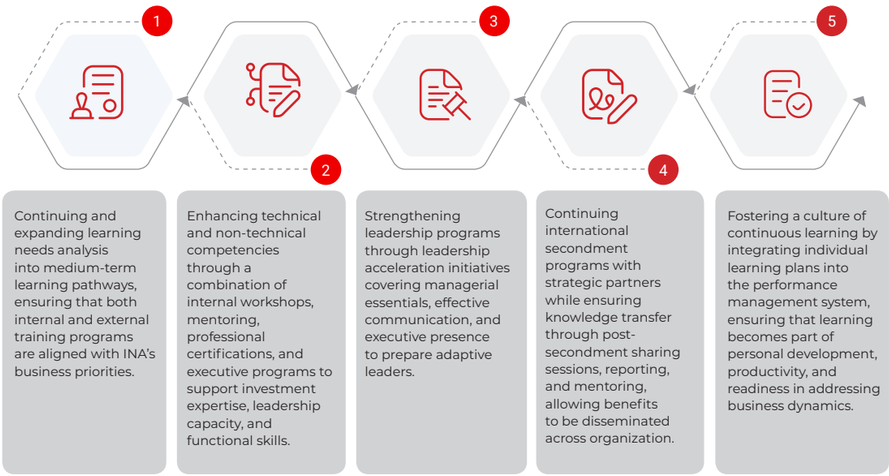

Commitment to Maintain Consistency

Sustaining Execution Quality Over Time

Consistency in delivering the mandate is sustained through the collective commitment of INA's people. This commitment is reflected in structured talent management, organization continuity planning, and a shared sense of responsibility across teams. Through continuous learning and capability strengthening, INA preserves institutional knowledge and reinforces execution discipline across each investment cycle.

This commitment sustains professional standards even as external conditions continue to evolve. With this foundation, the organization maintains focus, strengthens adaptability, and reinforces resilience, ensuring that execution quality does not depend solely on individual roles, but is embedded within systems and a collectively built culture.

In safeguarding execution quality across all activities, INA relies on its best talent and their continuous development. Through a structured learning and development framework, INA promotes consistent capability enhancement, ensures institutional knowledge transfer, and reinforces mandate execution discipline. To strengthen these capabilities, INA undertakes several strategic initiatives:

Throughout 2025, INA conducted 1,842 hours of employee training, comprising 75% technical training tailored to individual competency needs and 25% mandatory training on business processes, corporate policies, governance, and compliance.

Apart from competency development, INA positions employee engagement and community empowerment as integral elements of its human resource strategy.

Employee Engagement

Continuing and expanding engagement initiatives through a comprehensive wellness approach encompassing physical, mental, financial, and social aspects, alongside regular programs to strengthen employee connection.

Developing diverse appreciation systems, including long service awards, team- or project-based recognition, and peer-to-peer recognition to drive a sound work culture and aligned with INA's values.

Strengthening internal communication on a regular basis through various channels to enhance employee engagement, ensuring transparency of information, consistency of messaging, and the availability of two-way communication between management and employees.

Community Empowerment

Governance and sustainability strengthening

Enhancing the governance of INA INSPIRE as a formal community empowerment platform by ensuring transparency, accountability, and program sustainability.

Focus on sustainable social impact

Implementing programs in education, skills development, entrepreneurship, and environment with emphasis on tangible impact, sustainability value, and long-term community benefit.

Employee participation and strategic partnerships

Driving active employee participation through volunteerism programs as part of leadership development, and building strategic partnerships with various organizations and communities to broaden outreach and strengthen inclusivity.

Leadership and Stewardship

Guiding the Institution with Responsibility

Leadership at INA is grounded in stewardship, a responsibility to safeguard and direct the institution, rather than to elevate individual prominence. Senior management sets the organizational tone, reinforces institutional values, and ensures alignment between institutional strategy, operational execution, and discipline. Through clear accountability, leadership fosters prudent decision-making and maintains professional standards across organization.

This stewardship approach creates stability and continuity, enabling INA to carry out its mandate with responsibility with long-term perspective. Leadership therefore serves as the guiding force that integrates values and commitment into a consistent and sustainable organizational direction.

International Engagements

Throughout 2025, INA actively participated in 31 international forums.

Indonesia Loan Market Conference hosted by APLMA (Asia Pacific Loan Market Association), 9 April 2025 – Eddy Porwanto

31st Conference of Montreal – “Change, Vector of Opportunity”, 9 June 2025 – Ridha Wirakusumah

Financial Times & Nikkei Asia Energy Transition Summit Asia 2025 (Keynote Interview and Vox Pop), 25 June 2025 – Ridha Wirakusumah

The Export-Import Bank of China (CEXIM) Event, 9 September 2025 – Ridha Wirakusumah

IFSWF General Counsel Summit, 24 September 2025 - Arisia Pusponegoro

Served as speakers in the Program for Leadership Development and MBA Program at Harvard Business School (HBS) for the “Global Capitalism: Past, Present, Future” class, featuring the case study titled “The Indonesia Investment Authority: A New Breed of Sovereign Wealth Fund,” 10 November 2025 – Erwandi Hendarta and Ridha Wirakusumah

FII Priority Asia Summit hosted by the Public Investment Fund, 30 November 2025 – Ridha Wirakusumah

Domestic Engagements

Throughout 2025, INA actively participated in 29 domestic forums.

Indonesia Economic Summit 2025, 28 February 2025 – Ridha Wirakusumah

The 15th Southeast Asia Institutional Investment Forum (SEAIF) 2025 organised by AsianInvestor, 13 November 2025 – Christopher Ganis

Exclusive Interview with IDN Times for “Real Talk with Uni Lubis”, 17 December 2025 – Ridha Wirakusumah

Sustainability Stewardship

In advancing sustainability stewardship, INA represented Indonesia and actively participated in both international and domestic sustainability forums, including:

1. Annual Sustainability Week Asia by Economist Impact
2. Responsible Investment Forum Asia
3. Sustainable Investing for Sovereign Wealth Funds by IFSWF and CIC
4. AtmosTalk: Prospects and Development of Nature-Based Carbon Projects in Indonesia
5. AIGCC Asia 2030 Playbook
6. OMFIF Transition Finance Report 2025
7. FT Live & Nikkei Asia Energy Transition Summit Asia 2025
8. AVCJ Private Equity Forum and ESG Summit 2025
9. IDN Times Leadership Forum on Responsible Investment.

Indonesia Economic Summit 2025, 28 February 2025, Ridha Wirakusumah

Indonesia Loan Market Conference hosted by APLMA (Asia Pacific Loan Market Association), 9 April 2025, Eddy Porwanto

The 31st edition of the Conference of Montreal: Change, Vector of Opportunity, 9 June 2025, Ridha Wirakusumah

Keynote Interview and vox pop Financial Times & Nikkei Asia Energy Transition Summit Asia 2025, 25 June 2025, Ridha Wirakusumah

The Export-Import Bank of China (CEXIM) Event, 9 September 2025, Ridha Wirakusumah

INA Case Study in the Executive Education Program for Leadership Development at Harvard Business School (HBS) - The Indonesia Investment Authority: A New Breed of Sovereign Wealth Fund, 10 November 2025, Ridha Wirakusumah and Erwandi Hendarta

The 15th Southeast Asia Institutional Investment Forum (SEAIF) 2025, organized by AsianInvestor, 13 November 2025, Christopher Ganis

FII Priority Asia Summit hosted by the Public Investment Fund, 30 November 2025, Ridha Wirakusumah

Exclusive Interview with IDN Times for “Real Talk with Uni Lubis”, 17 December 2025, Ridha Wirakusumah

AVCJ ESG Summit 2025

Responsible Investment Forum Asia 2025

Institutional Capability

Enabling Disciplined Execution
Institutional capability reflects INA's ability in implementing its mandate with discipline and effectiveness. The organizational structure is designed to ensure clear accountability, directed collaboration, and analytical decision-making across investment and support functions. The clarity of roles and functions ensures that responsibilities are understood and standards are applied consistently throughout the investment lifecycle.

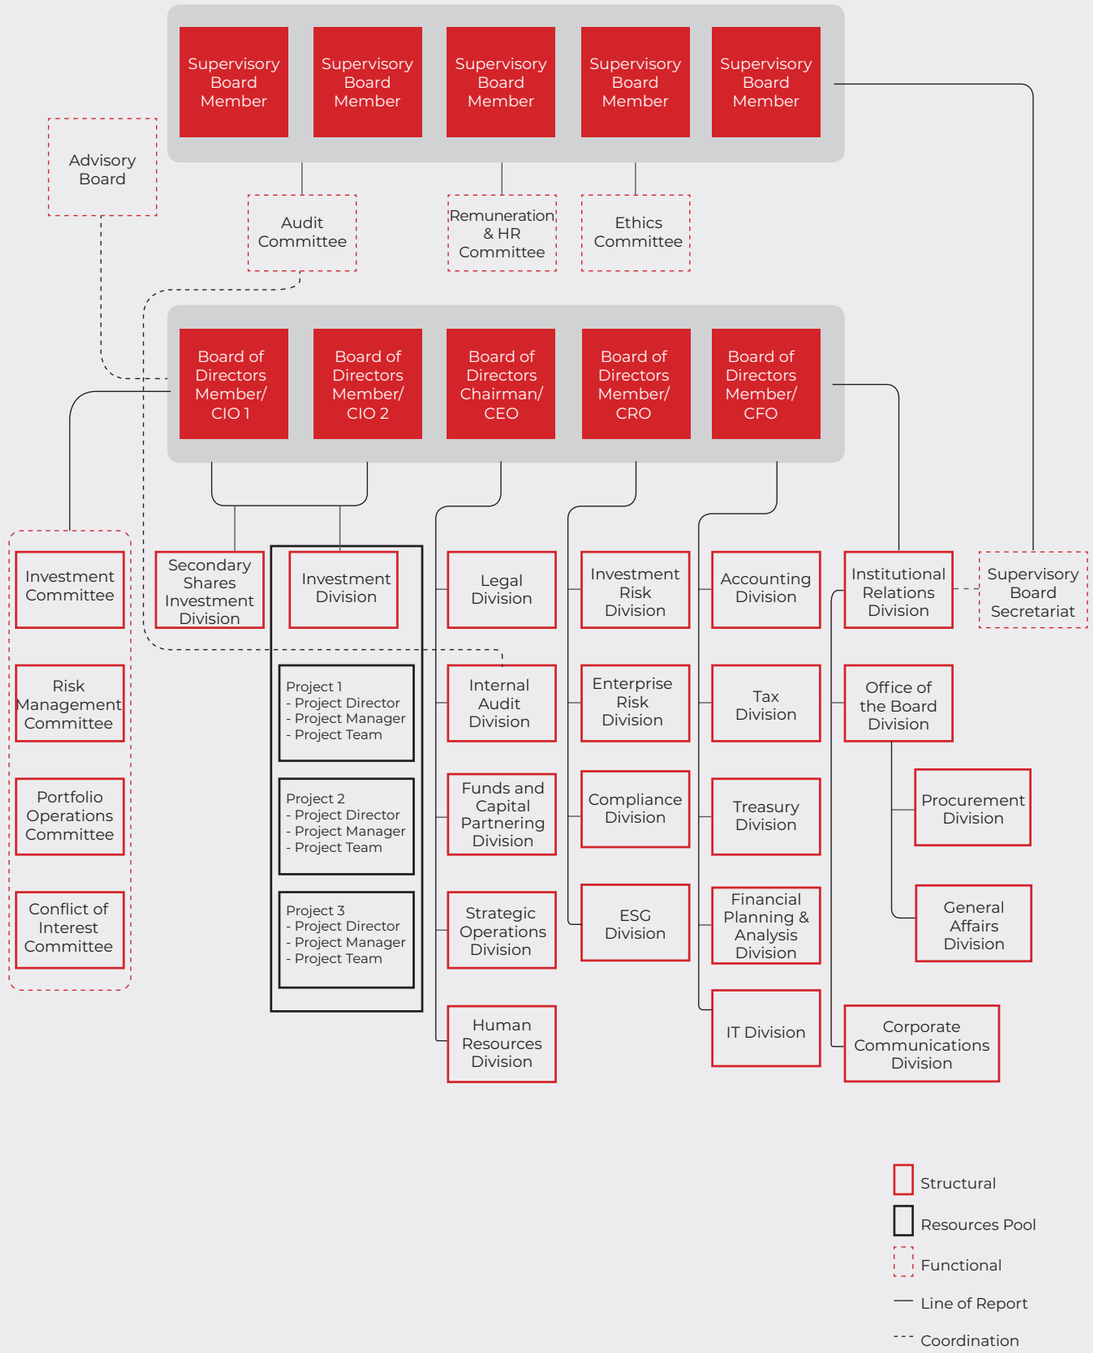

Through the continuous strengthening of institutional capability, INA enhances analytical depth, sharpens professional judgement, and improves execution coordination. As such, values, commitment, and leadership are translated into measurable outcomes and sustained execution quality.

Organizational Structure

In responding to increasingly dynamic and competitive business developments, INA has refined its organizational structure to be more focused and integrated through several key initiatives:

- The establishment of a Conflict of Interest Committee as part of the refinement of INA's organizational framework, which formally reflected in the 2025 Organizational PDD.
- The separation of Risk Division into Investment Risk Division and Enterprise Risk Division, as well as the division of Accounting and Tax into distinct Accounting Division and Tax Division, to strengthen functional focus and accountability.

Recruitment

In fulfilling its human capital requirements, INA upholds the following key principles:

- Ensuring workforce sufficiency across INA and its subsidiaries through medium- to long-term workforce planning aligned with business strategy.
- Diversifying recruitment sources by expanding partnerships with local and international institutions, while leveraging HR systems and digital platforms.
- Strengthening leadership succession planning through early identification of potential talents and structured leadership acceleration programs for key positions.
- Enhancing the internship program into the INA Talent Program as a pipeline for future competent professionals.
- Expanding and reinforcing the organizational structure with sectoral experts, functional specialists, and industry professionals to support value creation strategies.
- Developing and ensuring placement standards for subsidiary personnel, including selection processes, remuneration structures, nomination mechanisms, as well as data-driven performance monitoring aligned and GCG principles.

As of year-end 2025, INA employed 80 professionals (excluding the Board of Directors, and Supervisory Board along with supporting committees), comprising professional talents with diverse qualified backgrounds.

About INA

About INA

About INA

INA was founded on a simple yet profound conviction that capital, when governed with discipline and integrity, can become a bridge between today's opportunities and tomorrow's responsibilities. Entrusted with a dual mandate to deliver sustainable commercial returns while contributing to national development, INA approaches investment not as a transaction, but as stewardship, where prudence guides risk, partnership strengthens execution, and governance safeguards trust.

INA at a Glance

As an institution grounded in a robust legal and institutional framework, INA serves as a strategic partner to investors by applying international practices and standards, and acts as a bridge for investors to deploy their capital and participate in Indonesia's economic development.

Indonesia Investment Authority (INA) is an investment management institution established by the Government of the Republic of Indonesia under a strong legal foundation, as stipulated in Law No. 11 of 2020, which has been revoked and replaced by Law No. 6 of 2023 concerning the Stipulation of Government Regulation in Lieu of Law No. 2 of 2022 on Job Creation into Law, and further supported by various implementing regulations, including Government Regulation No. 74 of 2020 concerning the Indonesia Investment Authority.

INA reports directly to the President of the Republic of Indonesia and is granted special authority (sui generis) to safeguard its independence and professionalism in asset management and in attracting Foreign Direct Investment (FDI). In carrying out its mandate, INA is equipped with investment flexibility while consistently upholding the principles of accountability and responsibility.

INA Brief Profile

Name
Lembaga Pengelola Investasi (LPI)
Indonesia Investment Authority (INA)

Date of Establishment
15 December 2020

Core Business
Manage, plan, organize, supervise, control, and evaluate investments.

Establishment Legal References
Law of the Republic of Indonesia No. 11 of 2020 that has been revoked and replaced with the Stipulation of Government Regulation in Lieu of Law No. 2 of 2022 on the Job Creation into Law.

Indonesian Government Regulation No. 74 of 2020 dated December 15, 2020 on Indonesia Investment Authority.

Authorized Capital
State Equity Participation in INA to fulfill the total capital requirement of Rp75 trillion stipulated in Government Regulation No. 74 of 2020.

Total Employees
80 Personnel

INA Mandate

INA aims to enhance and optimize the long-term value of investments under its management in order to support sustainable development. INA may enter into cooperation with investment partners, investment managers, SOEs, government bodies or agencies, and/or other entities, both domestically and internationally. INA may appoint investment partners directly, taking into consideration, among others, prevailing international business practices, while consistently upholding good governance principles.

INA Authority

INA acquires comprehensive authority in carrying out its mandate, as stipulated in Government Regulation No. 74 of 2020 (Article 7).

- To place funds in financial instruments
- To conduct asset management activities
- To cooperate with other parties, including trust fund entities
- To determine prospective investment partners
- To provide and receive loans
- To administer assets

Unique Characteristics of INA

As a sui generis institution, INA establishes distinctive characteristics, among others:

1 Full authority in making investment decisions to achieve optimal risk-adjusted returns (Government Regulation No. 74 of 2020, Article 6)

2 Managed by a professional management team to ensure independence (Government Regulation No. 74 of 2020, Article 26)

3 A commercial focus aligned with the national economic development agenda (Government Regulation No. 74 of 2020, Article 5)

4 Flexibility and the ability to adopt international best practices in investment (Government Regulation No. 74 of 2020, Article 7)

5 A strong legal foundation, established by law and may only be dissolved through an act of law (Law No. 6 of 2023, Article 171), including bankruptcy protection (Government Regulation No. 74 of 2020, Article 72)

Capital of INA

INA received capital injection from the Government of the Republic of Indonesia in its first year of establishment in accordance with applicable laws and regulations (Government Regulation No. 74 of 2020 Article 3). This capital injection forms part of paid-in capital used to support the execution of INA's long-term investment mandate and may be increased through additional state capital injections and/or other sources.

An initial cash injection of Rp15 trillion, stipulated under Government Regulation No. 73 of 2020, received by INA on 26 February 2021.

A second cash injection of Rp15 trillion, stipulated under Government Regulation No.110 of 2021 dated 29 October 2021, received by INA on 12 November 2021.

Transfer of a portion of Series B shares owned by the Republic of Indonesia in PT Bank Rakyat Indonesia (Persero) Tbk and PT Bank Mandiri (Persero) Tbk of up to Rp45 trillion, stipulated under Government Regulation No.111 of 2021 dated 29 October 2021. This capital injection in the form of in-kind shares was received through an in-kind deed signed on 23 December 2021.

Utilization of INA Profit

In accordance with Government Regulation No. 74 of 2020 (Article 50), the profits earned by INA are allocated for the establishment of statutory reserves, retained earnings, and profit distribution to the Government.

Annual net profit is first allocated to statutory reserves until the required threshold is reached. Thereafter, the remaining profit after the allocation to statutory reserves is retained to strengthen the capital structure and support INA's long term sustainability in carrying out its investment mandate and capital preservation.

A portion of the profit may be distributed to the Government once the statutory reserves and retained earnings are fulfilled in accordance to the threshold stipulated under the prevailing regulations.

Vision

INA aims to support the sustainable development of Indonesia and to create wealth for future generations

Mission

Delivering optimal returns

Investing in the right assets to deliver optimal risk-adjusted returns, by:

- Adopting a long-term perspective to ensure that we grow wealth for future generations;
- Prioritizing key growth sectors and building capabilities to add value to investments.

Collaborating with credible investors

Collaborating with credible investors to advance the development of Indonesia by way of:

- Building operational capabilities based on global best practice standards;
- Building our reputation as a credible and world class institution.

Creating value

Creating added value through the application of global best practices, by:

- Unlocking and strengthening the long- term value of investment assets;
- Supporting local champions to grow into regional and global champions.

Advancing Indonesia's competitiveness

Advancing Indonesia's competitiveness through strategic investment policy by unleashing the economic potential of Indonesia in a sustainable way and leveraging Indonesia's advantages such as its young demography and rich resources.

Building a world-class organization that comprises Indonesia's best talents

Building a world-class organization that comprises Indonesia's best talents:

- Building a working culture that attracts top talent;
- Developing future leaders to spearhead Indonesia's national development.

Financial Highlights

Financial Highlights

The data and information presented in this "Financial Review" refers to INA's Financial Statements as of December 31, 2025, which have been audited by the Public Accounting Firm Purwanto Susanti & Surja (an EY affiliate) with an unqualified opinion.

Total Liabilities and Equity	**110,994,151**	**110,822,220**	**171,931**	**0.2%**

INA's total assets in 2025 increased by 0.2% to Rp111.0 trillion, compared to Rp110.8 trillion in 2024. The increase was primarily driven by additional investments in subholdings of Rp6.6 trillion and the extension of loans to related parties of Rp5.8 trillion. The increase was financed from internal sources, including the withdrawal of Rp3.0 trillion in time deposits and Rp2.1 trillion in bonds maturing in 2025.

However, the share prices of Bank Mandiri and Bank Rakyat Indonesia ("in-kind shares") declined by an average of 10.4% at the end of 2025 compared to year-end 2024. This decline resulted in a decrease in the value of equity investments (other financial assets) to Rp58.2 trillion, down from Rp65.0 trillion in the previous year.

Cash and cash equivalents as well as time deposits in 2025 stood at Rp59.0 billion and Rp9.7 trillion, respectively. INA's bond investments in 2025 reached Rp8.2 trillion.

In 2025, INA recorded an increase in investment compared to the previous period, as reflected in Rp6.6 trillion increase in equity investments in subholding entities. This growth was primarily driven by additional capital deployment across various sectors, including infrastructure, transportation and logistics amounting to Rp2.6 trillion, healthcare Rp803.2 billion, advanced materials Rp532.7 billion, education Rp309.0 billion, digital and digital infrastructure Rp136.3 billion, and the Hybrid Capital Solutions asset class Rp492.7 billion. In addition, the increase in the fair value of investment assets in subholding equity instruments contributed significantly, amounting to Rp1.7 trillion.

In terms of loan placements to related parties, INA recorded a net disbursement of Rp5.8 trillion in 2025. This was primarily driven by the digital and digital infrastructure sector Rp2.7 trillion, advanced materials Rp2.0 trillion, education Rp1.1 trillion, the Hybrid Capital Solutions asset class Rp548.3 billion, and the Funds asset class Rp214.4 billion. In addition, there were repayments of loans to related parties in the healthcare sector amounting to Rp505.2 billion, as well as in the infrastructure, transportation and logistics sector amounting to Rp231.1 billion.

Statements of Profit or Loss and Other Comprehensive Income

(in Rp Million)

Description	2025	2024	Change	
			Nominal	%
Revenue - net of final tax amounting to Rp224,222 (2024: Rp242,103)	8,454,214	5,911,500	2,542,714	43.0%
Investment expenses	(130,992)	(103,231)	(27,761)	26.9%
Operational expenses	(669,319)	(641,257)	(28,062)	4.4%
Finance cost	(230,317)	(280,315)	49,998	-17.8%
Foreign exchange gain/loss	93,379	31,871	61,508	193.0%
Profit Before Income Tax Expense	**7,516,965**	**4,918,568**	**2,598,397**	**52.8%**
Income tax benefit/(expense) – net (excluding final tax)	(70,292)	505,221	(575,513)	-113.9%
Net Profit for the Year	**7,446,673**	**5,423,789**	**2,022,884**	**37.3%**
Total other comprehensive (loss)/income	(6,771,101)	(11,607,243)	4,836,142	-41.7%
Total Comprehensive (Loss)/Income for the Year	**675,572**	**(6,183,454)**	**6,859,026**	**110.9%**

In its fifth year of operations, INA recorded net profit for the year of Rp7.4 trillion, an increase of 37.3% compared to Rp5.4 trillion in the previous year. The growth in net profit was supported by an increase in total revenue to Rp8.5 trillion, rose by 43.0% from Rp5.9 trillion in 2024. The main contributors to INA's revenue in 2025 were dividend income of Rp4.8 trillion, interest income of Rp2.0 trillion, and unrealized gains from changes in the fair value of investments in subholdings of Rp1.7 trillion.

The increase in INA's net profit was also supported by effective efforts in controlling investment expenses and finance costs throughout 2025.

However, INA recorded total other comprehensive loss of Rp6.8 trillion in 2025, primarily driven by unrealized losses from changes in the value of in-kind shares amounting to Rp6.8 trillion, which were beyond INA's control. As a result, total comprehensive income for 2025 amounted to Rp675 billion.

Statement of Cash Flows

(in Rp Million)

Description	2025	2024	Change	
			Nominal	%
Net cash (used in) provided from operating activities	(2,345,281)	4,658,517	(7,003,798)	-150.3%
Net cash used in investing activities	(878)	(36,799)	35,921	-97.6%
Net cash used in financing activities	(650,396)	(44,990)	(605,406)	1345.6%
Net (Decrease)/Increase in Cash and Cash Equivalents	**(2,996,555)**	**4,576,728**	**(7,573,283)**	**-165.5%**
Effect on foreign currency exchange rate changes	30,615	3,655	26,960	737.6%
Cash and Cash Equivalents at Beginning of the Year	**12,766,395**	**8,186,012**	**4,580,383**	**56.0%**
Cash and Cash Equivalents at End of the Year	**9,800,455**	**12,766,395**	**(2,965,940)**	**-23.2%**

In 2025, the execution of INA's strategy to accelerate investment deployment across priority sectors was supported by the utilization of internal funding in the form of cash and cash equivalents amounting to Rp10.6 trillion. This comprised cash and cash equivalents allocated to equity investments of Rp4.4 trillion, loans to related parties of Rp8.3 trillion, and proceeds from the repayment of loans to related parties of Rp2.1 trillion, in line with INA's commitment to strengthening its long-term investment portfolio.

In addition, INA made bank loan repayments of Rp640.0 billion, lease liability payments of Rp10.4 billion, and operating expense payments of Rp708.0 billion. These cash outflows were balanced by solid cash inflows, including dividend income of Rp5.6 trillion, interest income of Rp1.4 trillion, and proceeds from maturing bonds amounting to Rp2.1 trillion.

In 2025, INA contributed to state revenues through tax payments. Total tax payments for the year, including final taxes, amounted to Rp398.2 billion. This contribution reflects INA's commitment to supporting national development through the consistent fulfillment of its tax obligations in accordance with applicable regulations.

Statement of Changes in Equity

The increase in equity of Rp675.6 billion in 2025 was primarily driven by net profit for the year of Rp7.4 trillion, offset by unrealized losses from changes in the value of in-kind shares of Rp6.8 trillion.

Event Highlights

22 January 2025

Appointment of Erwandi Hendarta as Member of the INA Supervisory Board

Indonesia Investment Authority (INA) announced the appointment of Erwandi Hendarta as a Member of the Supervisory Board for the 2025–2030 term, effective from 22 January 2025, in accordance with Presidential Decree No. 163/P of 2024. This appointment forms part of the refreshment of the Supervisory Board's composition from the professional element and reflects the Government's commitment to strengthening governance and professionalism at INA as Indonesia's sovereign wealth fund.

With a strong background in law, risk management, and strategic investment, Erwandi Hendarta is expected to contribute significantly to supporting INA's prudent, credible, and sustainable management. This appointment also reinforces INA's consistency in building trust within the global investment community, while continuing its commitment to long-term investment management aligned with national economic development objectives.

4 February 2025

Fitch Ratings Affirms INA's Ratings at 'BBB'/'AAA(idn)'

Fitch Ratings affirmed the credit ratings of Indonesia Investment Authority (INA), assigning Long-Term Foreign and Local Currency Issuer Default Ratings at 'BBB' and a National Long-Term Rating of 'AAA(idn)', with a stable outlook. This affirmation reflects INA's strong credit profile, supported by its sovereign wealth fund mandate, solid institutional standing, and strategic role in advancing Indonesia's economic development agenda.

Fitch notes that INA's rating stability is underpinned by the implementation of strong governance, disciplined risk management, and a consistent long-term investment approach. This affirmation reinforces global investor confidence in INA as a credible investment partner, while underscoring INA's commitment to developing strategic partnerships and sustainable investments that generate long-term value for the national economy.

17 February 2025

INA and DBJ Launch First Hybrid Capital Solutions Fund Focused on Indonesia

Indonesia Investment Authority (INA) and the Development Bank of Japan (DBJ) expanded their strategic partnership through the launch of IJ Hybrid Capital Solution Fund I.L.P., the first hybrid capital fund specifically focused on investments in Indonesia. This initiative follows the Investment Framework Agreement signed in 2023 and aims to strengthen the national financial sector through innovative capital solutions, particularly senior secured financing designed to address the funding needs of companies in Indonesia.

Jointly managed by INA and DBJ, the fund combines INA's deep understanding of the domestic market with DBJ's expertise in structured financing and its global business network. This collaboration is expected to bridge financing gaps, support private sector growth, and enhance the resilience and sustainability of Indonesia's financial ecosystem, while also increasing foreign investment inflows and strengthening Indonesia–Japan economic cooperation.

6 March 2025

Signing of Investment Framework Agreement with Ares Management Corporation on Hybrid Capital Solutions and Securitisation in Indonesia

Indonesia Investment Authority (INA) and Ares Management signed an Investment Framework Agreement to advance the implementation of innovative financing through Hybrid Capital Solutions (HCS) and securitisation in Indonesia. This collaboration aims to unlock sustainable investment flows and strengthen the capital structure of strategic projects, with a commitment from the Ares Asia Credit platform to explore investment opportunities of up to USD500 million per year.

Through this partnership, Ares' global expertise in structured financing is combined with INA's local market insight and investment mandate to deploy capital with optimal returns and measured risk. This initiative is expected to strengthen the national financial ecosystem, increase foreign investment inflows, and support more resilient and sustainable economic growth in Indonesia through more flexible and innovative financing solutions.

20 March 2025

First Shipment of Plasma for Plasma-Derived Medicinal Products by PT SKPlasma Core Indonesia to South Korea, Demonstrating Pharmaceutical Self-Sufficiency and Global Collaboration

PT SKPlasma Core Indonesia officially conducted its first shipment of blood plasma to South Korea for processing into Plasma-Derived Medicinal Products (PDMP), such as albumin and immunoglobulin. This shipment marks an important milestone for Indonesia's plasma fractionation industry, demonstrating the nation's capability to supply high-quality plasma that meets international standards, while reflecting the company's commitment to supporting downstream development and investment in the healthcare sector to strengthen national health resilience.

The successful shipment, sourced from RSUP Dr. Sardjito and certified PMI blood management units, is the result of close collaboration between PT SKPlasma Core Indonesia and various stakeholders, including ministries, regulators, healthcare institutions, and logistics partners. This initiative paves the way towards the development of a domestic plasma-based pharmaceutical industry, with Indonesia's first plasma fractionation facility targeted to commence operations by the end of 2026, while creating new prospects for meeting national demand and exporting plasma-based therapies to global markets.

28 May 2025

Signing of Memorandum of Understanding between INA, Danantara, and Eramet to Explore the Establishment of a Strategic Investment Platform in the Nickel Sector

Indonesia Investment Authority (INA) and Danantara Indonesia signed a Memorandum of Understanding with French global mining company Eramet to explore the establishment of a strategic investment platform in the nickel sector, spanning upstream to downstream activities. This partnership aims to support Indonesia's nickel downstreaming agenda and the development of an integrated and sustainable electric vehicle (EV) battery materials ecosystem, with the application of stringent international standards in asset management and operations.

Through this collaboration, Danantara Indonesia and INA will provide long-term financing, while Eramet contributes technical expertise and global experience in sustainable mining. This initiative is expected to strengthen Indonesia's strategic mineral supply chain, enhance domestic value creation, and reinforce Indonesia's position as a global hub in the EV battery supply chain, while attracting quality investments and supporting sustainable national industrial growth.

13 June 2025

Appointment of 2 (Two) Chief Investment Officers at INA

Indonesia Investment Authority (INA) announced the appointment of Andry Setiawan and Christopher Ganis as Chief Investment Officers to jointly lead INA's investment function across strategic priority sectors. This appointment aligns with the strengthening of INA's institutional structure and the growth of its investment portfolio, ensuring more focused, disciplined, and sustainable investment management.

Andry Setiawan brings strong experience in renewable energy and energy transition, while Christopher Ganis has an extensive track record in private credit and cross-sector equity investments across Southeast Asia. With this combination of expertise, INA enhances its investment capabilities to mobilise capital, strengthen governance, and generate long-term value in support of sustainable development and Indonesia's economic growth.

17 June 2025

Signing of Memorandum of Understanding between INA, Danantara, and PT Chandra Asri Pacific Tbk to Support the Joint Development of a Chlor-Alkali–Ethylene Dichloride (CA-EDC) Plant

Indonesia Investment Authority (INA), Danantara Indonesia, and Chandra Asri Group signed a Memorandum of Understanding to explore a strategic partnership in the development of a Chlor-Alkali–Ethylene Dichloride (CA-EDC) Plant, with a total investment value of approximately USD800 million. This initiative aims to strengthen domestic production capacity for caustic soda and Ethylene Dichloride as key inputs for various downstream industries, including nickel processing, while reducing import dependency and supporting Indonesia's downstreaming agenda and industrial transformation.

As part of a National Strategic Project, the CA-EDC project is expected to enhance industrial resilience, generate economic value added, and strengthen Indonesia's manufacturing competitiveness through import savings amounting to trillions of rupiah and export potential for Ethylene Dichloride. This public–private collaboration reflects a shared commitment to driving sustainable economic growth, job creation, and the strengthening of Indonesia's long-term industrial foundation.

21 August 2025

Signing of Memorandum of Understanding between INA and Franklin Templeton for Strategic Collaboration in Establishing a Private Asset Fund and Co-Investment in Indonesia

Indonesia Investment Authority (INA) and Franklin Templeton signed a Memorandum of Understanding to explore strategic collaboration in the establishment and management of a private asset fund, as well as co-investment opportunities across Indonesia's strategic sectors. This collaboration aims to facilitate the channeling of global institutional capital into Indonesia's private markets through professional, diversified investment structures aligned with international governance standards.

This initiative combines Franklin Templeton's global investment capabilities with INA's local insights and network to strengthen Indonesia's attractiveness as a long-term investment destination. Beyond capital mobilisation, the collaboration also includes knowledge exchange, talent development, and enhancements in valuation and portfolio management capabilities, supporting sustainable and competitive economic growth in Indonesia.

25 September 2025

Signing of Strategic Partnership Memorandum of Understanding between INA and Export Development Canada (EDC) to Expand Canada–Indonesia Investment Opportunities

Indonesia Investment Authority (INA) and Export Development Canada (EDC) signed a Strategic Partnership Memorandum of Understanding valued at up to USD600 million to strengthen bilateral investment relations and support sustainable economic development between Indonesia and Canada. This partnership establishes a framework for exploring financing and co-investment opportunities in priority sectors, including infrastructure, renewable energy and clean technology (cleantech), as well as agrifood, leveraging EDC's global financing capabilities and INA's investment mandate.

This collaboration aims to unlock access to Canadian capital and expertise for strategic projects in Indonesia, while creating new business opportunities for Canadian enterprises in one of Southeast Asia's fastest-growing economies. Beyond financing, the INA–EDC partnership is designed to attract global capital, foster innovation, and deliver sustainable socio-economic impact for the mutual benefit of both countries.

17 November 2025

INA, in Collaboration with LPEM UI, Publishes Socio-Economic Impact Report on Its Long-Term Investment Portfolio in BTB Toll Road and BNCT International Port

INA, in collaboration with LPEM UI, released a socio-economic impact report assessing the role of INA's long-term investment partnerships through two strategic assets: the Bakauheni–Terbanggi Besar (BTB) Toll Road and the Belawan New Container Terminal (BNCT) International Port. This data-driven study reinforces INA's dual mandate to generate investment returns while creating sustainable economic, social, and environmental value through collaboration with global partners and strong governance.

The findings indicate that both projects have made significant contributions to national economic growth, including GDP enhancement, job creation, improved logistics efficiency, MSME development, and carbon emissions reduction. These results demonstrate that long-term investment partnerships aligned with national priorities can deliver inclusive and sustainable development outcomes for Indonesia.

8 December 2025

PT SKPlasma Core Indonesia Launches Indonesia's First Plasma-Derived Medicinal Products Made from Local Plasma Donations: SK GammaBio and SK Albumin

PT SKPlasma Core Indonesia, a joint venture between SK Plasma (part of SK Group Korea) and Indonesia Investment Authority (INA), officially launched Indonesia's first domestically sourced Plasma-Derived Medicinal Products (PDMP), SK GammaBio and SK Albumin, produced entirely from Indonesian plasma donors, coinciding with National Health Day 2025. This launch marks a significant milestone toward national self-sufficiency in plasma-based therapies, particularly for the treatment of immunodeficiency, autoimmune diseases, liver disorders, severe burns, and other critical conditions, while strengthening the resilience of essential medicine supply that has historically relied on imports.

This initiative is supported by strategic collaboration with the Indonesian Red Cross, national hospitals, and regulatory support, further reinforced by the development of a state-of-the-art plasma fractionation facility in Karawang, targeted to commence operations by the end of 2026. The facility will enable sustainable domestic production of PDMP, improving access and affordability of globally standardised therapies for patients in Indonesia.

17 December 2025

Allo Bank Leads Syndicated Loan to Support the Development of Indonesia's First Plasma Fractionation Facility with SKPlasma Core

Allo Bank Indonesia Tbk, together with Bank Mega, led a Rp3.7 trillion syndicated loan to PT SKPlasma Core Indonesia, a joint venture between SK Plasma (SK Group Korea) and Indonesia Investment Authority (INA), to support the development of Indonesia's first plasma fractionation facility in Karawang, West Java. This strategic project aims to strengthen national health resilience and self-sufficiency through the development of a domestic Plasma-Derived Medicinal Products (PDMP) industry, in line with the Health Sector Master Plan (RIBK). Apart from strengthening the pharmaceutical supply chain and improving healthcare service quality, this initiative also promotes technology transfer, HR development, job creation, and opens long-term export opportunities for Indonesia.

16 February 2026

INA Announces End of Chief Executive Officer's Term and Leadership Transition

Indonesia Investment Authority (INA) announced that Ridha Wirakusumah completed his term of office as Chief Executive Officer on 15 February 2026. Under his leadership, INA successfully built its reputation as a credible sovereign wealth fund, with AUM increasing from USD5 billion to approximately USD10 billion and more than USD4.5 billion invested alongside global partners in priority sectors such as infrastructure, digital, healthcare, and green energy. These achievements reflect INA's role in supporting sustainable economic development and long-term value creation.

As part of the governance process, Eddy Porwanto was appointed Acting Chief Executive Officer effective 16 February 2026, to ensure leadership continuity. With more than 30 years of experience and a key role since INA's early years as CFO, he is committed to continuing the balance between commercial discipline and national impact. INA remains focused on carrying out its mandate to mobilize investment in support of Indonesia's strategic priorities.

3 March 2026

Reducing Import Dependency, Danantara & INA Sign Investment Agreement for Chandra Asri Group's CA-EDC Project

Danantara Indonesia, Indonesia Investment Authority, and Chandra Asri Group signed a Conditional Share Subscription Agreement (CSSA) to strengthen domestic production of Caustic Soda and Ethylene Dichloride (EDC). The agreement follows a previous MoU, with Danantara and INA acting as strategic investors in the development of the Chlor Alkali–EDC plant in Cilegon, Banten.

The USD 800 million project is part of the National Strategic Project (PSN), aimed at reducing dependence on imported industrial raw materials while supporting downstream development. Caustic Soda will support sectors such as soap, alumina, and paper, while EDC plays an important role in the construction and packaging industries. In addition to strengthening domestic supply resilience, the project opens potential for exports and increased foreign exchange through stronger competitiveness in the national chemical industry.

Under the investment structure, Danantara and INA will invest a total of USD200 million in the development of the facility, which will be managed by PT Chandra Asri Alkali, with operations targeted to begin in 2027. The facility is designed to have an annual production capacity of 400,000 tons of Caustic Soda and 500,000 tons of EDC, and is expected to create thousands of jobs. This collaboration reflects strategic synergy to strengthen the national supply chain, accelerate industrialization, and enhance Indonesia's global competitiveness.

1 April 2026

INA Announces Appointment of Fauzi Ichsan as Member of the Supervisory Board

Indonesia Investment Authority announced a change in the composition of its Supervisory Board from the professional element, based on Presidential Decree of the Republic of Indonesia No. 27/P dated March 4, 2026. Through this decree, Fauzi Ichsan was appointed as Member of the Supervisory Board for the 2026–2031 term, following consultation with the House of Representatives of the Republic of Indonesia. With more than 30 years of experience in investment, banking, and economics, he is expected to strengthen INA's strategic direction and role in carrying out its mandate.

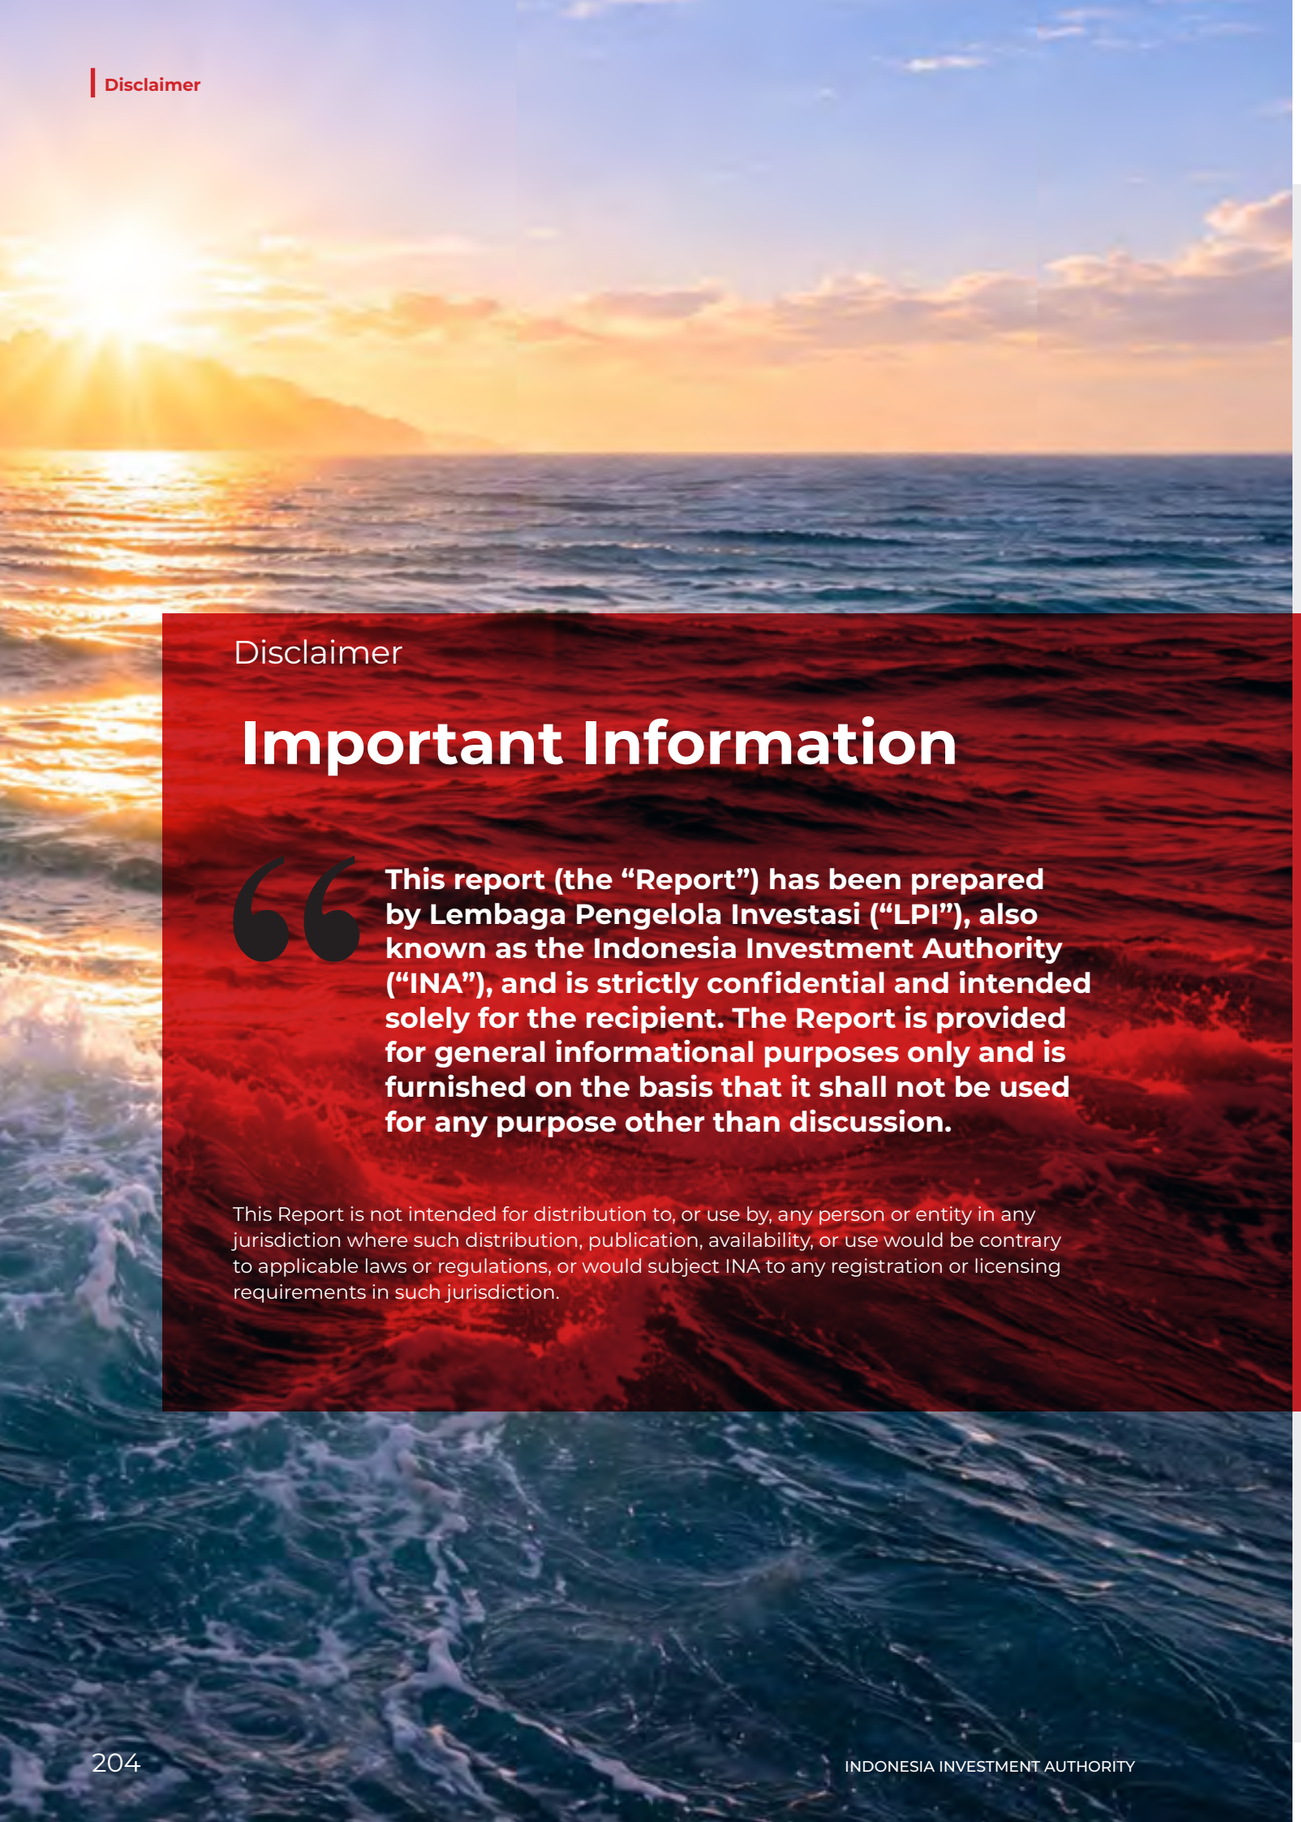

This appointment reflects the Government's commitment to strengthening INA's governance and credibility among global investors, while ensuring a sustainable investment environment in line with the mandate of the Job Creation Law. Fauzi Ichsan replaces Darwin Cyril Noerhadi, whose term of office ended on 22 January 2026, with appreciation for his contributions during his tenure.

17 April 2026

Three Sovereign Wealth Funds Become Anchor Investors in the Launch of the Galaxy Orientis China-ASEAN Investment Platform

China Investment Corporation, Indonesia Investment Authority, and the State Oil Fund of the Republic of Azerbaijan established the Galaxy Orientis China–ASEAN Investment Platform (CAIP), a private equity platform focused on long-term investment opportunities across the China–ASEAN corridor. The program has reached its first close of approximately USD520 million, with a target size of USD1 billion, and is designed to promote capital flows and industrial collaboration amid increasing trade integration and supply chain restructuring in Southeast Asia.

The platform will invest in strategic sectors, including industrials, healthcare, consumer, business services, and technology, with CGS International Securities Pte. Ltd. serving as General Partner by providing regional expertise and operational networks. This initiative reflects synergy among sovereign wealth funds in accessing high-quality growth opportunities, strengthening China–ASEAN economic connectivity, and supporting long-term and sustainable economic value creation in the region.
